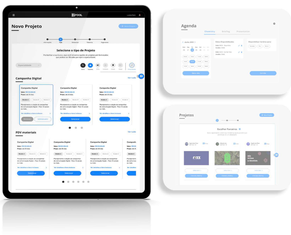
How to boost your business by being part of BPool

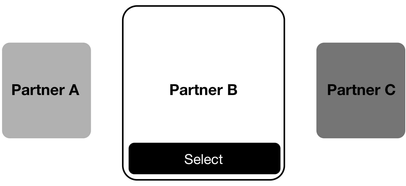
Get connected with national and global brands through a matching algorithm that selects projects based on their specialty.



Check out the steps:

1.Client selects the required type of service.

2. Our algorithm identifies the 3 best partners for the project and sends an invitation containing the demand's information.

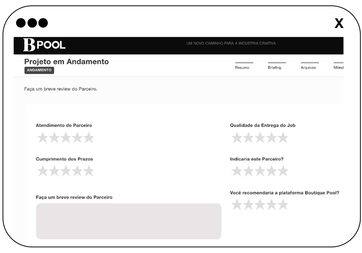


3. The 3 partners are presented to the client, who chooses the most liked one based on their credentials.

More about the partner

4. Client and partner connect to confirm briefing, scope, and KPIs before starting the project.

5. After the project is delivered, a mutual evaluation process takes place to increase the quality and accuracy of the matching process.



6. BPool conducts training sessions and oversees the project's success.
