FOR THREE AND NINE MONTHS ENDED APRIL 30, 2021

1.6 LIQUIDITY

Historically, the Company's primary source of funding has been the issuance of equity securities for cash through private placements to sophisticated investors and institutions. The Company is assessing mineral properties with a goal to acquire and explore mineral property interests. The Company's continuing operations entirely depends upon the ability of the Company to obtain the necessary financing to complete any exploration and development of its projects, the existence of economically recoverable mineral reserves at its projects, the ability of the Company to obtain the necessary permits to explore or mine, the future profitable production of any mine and the proceeds from the disposition of its mineral property interests.

At April 30, 2021, the Company had an accumulated deficit of \$27,606,465 and has a working capital of \$198,988.

The Company believes that its liquid assets at April 30, 2021, are sufficient to meet its known obligations. The Company is actively managing its cash reserves, and curtailing activities as necessary in order to ensure its ability to meet payments as they come due.

Additional debt or equity financing will be required to fund exploration or development programs. However, there can be no assurance that the Company will continue to obtain additional financial resources or that it will be able to achieve positive cash flows.

Financial market conditions for junior exploration companies have resulted in very depressed equity prices. A further and continued deterioration in market conditions will increase the cost of obtaining capital and significantly limit the availability of funds to the Company in the future. Accordingly, management is actively monitoring the effects of the current economic and financing conditions on the Company's business and reviewing discretionary spending, capital projects and operating expenditures, and implementing cash and cash management strategies.

The Company does not have any material capital lease obligations, purchase obligations or any other long-term obligations.

1.7 CAPITAL RESOURCES

The Company had no material commitments for capital expenditures as at April 30, 2021.

The Company has no lines of credit or other sources of financing which have been arranged but are as of yet unused.

At April 30, 2021, there were no externally imposed capital requirements to which the Company is subject and with which the Company has not complied.

1.8 OFF-BALANCE SHEET ARRANGEMENTS

None.

1.9 TRANSACTIONS WITH RELATED PARTIES

Key Management Personnel

The required disclosure for the remuneration of the Company's key management personnel is provided in note 7(a) of the accompanying unaudited condensed interim consolidated financial statements for the period ended April 30, 2021 and 2020. These are also available at www.sedar.com.

Hunter Dickinson Inc.

Hunter Dickinson Inc. ("HDI") and its wholly-owned subsidiary Hunter Dickinson Services Inc. ("HDSI") are private companies established by a group of mining professionals. HDSI provides services under contracts for a number of mineral exploration and development companies, and also to companies that are outside of the mining and mineral development space. The Company acquires services from a number of related and arms-length contractors, and it is at the Company's discretion that HDSI provides certain contract services.

The Company's Chief Executive Officer, President, Chairman, Former Chief Financial Officer, and Corporate Secretary are employees of HDSI and work for the Company under an employee secondment arrangement between the Company and HDSI.

Pursuant to an agreement dated June 1, 2008, HDSI provides certain cost effective technical, geological, corporate communications, regulatory compliance, and administrative and management services to the Company, on a non-exclusive basis as needed and as requested by the Company. As a result of this relationship, the Company has ready access to a range of diverse and specialized expertise on a regular basis, without having to engage or hire full-time employees or experts. The Company benefits from the economies of scale created by HDSI which itself serves several clients both mining and non-mining clients.

The Company is not obligated to acquire any minimum amount of services from HDSI. The monetary amount of the services received from HDSI in a given period of time is a function of annually set and agreed charge-out rates for and the time spent by each HDSI employee engaged by the Company.

HDSI also incurs third-party costs on behalf of the Company. Third party costs are billed at cost, without markup.

There are no ongoing contractual or other commitments resulting from the Company's transactions with HDSI, other than the payment for services already rendered and billed. The agreement may be terminated upon 60 days' notice by either the Company or HDSI.

The details of transactions with HDSI and the balance due to HDSI as a result of such transactions are provided in the Financial Statements.

1.15.3 INTERNAL CONTROLS OVER FINANCIAL REPORTING PROCEDURES

The Company's management, including the Chief Executive Officer and the Chief Financial Officer, is responsible for establishing and maintaining adequate internal control over financial reporting. Under the supervision of the Chief Executive Officer and Chief Financial Officer, the Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Company's internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

There has been no change in the design of the Company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting as of April 30, 2021.

1.15.4 DISCLOSURE CONTROLS AND PROCEDURES

The Company has disclosure controls and procedures in place to provide reasonable assurance that any information required to be disclosed by the Company under securities legislation is recorded, processed, summarized and reported within the appropriate time periods; and required information is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, so that decisions can be made about the timely disclosure of that information.

1.15.5 LIMITATIONS OF CONTROLS AND PROCEDURES

The Company's management, including its Chief Executive Officer and Chief Financial Officer, believe that any system of disclosure controls and procedures or internal control over financial reporting, no

QUARTZ MOUNTAIN RESOURCES LTD.
MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THREE AND NINE MONTHS ENDED APRIL 30, 2021

matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Furthermore, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty and breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of controls. The design of any system of controls is also based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

1.16 RISK FACTORS

Please refer to "Risk Factors" discussed in the Company's MD&A for the year ended July 31, 2020 filed under the Company's profile on SEDAR at www.sedar.com.
