

Steam Plant Operator I - (Temporary) Three (3) Positions

Company Name:	Heartland Generation Ltd.
Location:	Forestburg, AB
Posting Number:	HG192

Why work at Heartland Generation Ltd?

The Heartland Generation team is always looking for power players who share our values and can contribute to the spirit of a forward thinking, proactive, agile and professional team that puts customers first.

As we shape the Heartland Generation story, we embrace our roots and are inspired to create a dynamic, fresh company. We're building our foundation of operational excellence and defining our unique place within Canada's energy markets.

As a group of passionate team members, we provide safe, reliable and affordable energy to our customers. With integrity, agility and a deep dedication to building trust, we're here to power and empower the lives of our team, our customers and the communities where we live and work. If you're looking for a career with purpose, join our team.

How do you fit in?

Employees assist with the safe operation of the plant including checking the operation, performance and condition of plant equipment and processes including assigned maintenance and cleanup duties.

What you'll be doing:

- Performing inspection trips throughout the plant to ensure safe and efficient operation by conducting routine equipment checks (daily, weekly and monthly) as required and include checking oil levels, temperature on bearing and gear cases of plant equipment
- Performing routine checks of the coal and ash handling systems and ensure the ash collection and removal systems are monitored and operated to maintain normal ash levels performing cleaning duties as required or assigned
- Conducting boiler water tests reporting abnormal values and re-test after corrective action have been taken and ensure all values and actions are recorded on the daily log sheets
- Monitoring process conditions and equipment to ensure compliance with station approvals and report/document any violations to senior staff
- Isolating equipment and assisting with the preparation of permits, identifying hazards, completing/documenting hazard assessment for activities undertaken
- Performing minor maintenance duties as assigned and working with the maintenance department as required
- Adhering to safe work practices and supporting/participating in the emergency response activities at the station

- Providing support and assistance to new/junior operators

All duties and responsibilities will be performed in accordance with established health, safety and environmental principles, corporate policies, practices and procedures and applicable government legislation.

What you must have:

- Completion of Grade XII, including a pass standing in Math 20, Physics 20 (preference toward Physics 30), English 30 and another 30-level course with two (2) years of related experience **OR** completion of one year of a two-year Power Engineering Technology Program with six (6) months of related experience
- A valid 4th Class Power Engineer's Certificate of Competency
- Must have a valid Alberta operator's license (minimum class 5)

Where you'll be working:

This position is located in our Battle River Generating Station in Forestburg, Alberta.

Ready to join our team?

Please submit your resume in confidence to our Human Resources team by emailing Careers@heartlandgeneration.com.

This position requires the satisfactory completion of background and education verification checks and pre-employment alcohol and drug screening.

We appreciate your interest in working with us, but only those applicants selected for interviews will be contacted.

This position is administered under the CEWA Job Posting provisions
