

## **Valerann Making Roads Smart**

Valerann is making roads smart - ensuring that roads are safe, efficient, and supports smart vehicles.

In a world powered by data, Valerann strives to provide the richest and most insightful data services in order to optimize traffic management, support smart vehicles and inform road users.

Valerann's Smart Road System is an AI web-based traffic management platform that produces real-time, high-resolution information about everything that takes place on the road. By integrating wireless sensing technologies into roads, the system continuously provides insights and predictions, transforming roads into future-ready, data-generating infrastructure.
