Water Management System

Powered by Flecto Sense

- The valve operates electromechanically having a high tolerance to grit particles in the water.
- Open, Throttle, Close and timer functions available from the portal and Open, Close function from CIU*.
- The system enables the user supported functions to be commanded via the radio.
- Powered by a lithium battery gives you up to 10 years of battery life, switched once per hour. Field replaceable batteries.
- All communication is secure, only you have access to your user account and data.
- Facilitate revenue collection on a wallet system.
- The SSVC can be incorporated into full AMI (Advanced Metering Infrastructure), aimed at automating all facets of meter management.
- IP68 Ingress protection rating.

Unique

The system is unique in the way the data is always encrypted. The SSVC doesn't need to be linked to a water meter.

Target audience

Will this be the solution for you? Ask yourself how easy it is to switch your water open or close. The SSVC makes it possible for you to command the valve from the comfort of your own home.

Business in a box.

Water flow can be restricted for a period of time or simply closed when the property is vacant or the account is in arrears. To control the SVC you require a FSC and/or CIU.

Smart ideas

By partnering with a technology company that is on the bleeding edge, you position yourself to always be a trend setting firm. This is what Flecto Sense does daily for hundreds of customers. Join us today.

Location

The SSVC should be installed on the water pipe where you wish to restrict flow. This product is self powered, no need for a power outlet.

Saving you money.

Our system saves you money by controlling the valve. The SSVC can be set to Close or Throttle depending on the situation you wish to control. Gardens can be set to allow water flow for certain periods only or tenants can be Throttled to ensure timely payments.
