

Digital Forensics

When the unexpected occurs, you never know what piece of data will make the difference to your investigation. The SI forensics team have the insatiable investigative mindset and attention to detail that ensures we have the best chance possible of finding, recording, and documenting the data you need.

Our team comprises former law enforcement digital investigators, who have a wealth of experience in recovering digital evidence in a vast range of investigations, criminal or otherwise. Our team have provided expert evidence that has been cross examined in criminal courts and tribunals across the UK.

We utilise the latest techniques and specialist tools to conduct a variety of investigations whilst maintaining the chain of custody. We can interrogate and present findings from devices including (and not limited to):

- Computers (laptops, desktops, 'MacBooks', modern CCTV units)
- Hard drives (internal and external)
- Solid state and USB flash drives, memory cards
- Optical media (CD and DVD)
- Mobile devices (mobile phones and tablets)
- Wearables (like Apple or Samsung watches)
- Drones (such as the DJI Phantom)
- Games consoles (e.g., Xbox and PlayStation)
- 'Internet of things' devices (smart cameras)

We will work with you to tailor a forensic strategy to the needs of your investigation. This may include tactics for limiting the data set, accommodating a tool that you are already familiar with, implementing a policy to handle encountering legal privilege material or other sensitive data.

Our experts work in accordance with ACPO Principles, comply with guidance from the Forensic Science Regulator, and comply with legislation for expert witnesses including that of disclosure. Our experts have worked in ISO 17025 accredited laboratories, and as such continue to work to those standards.

Key Features

- Forensic analysis with expertise in a wide variety of evidence items
- Methodology tailored to your investigation's needs
- Reporting available for courts and tribunals
- Expert witness service for courts and tribunals

Where we can Help

- Employee Misconduct / Insider Threat
- Criminal Prosecution and Defence Cases
- Civil Cases
- Cyber Incidents
