
m o d a loader

OVERVIEW

ModaLoader

High-speed contactless
product loader

m o d a loader

ADVANTAGES

- Capacity of 15-20 packs per minute
- Pack a wide range of product and bag sizes down a single or dual lane
- Tool-less finger conveyor adjustment allows for a wide range of bag widths
- Designed to USDA Hygiene standards
- Compressed air auto-inflation reduces seal contamination
- Optional secure connectivity for remote support and data integration
- Allen Bradley / Rockwell Automation controls including 3 servos for precise motion control
- Reduce cut handling and seal contamination, improving hygiene and reducing leaker rates
- Self-contained unit, designed to replace manual loading forks and hydraulic stuffers
- Fully enclosed for safety, reliability and performance
- Reduce operator R.S.I and potential for dropped product

TECHNICAL DATA

- **Compact dimensions:**
1300mm (51in) Wide
3065mm (120in) Long
1600mm (44in) High
- **Electrical:**
480v three-phase
- **Air:**
Compressed air 6 bar
- **Weight:**
650kg (1425lb) approx
- External HMI (human machine interface) 7 inch Allen Bradley touch screen mounted to suit in left or right hand configuration
- Allen Bradley / Rockwell Automation controls
- Non-mechanical touch buttons on control panel IP69k
- Product sensing with IP67 fibre optics
- Emergency stop switch IP69k
- T304 stainless Moda design
