

LIFTING SYSTEMS

PSA LIFTMX CLUTCH

THE PERFECT SYNERGY BETWEEN STRENGTH, SAFETY AND PERFORMANCE

Suitable for commercial, residential and civil applications, PSA LiftMX is engineered for strength, versatility and easy use, from factory to site. Its cutting-edge design reduces visual cracking and spalling and maximises smooth engagement and manoeuvring.

KEY FEATURES / BENEFITS

- One clutch for the entire PSA LiftMX range
- Structural components are batch coded with clutches uniquely identified
- Clutch allows for secure engagement and smooth manoeuvring
- Maximum capacity 10T WLL
- Compliant with WorkSafe New Zealand Good Practice Guide: Safe Work with Precast Concrete 2018 ("NZGPG").

PSA LiftMX lifters are compatible with PSA LiftMX Clutch and PSA LiftMX Void Former only. Substitution with any alternative components or products other than the designated PSA range is not permitted.
