

# Generating RoPA Reports Automatically

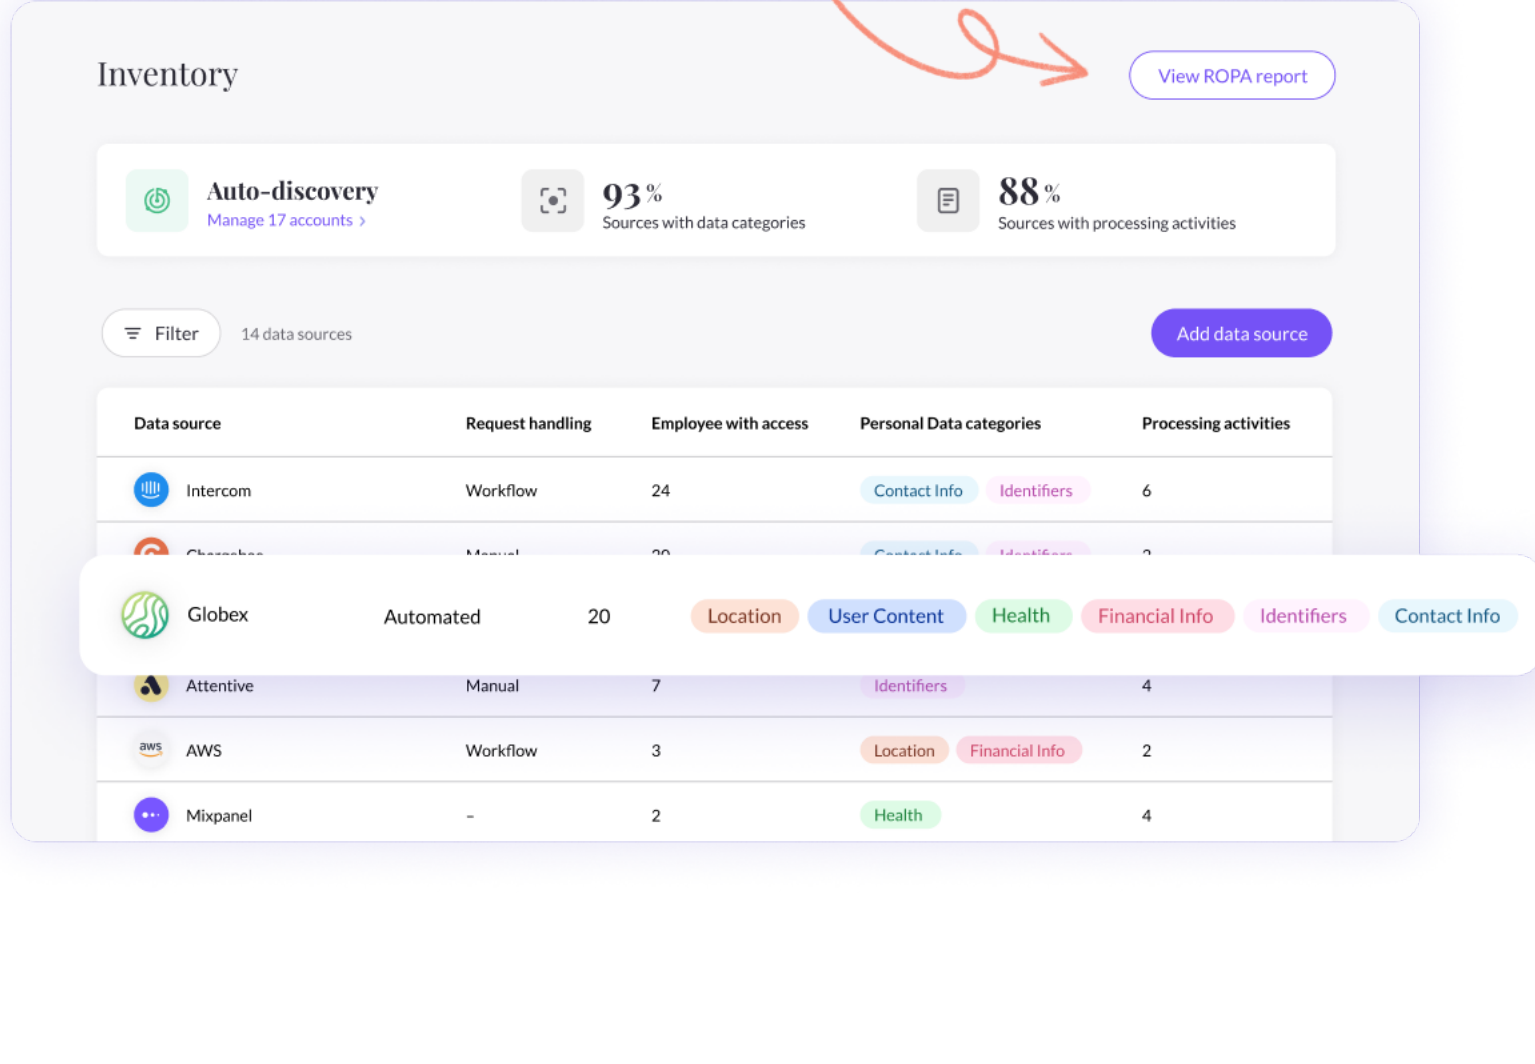

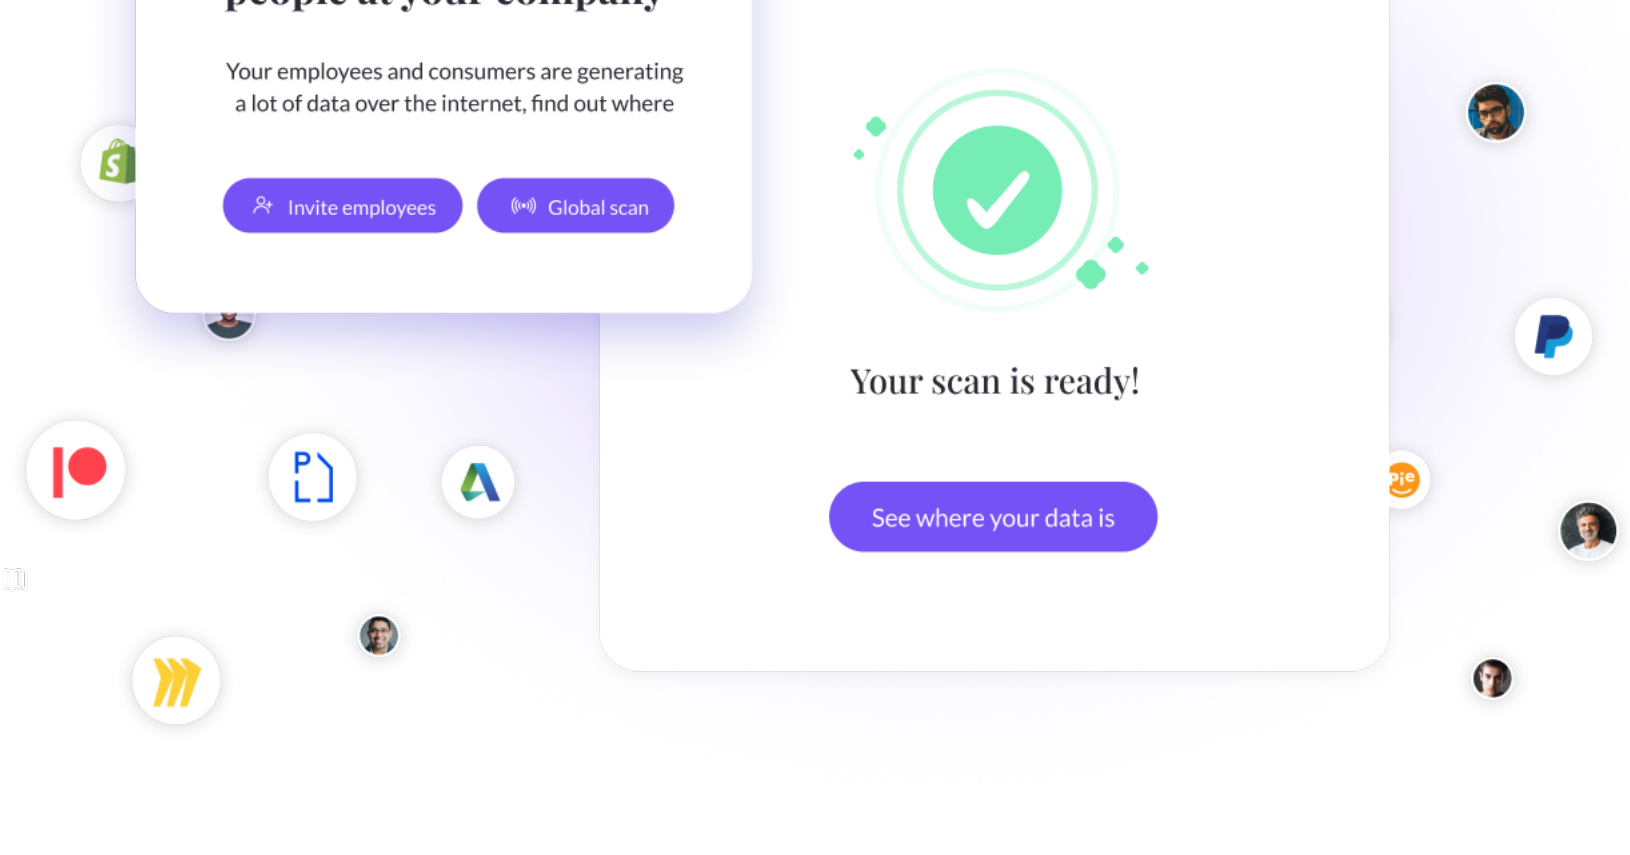

Automated real-time data mapping allows for easier exports of your organization's Records of Processing Activity to a CSV/ PDF with a live blueprint of all data sources & collected PII. Your RoPA is always ready for an audit.

## How to get your real-time RoPA report in minutes

### STEP 1 Map & Discover Data Sources.

Dynamically generate a system report and complete your data inventory across all platforms and SaaS solutions. Using our system analyzer, every system is classified, giving you insights into how data may be used across the organization.

