Skye Series

Minimized Body, Maximized Discretion

CCELL®

Minimized Body, Maximized Discretion

Formerly known as TH001, Skye I gained its popularity as a simplistic lightweight and highly customizable disposable. Continuing the legacy, Skye series now introduces a new generation – Skye II.

Skye II is available in a larger 1ml option and features a visible oil view window that allows instant glance of the remaining material. To keep up with the increased tank volume, Skye II comes with a micro-USB rechargeable port, fully ridding the worries of having an exhausted battery with unfinished oil.

What remains classic is the sleek, ultra-compact body that makes storage and transport ideal for both you and your customers. Look no further than Skye series if you're looking for a simple and discreet disposable.
