

KINDBODY CASE STUDY

Kindbody is a wellness and fertility healthcare provider for women, offering modern, tech-enabled clinics across the country. Due to rapid growth and a quickly evolving international strategy. Kindbody was looking for professionals to advise on their security strategy through these transitions.

EDEN DATA HELPED BY:

- Taking over as executive leaders for their entire security & compliance practice, serving as their Chief Information Security Officer (CISO)
- Managed successful HIPAA & SOC2 audits
- Building strategy for additional certifications to expand market reach
- Helped with investor confidence contributing to Kindbody securing series C funding

KINDBODY IMPACT:

- Supported their expansion ability into global markets through compliance adherence with our successful audit projects
- Helped secure the largest fertility investment (\$62mil) in history
