

WEIGHTS & BIASES CASE STUDY

Weights and Biases (W&B) builds comprehensive tools for machine learning used for experiment tracking, dataset versioning, and project collaboration. With the prospect of additional high growth funding and pressure to get SOC2 certified, Weights and Biases was looking for a partner to guide them through these strategies from a compliance perspective.

EDEN DATA HELPED BY:

- Establish a comprehensive SOC2 program, including building complete controls and documentation, leading to a successful SOC2 audit
- Enhanced overall security and built a secure data privacy program
- Offered GDPR guidance to ensure compliance in their market expansion
- Bolstered investor confidence contributing to W&B securing additional funding

W&B IMPACT:

- Supported significant client acquisition through successful compliance initiatives
- Optimized security & compliance posture to help secure Series B funding
