

# DEEP LEARNING SPECIALIST (W/M/X)

## LOCATION

Salzburg, Austria

## HOURS

Full-time

## SALARY

between € 3.000 and € 3.800 (x14)

## WHO WE ARE

We are **AMRAX** and combine **AI&VR** to build the future. We create virtual experiences for real estate using **artificial intelligence**. Our mission is to give every person access to **all available assets** at any time.

## ABOUT THE JOB

You reinforce our brand-new **computer vision team**, responsible for creating pioneering **customer experiences**. Your main responsibility is to **design and develop computer vision applications**, and to collaborate with the team working on different product components. Therefore, a commitment to collaborative problem solving, sophisticated design, and quality products is essential. You want to enjoy **flexible working hours**, a unique **corporate culture with attractive benefits**, and exciting **training opportunities**?

## ABOUT YOU

### You are interested in ...

- 3D reconstruction using machine learning
- delving deep into cutting edge Deep Learning Methods
- high code quality, best feasible performance and automatization

### You provide comprehensive knowledge of ...

- a strong background in computer vision & image processing
- a strong understanding of object-oriented programming
- an understanding of design principles behind a performance-oriented application

### You're experienced with ...

- OpenCV, with a good knowledge of its feature set
- Python/C++/C#, code versioning tools, such as Git
- automated testing platforms and unit tests (advantageously)
- data from sensors, e.g. Lidar (advantageously)

### You have ...

- a master degree in computer vision or equivalent education
- 3+ years of professional experience in computer vision
- respect towards colleagues and clients
- high affinity to emerging technologies
