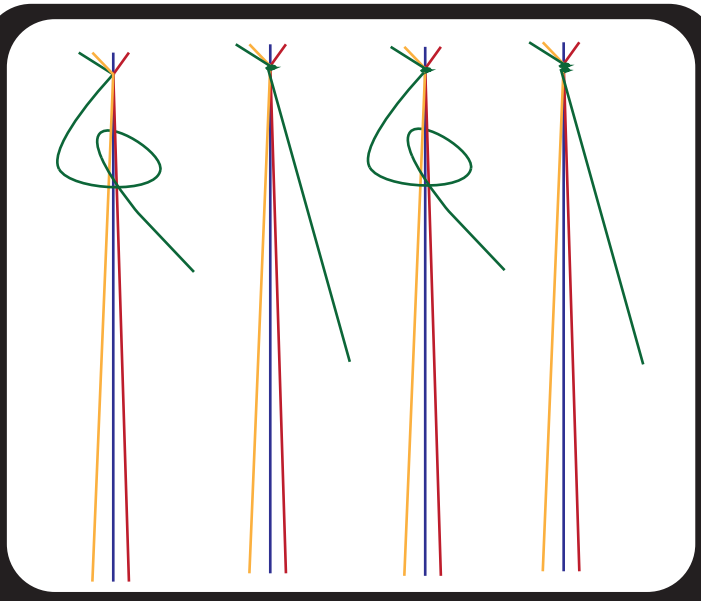
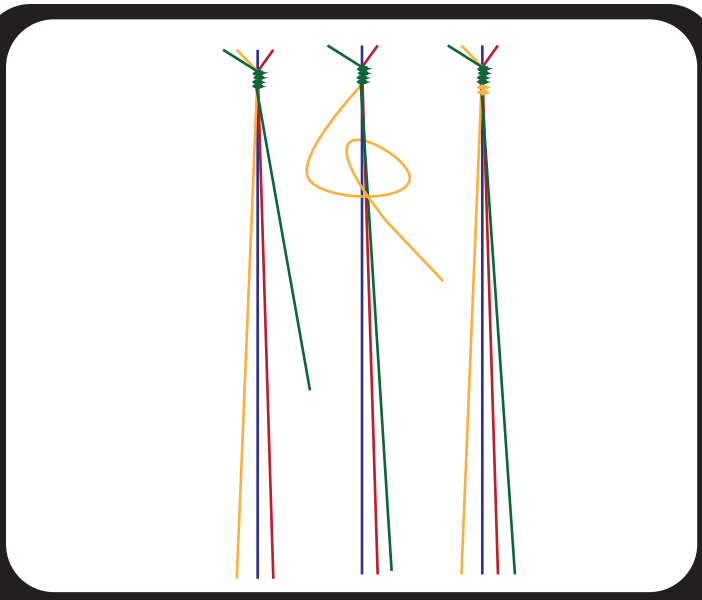
Make a Simple Friendship Bracelet

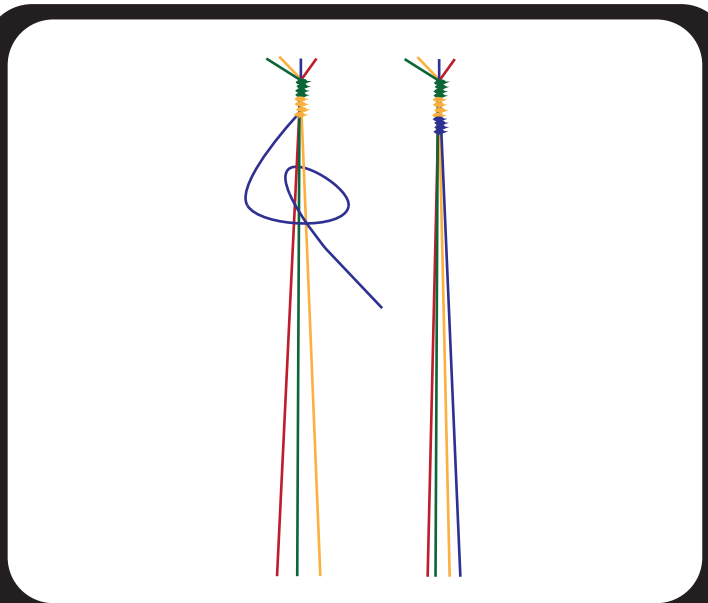
Start with 4-6 pieces of string (embroidery thread words well). The more strings, the thicker your bracelet will be. We like to use different colors so we can make a pattern. Tie the strings together at the top.



STEP 1: Start with the string on the left. Wrap it over the other strings and bring the end under the strings and up through the loop. Pull the string tight to create a knot just beneath the main knot. Repeat until you want to change the color of the knots.



STEP 2: Once you've finished with your first color, place that string to the far right. Repeat step 1 with the string to the far left . Continue until you want to change the color of the knots



STEP 3: Repeat steps 1 & 2 with the remaining strings to create a cool color pattern. Continue with this pattern until your bracelet reaches the desired length.

STEP 4: Tie your bracelet around a friend or loved one's wrist and watch them smile! Every time your friend or family member looks at the bracelet, he or she will remember how much you care.
