To whom it may concern,

In the past I have had many problems with maintaining my facilities lights but about 4 years ago I was referred AC technology which does not use a driver or ballast. This means a product does not need to be maintained for the next 13 years. It was difficult to believe based on my experience with lights but to my amazement it turned out to be true. I haven't had any problems with the lights so far for 4 years.

ACDOB services us with periodic inspections. During the warranty period they come to visit property periodically and they give us a report. They are the next generation of LED technology. If you need any information, feel free to call me, I am happy to share my experience with new users.

Sincerely,

Gerry Zambrana

Bank Security Officer | Facilities Engineer
