

JOB DESCRIPTION | Drone Pilot

[Quidich Innovation Labs](#) is a global company headquartered in Mumbai, India that pioneers in customized technology solutions for Sports Broadcast. From the outset, we have believed in the power of the story that sport tells as a tool to bring people together; and that this story best reaches fans, through the way it is broadcast. Building on this thinking, we have created various technology tools over the past five years and deployed them at tournaments such as the Indian Premier League, ICC Men's T20 World Cup, ICC Women's World Cup and Men's FIH Hockey World Cup, to name a few.

ROLE

A Drone Pilot at Quidich is deployed on some of the most exciting projects happening in the world, be it film or broadcast. Some of the main responsibilities include:

- Developing and sustaining a high level of competence in piloting the Quidich fleet of drones and executing projects with minimum supervision.
- Piloting the drone on projects in a way that adheres to the company's policies on safety and privacy, while ensuring delivery of quality exceeds client expectations.
- Liaisoning with the DOP and Director to devise shots and framing, ensuring that the drone is optimally utilised to provide the best output.
- Taking care of equipment in your custody to ensure it remains fully functional and in prime operating conditions at all times.
- Ensuring that there is no material loss to the company resulting from missing/misplaced hardware when out on projects.
- Scheduling and undertaking routine maintenance of equipment assigned to you and ensuring it is in prime operating conditions at all times.
- Carrying out minor repairs on site to ensure successful delivery on each and every project.
- Contributing to improving the Standard Operating Procedure for operations and maintenance of the drone in different use-cases.
- Upholding the values and culture of the company while on projects and otherwise.
- Adhering to all operations processes on a timely basis and suggesting improvements to the same.

Qualification, Skills and Competencies

- Past experience in operating the Inspire 2
- Have a minimum of 2 years flying experience
- Have basic knowledge in the fields of engineering of remotely piloted systems, safe handling and operations with industry standard practices

www.quidich.com

- Preferably have past experience of flying UAV's in film or broadcast
- Have sufficient knowledge of the UAV system for on field troubleshooting
- Have the ability to manage high pressure situations
- Be a team player
- Have a creative bent of mind and be a quick learner

While the company is headquartered in Mumbai, projects will take you all around the country/globe.
