We are excited to develop and unlock the production potential that we believe exists at Nueva Recuperada and are keenly awaiting the results of our maiden 30,000m drill program that is currently under way. The goal of this drill program is to optimize operations and to collect the data required to expand the current 7,324,400 tonne inferred resource at Nueva Recuperada”.

The formation of Silver X provides both shareholders and stakeholders a tremendous opportunity to leverage substantial in-country knowledge, experience, and track-records of success to responsibly tap into this huge mineral endowment.
