# Welcome to Caption AI - Version A - 2.0

Congratulations! Your Butterfly iQ+ has been enabled with Caption AI.
Caption AI is the first AI-driven guidance software for conducting cardiac ultrasounds.
Caption AI provides real-time onscreen prompts to guide clinicians of any skill level to capture diagnostic-quality echocardiograms - and now Caption AI is available on your Butterfly iQ+.

Caption Health is constantly working to build new capabilities and algorithms, refine features, and make Caption AI easier to use and integrate into your workflow.

In this release:

In addition to creating scanning protocols based on workflows, Caption AI now supports creation of indiciation based scanning protocols.

• **Workflow-based protocols** are based on the particular views you want to acquire. The default workflow protocol provided with Caption AI is All Views.

• **Indication-based protocols** are based on the patient's symptoms, such as shortness of breath.

Version History

Version	Description	Date
v A-1.0	Initial release	02/22
v A-2.0	Indication-based protocols	04/22
