

Protecting privacy

GDPR compliance

Ubiqisense is committed to complying with the GDPR and national laws across all the services that we provide. Our sensor solution does not collect nor process any personal data that can be used to identify a specific person.

We collect occupancy and movement data when a person enters or leaves a room in which sensors are installed. When a person leaves a room, and re-enters the room, we are not able to identify that it is the same person.

We collect the following data types:

- Location data (coordinates, where in a room people are present)
- Occupancy count (number of people)
- Timestamp
- Posture (sitting, standing)

As we do not collect any identifiable personal data, we do not believe that our solution is subject to GDPR.
