

**CP Raumluftechnik GmbH**

*Your health is our passion!*

[www.clean-plasma.com](http://www.clean-plasma.com)

**Innovative Ion-  
Air purifier**

*without UV-rays, filters or chemicals*

# PL1001A

## Plasma installation-modul

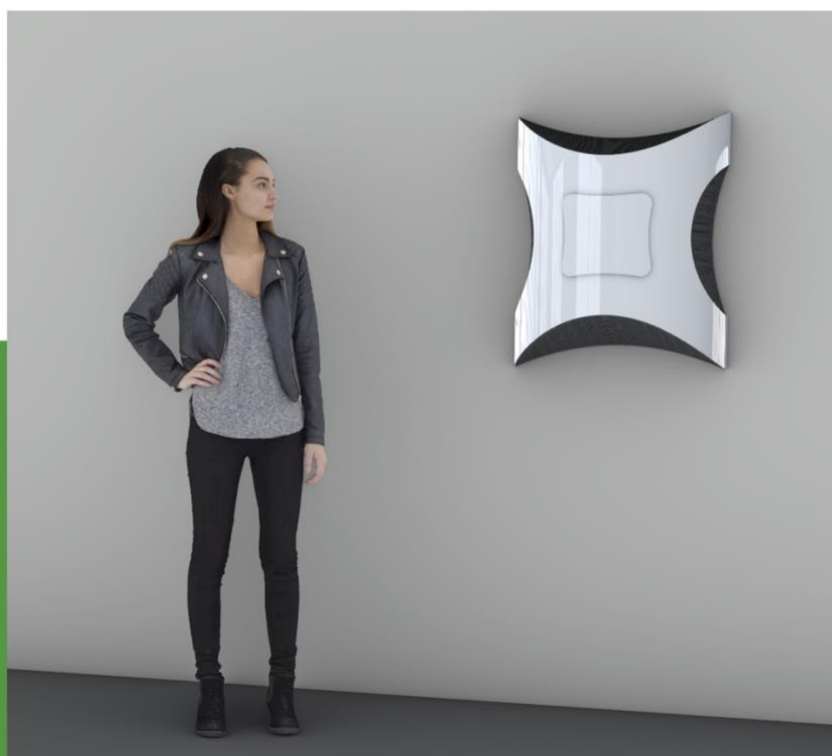

- can be flexibly installed into any climate- and ventilation system
- neutralises viruses & pollutants directly in the air around us
- certified harmlessness and effective against viruses (like SARS-CoV-2)
- sustainable & cost efficient: No cyclic replacement of expensive filters

***We would be pleased to provide you an individual disinfection concept for the air inside your facilities!***

### Your benefit: Our innovative functionality

While past concepts like HEPA-filters or UV-rays had the major downside that the dangerous viruses and pollutants must travel long distances past all people into the device to get filtered or neutralised, our technology works on a different principle:

Our systems emit millions of ions, that permanently hunt and inactivate viruses and other pollutants. This way the air around us stays clean and our environments remain healthy.

### Application areas

-  Offices & meeting rooms
  -  Schools & education facilities
  -  Bars & discos
  -  Private homes
  -  Hotels
  -  Restaurants
  -  Event locations & wedding venues
  -  Sport facilities & Fitness-studios
- and many more...

*"Finally our customers and staff feel safe again!"*

*In addition the air quality is noticeably more pleasant since we use the systems of CP Raumluftechnik GmbH."*

*Because your health is our number one priority, we tested and certified the harmlessness of our systems and a 99.5% elimination rate of SARS-CoV-2 at the Fraunhofer institutes IVV & IBP!*

## Air disinfection-devices Floor-, ceiling- & wall-mounted

Even without a ventilation system you can get our extensive protection against viruses and other pollutants in the air: With our quiet and ready to be plugged in devices.

### »» Positive side effects

Our one-of-a-kind technology is not only effective against all kind of viruses but also against:

- contagious bacteria
- allergy triggering pollen
- bad odors (like cigarette smoke)

### »» Our mission

Imagine clean indoor places, without bad odors or fear of viruses and bacterias. Safe environments for our children, office workers and restaurant visitors.

We work hard to make this dream a reality!

# ABOUT US

CP Raumluftechnik GmbH has set the goal in these times of COVID to make the air in our rooms clean and healthy again!

To achieve this we exclusively use technologies, that are certified to be safe for humans and effective against SARS-CoV-2 and other harmful pollutants.

*„Clean air and a healthy environment  
are a fundamental right not a luxury!“*