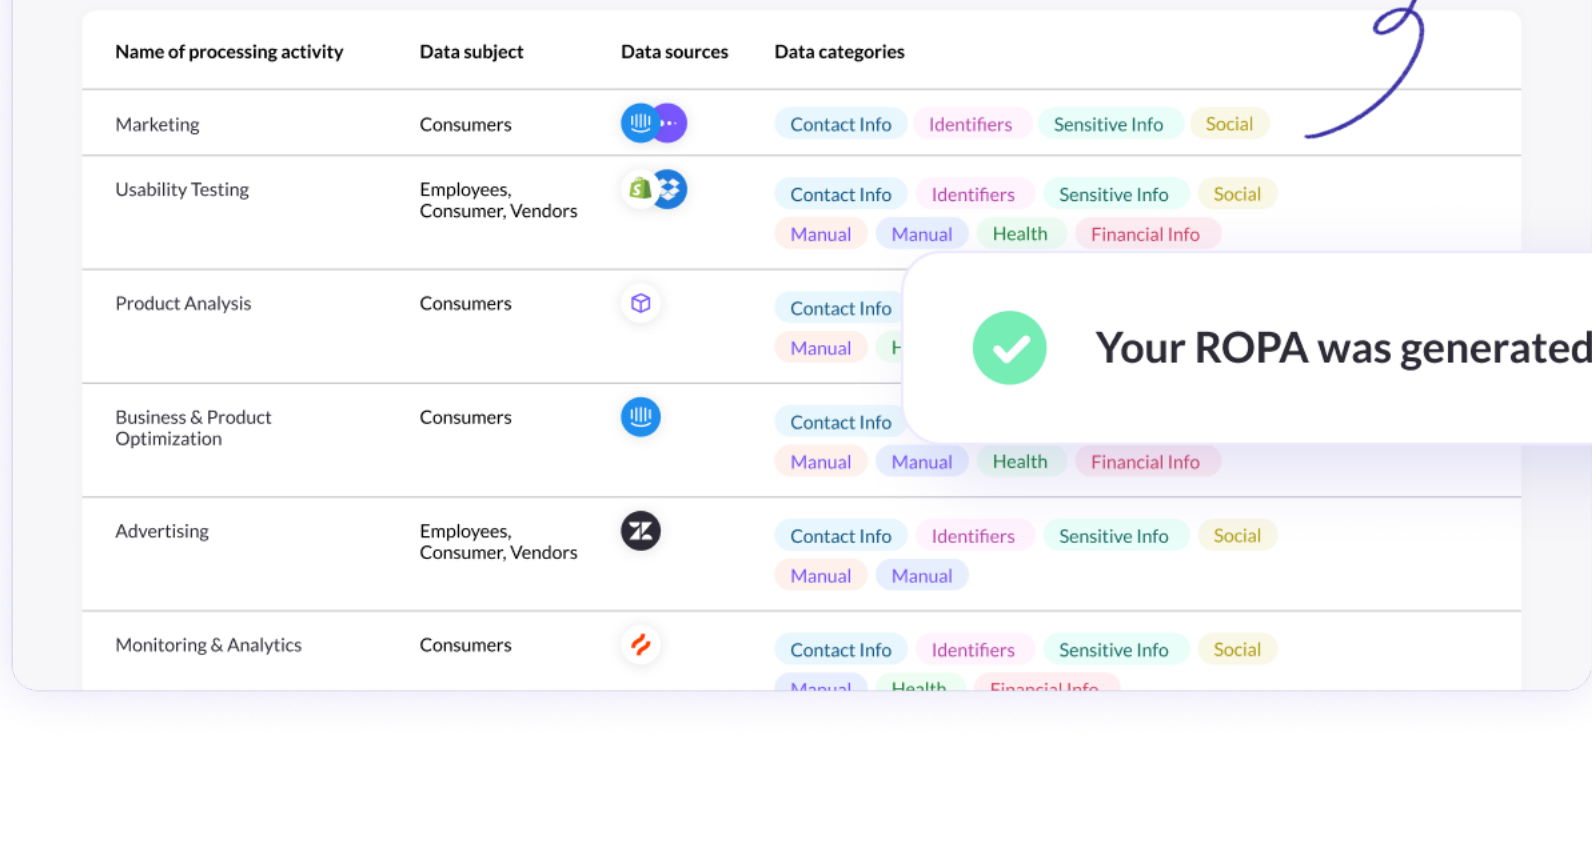

### STEP 2 Auto-update Privacy Footprint.

Dynamically capture changes and updates to your privacy footprint. Including newly added systems, employees' SaaS access, and risk of accidental disclosure of data. We will keep you up-to-date and continuously compliant.

### STEP 3 Generate RoPA In a Single Click.

Mine Data Mapping captures and documents how systems are used across your organization. We keep your RoPA up to date and aligned with your ever-changing tech stack at all times.

### STEP 4 Vet & Validate Processing Records.

Let relevant team members in your organization participate in your privacy program by vetting all generated data or commenting on it for clarification. You can use our AI suggestions or edit report fields manually.

### STEP 5 Monitor & Control Privacy Program.

Gain insights that will keep you up with privacy regulation requirements and keep your privacy program tracked and enforced. We alert you on discrepancies and actions required like:

- a system that was added and is not in the RoPA or the other way around.
- a system's retention policy is different from the retention policy of Processing Activity.

