

## My [Offer](#) to FDA's Peter Marks to End Vaccine Hesitancy

CNN quoted FDA's Dr. Marks as saying he is compelled to do ANYTHING to end vaccine hesitancy. I suggested he debate us. Do you think he will accept? Don't hold your breath.

[Steve Kirsch](#)

Dr. Peter Marks, Director of CBER at the FDA, says he's compelled to do anything to end vaccine hesitancy... except debate us.

I saw [this article on CNN](#) just now.

**CORONAVIRUS:**  
**FACT VS. FICTION**  
WITH DR. SANJAY GUPTA

## US has a "very serious" problem with Covid-19 vaccine uptake

By Ivana Kottasová and Hafsa Khalil, CNN

Updated 7:06 AM ET, Wed June 8, 2022

FDA CBER Director Dr. Peter Marks is quoted (the bold is my highlighting):

"We **do have a problem** with vaccine uptake that is very serious in the United States and **anything we can do** to get people more comfortable to be able to accept these potentially life-saving medical products is something that **we feel we are compelled to do**," said Dr. Peter Marks, director of the Center for Biologics Evaluation and Research.

**My reaction was swift.**

**Instantly, I knew what I had to do. Seconds after reading that article, I drafted the following email:**

Subject How to solve the vaccine uptake problem: Debate us

## US has a "very serious" problem with Covid-19 vaccine uptake

By [Ivana Kottasová](#) and Hafsa Khalil, CNN

Updated 7:06 AM ET, Wed June 8, 2022

Hi Peter,

You are right about the vaccine uptake problem. According to independent survey we just commissioned, only 33% of Americans opted to go further than the first 2 doses.

You were quoted in that [CNN article](#):

"We do have a problem with vaccine uptake that is very serious in the United States and anything we can do to get people more comfortable to be able to accept these potentially life-saving medical products is something that we feel we are compelled to do," said Dr. Peter Marks, director of the Center for Biologics Evaluation and Research.

Isn't it time for you to end the misinformation problem by debating us in a public forum?

My colleagues and I look forward to hearing from you.

The only way to end the misinformation is to debate the top misinformation spreaders. You will never win by trying to censor us.

We would be HAPPY to debate to you to end the misinformation problem. As you [can see from this slide deck, all the evidence we've been able to find shows there was clinical trial fraud and that the vaccines are very dangerous](#). We would love to know how we got it wrong

I look forward to hearing from you.

-steve

**I also followed up with a phone call to his work voicemail.**

**I left my cell phone number to reply.**

**I also sent this email to their PR person.**

**I forwarded a copy of the email I sent Peter with this intro...**

Subject

FW: How to solve the vaccine uptake problem: Debate us

---

Is there an official FDA response?

You can't ignore this. It would look bad. Peter said he'd do ANYTHING.

Did he mean ANYTHING except an open discussion on the record?

-steve

Please help Peter decide!

Perhaps you'd like to encourage Dr. Marks as well to debate us as well? Here is his [email](#). Let me know what he says. Maybe we can get his attention.

My new "Elephant in the Room" slide deck

Here is the [source](#) and [PDF](#) for my "Elephant in the Room" slide deck referenced in the email. This is the slide deck nobody wants to read (if you took the blue pill it's very upsetting).

You can also find it in the [REFERENCE section of my Substack](#) in the "[My Best Content](#)" article.

Summary

If you want to end vaccine hesitancy, it is best to start with honesty and full disclosure. Censoring and de-platforming people with opposing points of view creates mistrust, especially when it comes from the White House.

**If you want to create trust, show us you have nothing to hide.**

**If Dr. Marks refuses to debate us after making that statement to CNN, that tells you everything you need to know, doesn't it?**

**Subscribe to Steve Kirsch's newsletter**

**Thousands of paid subscribers**

**I write about COVID vaccine safety and efficacy, corruption, censorship, mandates, masking, and early treatments. America is being misled by formerly trusted authorities.**
