

*This vision document is designed within a set of definitions, assumptions, and mental models outlined below. Collectively, these principles act as the foundation upon which this vision is built.*

1. All of the solution areas (i.e. Absence & Time) that make up the **Insight Platform** are collectively treated as a single application.
2. This vision references four apps that Frontline may offer: **K12Jobspot**, **Jobulator**, **WeLearn**, and the **Insights Platform**.
  - “WeLearn” is a placeholder name for a possible B2C version of the PG Resource Library similar to *Pluralsight* or *Udemy*
3. A user may be granted access to one or more **Instances** of the Insights Platform.
  - Each instance represents a single Frontline client (purchaser) of the Insights Platform.
  - Each instance is treated as a separate app. For example, a user who is granted access to both *Hidden Valley School District* and *Kelly Services* are able to “switch” between the two instances as different apps.
  - Each instance consists of one top-level **organization** (usually the client’s name) and configurable levels of **sub-organizations** that are administered by the client. User access can be limited to one, many, or all levels of the organizational hierarchy. This allows the client to model their organizational hierarchy as desired (i.e. organizing by location, department, or both).
4. There are four proposed **Global** features that exist outside the context of any single app or organization. These are:
  - **User Account Creation & Management:** Ability to create, manage, and delete one or more **User Accounts**
  - **User Profile Management:** Ability to manage the **User Profile** associated with your account
  - **Global App Notifications Indicator:** Be informed of pending notifications from one or more apps while inside a different app.
  - **Fast Account Switching:** Ability to quickly sign out of one account and sign in to another with secure but minimal effort.
  - All other features are considered **In-App** and limited to the scope of each app individually.

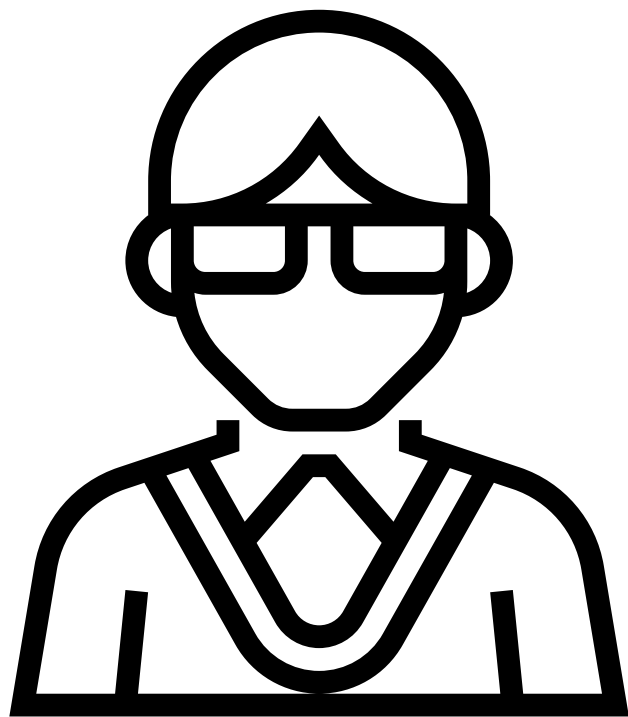

All of our Insights Platform solutions are collectively treated as **one app**

This vision references four potential “apps”  
**Insights Platform**, **K12Jobspot**, a B2C version of the PG Resource Library called **WeLearn**, and **Jobulator**

# Introduction (cont'd.)

This is **Jane**.

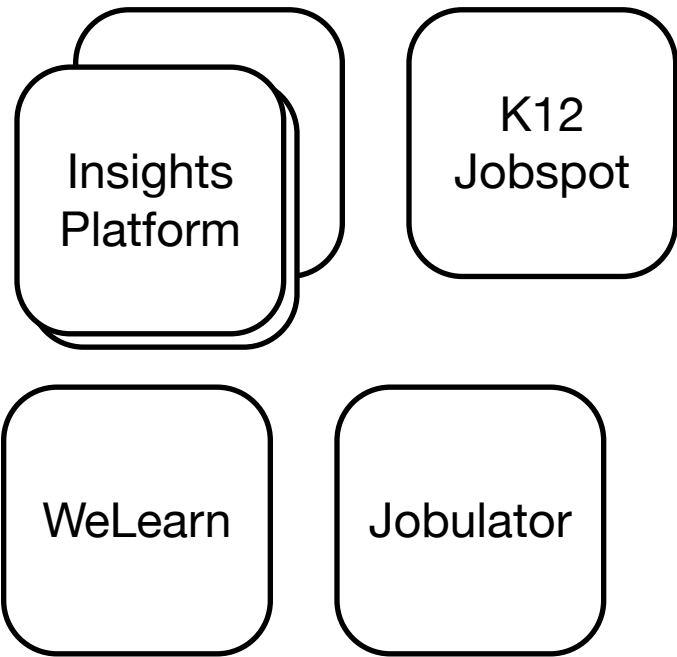

**Jane Doe**  
janedoe@gmail.com

**Janet Doe**  
jdoe@hiddenvalleysd.edu

Jane can have one or more **Frontline ID** accounts.

Jane creates an account when she signs up for at least one of Frontline’s **four apps**.
