Low threshold with Permaseal weather protection

Adjustable jamba for accurate installation

Door panes up to 1.2 metres wide

PAS 24 tested and Document Q compliant

Permatex textured finish option

Ultra-smooth to operate

Weather tested to BS6775 Part 1

Up to 3m height

Higher energy efficiency

Triple glazing option

Dual colour option

Permaglide Bi-fold Doors are designed for easy living. Slimline aluminium frames up to 3 metres high create an expanse of glass that's versatile and simple to use.

Clever engineering ensures the doors glide open and smoothly fold back to provide a wide opening to connect the inside to the outdoors. Permaglide Bi-fold Doors are also very practical for everyday use.

Every conceivable configuration of door panel opening is available and there's a choice of thresholds. Security is taken care of with shoot bolt locking and single point handles.

## Popular configurations

### Permaseal Protected Low Threshold

Unique Permaseal low threshold features an extra weather-rated seal on the outside of the door.

This provides superior protection from the wind and rain.

### Adjustable Jamb

Because walls aren't always straight, Permaglide door frames are fully adjustable on site. So the doors fit right first time and work perfectly.
