Network

Through our parent company Rieckermann, Packsquare has access to an extensive network of suppliers

Save Time + Money

We save you cost and time in the identification and procurement process of packaging products

Innovative and Sustainable

Through us you can get the most innovative and sustainable packaging

Individual Inquiries

Individual requests: Tell us what you need and we will deliver it.

SUSTAINABILITY IS A PROMISE

At Packsquare, we understand the important aspects of true sustainability and have sought out sustainable manufacturers around the world who offer packaging solutions that support the circular economy

We can offer a wide variety of sustainable products, giving our customers the opportunity to make their packaging **100% recyclable** and thus being a pioneer for the future.

In addition, we are offering the possibility to participate in partner compensation programs in order to compensate for the CO2 emissions caused with the procurement of packaging.

(EVOH content < 5%)

OUR GUARANTEED QUALITY

With our own local offices all over the world, we are able to qualify and check our manufacturers on site in order to provide our customers with the best quality.

ISO: 9001:2015

A quality management system that pursues the goals of improved internal communication and the promotion of understanding and controlling of processes.

BRCGS; FSSC 22000; GMP

Quality and management systems that guarantee food safety in processing and in the associated processes. These certificates are primarily used by food packaging companies and manufacturers.

Workplace Condition Assessment

Focuses on the assessment of workplace conditions. There is a strong emphasis on transparency and on restructuring workplace conditions to be in line with industry best practices.

Made for Recycling by Interseroh (Sustainability seal)

"Made for Recycling" - packaging with this seal has been proven to have good or even very good recyclability. Interseroh analyses the recyclability of packaging using an independent, scientific assessment method.

YOUR PACKAGING CONSULTANT

”

Packaging is one of the most important purchasing decisions in the point of sale. Not only the design, but also other parameters such as sustainability play an increasingly essential role nowadays. Furthermore, an efficient and cost-effective purchasing becomes more important than ever. To make the most of this opportunity for your product, I work in consulting and sales at Packsquare.
