Apps for Epilepsy

HealthUnlocked [WEBSITE](#)

HealthUnlocked is a health-based social network. With more than 600 communities, HealthUnlocked matches you with other people that are interested in similar health-related topics or are in the same health situation.

Seizure Tracker [WEBSITE](#)

Seizure Tracker is quick and easy to set up on your smartphone and can be used immediately after download. The app is designed to help you to manage epilepsy by logging seizures and keeping records of their length, type, potential triggers, and a description of associated symptoms.

Seizure First Aid [WEBSITE](#)

The First Aid icon on the dashboard gives you the four vital steps you need to follow if you encounter someone having a seizure. You can also record the duration of the seizure with the Timer icon.

Snug Safety [WEBSITE](#)

Snug Safety is a daily check-in service that provides peace of mind for individuals that live alone. Snug Safety checks in with you every day, and if they do not receive a response from you, they will notify your emergency contacts and send for help.

ICE Medical Standard [WEBSITE](#)

ICE Medical Standard allows you to share key emergency information with a first responder on your phone's lock screen. You can add the phone numbers of your emergency contacts, information about any medication that you take, any medical conditions that you have, and other essential information that could save vital time in an emergency situation.

Epilepsy Journal [WEBSITE](#)

Epilepsy Journal is an app designed primarily for logging your seizures as they happen. You can also log rescue medication, possible triggers, the activity you were doing at the time of the seizure, and your location. From these entries, you can generate reports, view trends, and even email your doctor.

myChildren's [WEBSITE](#)

myChildren's is an app from the Nationwide Children's Hospital that allows parents to track and manage their child's healthcare needs. Although the app allows for tracking a wide range of healthcare needs, such as regular medication, it has a specialized built-in epilepsy toolkit.

Epilepsy Health Storylines [WEBSITE](#)

Epilepsy Health Storylines is an app designed to be "more than just a seizure tracker." The app provides a variety of tools aimed at helping you to manage your condition. Its comprehensive feature set includes recording symptoms, seizures, moods, and setting reminders for taking medication.

SeizAlarm [WEBSITE](#)

SeizAlarm is an app for people with epilepsy and other seizure-related disorders to alert their emergency contacts manually if they think that they will need help soon, or automatically if a seizure-like motion is detected by an iPhone or Apple Watch.
