DECOMMISSIONING

SERVICES TO THE OIL AND GAS SECTOR. TWO DECADES OF EXPERIENCE IN DISMANTLING OILFIELD STRUCTURES AND SUBSEA INFRASTRUCTURE.

MAXIMISING REUSE AND RECYCLING, MINIMISING DISPOSAL

John Lawrie Group has been successfully carrying out decommissioning projects involving the dismantling of large oilfield structures and subsea infrastructure for more than two decades. Our primary objective is to maximise reuse and recycling and minimise disposal. To this end, our processing methods result in high recovery and recycling rates for a wide range of materials, in many cases up to 100%.

It's all about sustainability and, with legislation growing progressively tighter along with the increasing development of zero waste strategies, the need for a smarter approach to decommissioning is unequivocal.

EXPERTISE, EXPERIENCE AND CONTINUOUS INNOVATION

Decommissioning represents a significant opportunity as well as a challenge for the UK offshore oil and gas industry.

Whether working directly with Operators, Tier 1 Contractors or other waste management companies, John Lawrie Decom's expertise and experience in the onshore downsizing, deconstruction, processing, reuse and recycling of a wide range of subsea materials enables us to provide a single integrated package for clients. This includes excellent working relationships with Port operators and a subsequent ability to collect and/or receive redundant materials from a variety of onshore geographic locations throughout the UK to accommodate specific client requirements.

With sustainability in mind, John Lawrie Decom has progressively developed its expertise in the dismantling, processing, recycling and disposal of a range of redundant subsea materials including flexible flowlines, umbilicals, manifolds, christmas trees, mid-water buoys, mooring systems, wellheads and protection structures, concrete mattresses and other associated items.

With current strategically located licensed facilities in Aberdeen, Shetland, Evanton and Montrose, and the addition of our new quayside facility in Dundee opening in 2020 bringing our combined annual licensed tonnage to 360,000 tonnes, John Lawrie Decom is your decommissioning partner of choice.

OUR DECOMMISSIONING CAPABILITIES:

 <p>Onshore decommissioning service</p>	 <p>Piece small to medium items</p>	 <p>Access to quayside dismantling facilities</p>
 <p>Size reduction service at quayside</p>	 <p>Excellent track record</p>	 <p>Reuse & recycling specialists</p>
 <p>Recycling subsea infrastructure</p>	 <p>Licensed waste treatment facilities throughout Scotland</p>	 <p>Skilled & mobile workforce</p>
 <p>In-house HSEQ support service</p>	 <p>Documented safety management system OHSAS 18001:2007</p>	 <p>Accredited ISO 14001 & 9001 management systems</p>

Provision of specialist trucks, lifting and cutting equipment and a fully mobile, well-trained workforce as well as a highly innovative approach to project management and logistics means decisions are made quickly and jobs expedited efficiently. Our in-house HSE function includes method statements/risk assessments, training & competences.

We have a long established and experienced hands-on management team in place and a proven track record in managing, handling and processing a large number of decommissioning projects.