## Prepare for Future Audits.

Export and download your Record of Processing Activities into a CSV/PDF as required. Your RoPA is always prepared and readily available!

### BENEFITS

## Keep up with your company's evolving data flows

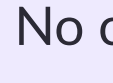

### Full coverage

Reveal up to 100% of your data sources in a collaborative, central hub that automatically generates records so nothing gets overlooked.

### Always on

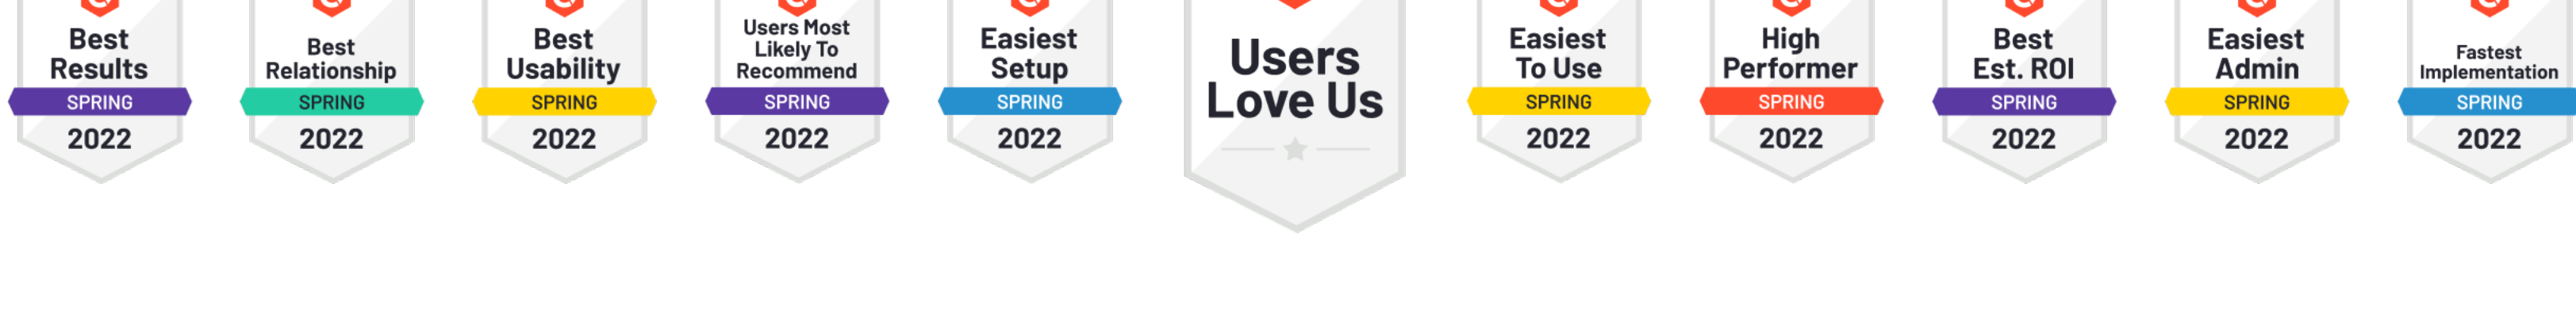

Use continuous data mapping for data governance and easy ROPA generation for GDPR Article 30 compliance.

### The gift of time

No code or tech team is needed to set up your very own automated platform. Get started in minutes.

## About GDPR Article 30

- Organizations that process personal data are required to maintain a record of their processing activities (RoPA).
- The RoPA needs to include:
  - The controller's details
  - Data processing purposes
  - A description of the data categories
  - Information regarding personal data transferred to a third country
  - Security measures in place
  - Planned time frame for erasing personal data records
  - Records of all processing activities that are carried out
- The records are to be kept both in writing and electronic form.
- The records should be prepared and readily available upon request to the supervisory authorities.
