WeighPay

A Business Management Platform for the **Recycling Industry**

A Single Business Management Platform Built For The Recycling Industry

From **scale to sale**, WeighPay gives Bottle Recycling Facilities a 360 degree view of their performance in real time. We have built a suite of modules that are aligned specifically to the needs of the industry and give you the opportunity to simplify your software ecosystem.

Customer & Supplier Management

Whether you are buying or selling, WeighPay helps you to capture detailed information about individuals and businesses including basic details, contact information, identification, physical attribute descriptions, custom pricing agreements and known vehicle details.

Inventory & Yard Operations

WeighPay helps to manage all operational aspects of your yard including inventory, regrading, packing and shipments. WeighPay gives users the ability to manage the transactions and tasks that relate to incoming and outbound inventory, as well as the various processes inventory items may go through while they are in your yard.

Ticket Management

WeighPay ERP is a ticket management system for scrap yards, waste management facilities and recycling depots. It integrates seamlessly with your existing equipment to produce accurate weights and tickets. It provides your staff with the software they need to manage the day-to-day operations of their facility while also giving you peace of mind that all transactions are being handled appropriately.

Point of Purchase

Automate your Point of Purchase with WeighPay's unique features and hardware integrations. Streamline the process and reduce the amount of time it takes to process inbound orders and retail buy tickets.

Compliance

Manage all aspects of compliance by integrating your hardware technology to WeighPay. Our solution connects to a wide range of hardware including truck scale cameras, customer image capture points, fingerprint scanners, document scanners and license plate scanners. Our customizable rules engine allows you to ensure that the right images are captured at the point of purchase and that these images can be used in all state based compliance reporting.

Integrated Accounting

Simple accounting features to help users gain visibility over their AP and AR Tickets. Our cloud-based platform makes it easy to manage simple financials in one place and keep track of everything from inventory to invoices.

Simplified
Ticket Management

WeighPay ERP is a ticket management system for scrap yards, waste management facilities and recycling facilities. It integrates seamlessly with your existing equipment to produce accurate weights and tickets. It provides your staff with the software they need to manage the day-to-day operations of their recycling facilities while also giving you peace of mind that all transactions are being handled appropriately.

Key Features

Buy Tickets

Create retail buy tickets on either WeighPay Mobile or WeighPay Pro. Capture all images and automatically upload to the ticket. Choose items being purchased, collect gross weight and tare weight and calculate value based on market rates or manual rate entry.

Truck Scale Tickets

Create truck scale tickets and manage the process of capturing images of the vehicle pre and post being loaded. Store images against the ticket and process items ready for dispatch.

Email Tickets to Customer

Automatically email electronic copies of tickets to customers once a ticket has been closed.

Sell Tickets

Create sell tickets on either WeighPay Mobile or WeighPay Pro. Capture all images and automatically upload to the ticket. Choose items being sold, collect gross weight and tare weight and calculate value based on market rates, manual rate entry or a related price sheet.

Quick Select Favourite or Most Recent Products

Quick select a customer or suppliers most frequently or most recently purchased products for quick data entry.

Save Time and Increase Your Accuracy at Your Truck Scale

Truck scale ticket creator that will save you time and reduce the risk of errors in calculating weight.
