

CISCO SD-WAN & GOOGLE CLOUD TEST DRIVE

Service Overview:

At Netnology, we specialize in Cisco SD-WAN (Viptela) and Google Cloud enablement and implementation services. The test-drive offer will help customers develop a baseline understanding of Cisco SD-WAN and Google Cloud integrated solution and its value proposition.

This 2-4 hour session will demonstrate use-cases related to Cisco SD-WAN and Google Cloud. It will also highlight ease of configuration and manageability of this integrated solution.

This test-drive is built and delivered by subject matter experts (SME) who have extensive experience working with Cisco SD-WAN solution and Google Cloud.

Solution Overview:

Cisco SD-WAN Cloud Hub with Google Cloud is an integrated solution that combines Cisco's SD-WAN solution with Google Cloud's services. In phase one, the integration between Cisco SD-WAN and Google Cloud Network Connectivity Center (NCC) enables automated connectivity from branch site to cloud workloads, and from branch site to branch site, across regions, using Google's reliable, high-performance global cloud network.

Cloud Hub provides enterprise customers with simplified management and automated provisioning via the following:

- **Site to Cloud:** Automate Cisco SD-WAN fabric extension to access Google Cloud workloads, keeping the control with enterprise IT.
- **Site to Site:** Simplify SD-WAN provisioning for optimized site-to-site connectivity over Google's global cloud network.

Cisco SD-WAN Cloud Hub with Google Cloud NCC is unique because:

- It offers a normalized experience and automated process to extend Cisco SD-WAN fabric to Google Cloud via Cisco SD-WAN Cloud OnRamp, saving enterprises time and reducing human error.
- It provides Cisco SD-WAN customers the choice of an alternative site-to-site connectivity solution leveraging Google's global cloud network, provisioned using an automated process via Cisco vManage. For users who have existing workloads deployed in Google Cloud, the same set of network infrastructure can be leveraged for connecting to cloud workloads as well as other on-premises sites, simplifying the network design.
- It offers a reliable and easy-to-deploy network underlay option with 99.95% availability, increased security, and better performance versus using the internet.

Service Benefits:

Netnology has a team of world class engineers who specialize in Cisco SD-WAN (Viptela) and are passionate about customer success. Netnology will partner with you to provide:

- Solution and use-cases overview
- Step-by-step use-cases demos

Service Scope:

As part of the 2-4 hour Test Drive engagement, Netnology will help with the following:

- Solution Overview
- Cisco SD-WAN and Google Cloud Value Proposition
- Cisco SD-WAN and Google Cloud Use-cases Demos
 - Site to Site Connectivity
 - Site to Cloud Connectivity
- Lessons learned and enhancements

Target Audience:

This service is designed for Pre and Post sales professionals selling, configuring, deploying, and managing the Cisco SD-WAN and Google Cloud integrated solution.

Service Deliverables:
