Fostering disruptive technologies and solutions for women’s health
In order to give more visibility to FemTech and to accelerate innovation, Groupe Mutuel, one of the leaders in health insurance in Switzerland, has joined forces with the best innovation hub in Switzerland, the EPFL Innovation Park.

Together, we want to attract and promote the best solutions in FemTech and give them an opportunity to test their market, finance themselves, or better, co-create together.

More than any other healthcare domain, FemTech innovations must be supported to foster more effective prevention and treatments for women’s health.

It is a cause, and we would like you to join us.

Lan Zuo Gillet, EPFL Innovation Park

Partners 26
Releasing the power and wellbeing of half the planet's population

Women have been historically underserved in healthcare, as modern medicine has been built on a one-size-fits-all approach that considered men as the main parameter for health-related solutions. Having being excluded from clinical trials for so long, women have to deal with many unresolved health issues, as well as with the consequences of inadapted treatments to this day.

Yet, many studies show that because of their longer life expectancy and their tendency to seek out more preventive care, women actually spend more than men on their healthcare. On the other hand, more and more corporates are aware of the importance of the well being of their growing percentage of female work force throughout their biological life cycles.

As an established Health insurance company determined to improve health condition of 50% of the population, Group Mutuel launched this FemTech initiative together with EPFL Innovation Park, to further foster innovation in this sector and help start-ups offering disruptive FemTech solutions to go to market and accelerate their growth.
FemTech on the rise

FemTech (or female technology) is a term applied to an emerging industry that includes a broad range of technologies dedicated to the improvement of women’s health and wellbeing. This sector includes solutions in many areas, including fertility & pregnancy, women’s sexual wellness, women’s medicine, female oncology, period health, menopause and mental health.

With the rapid rise and early successes of start-ups dedicated to women’s health, FemTech is becoming a hot topic and a promising asset class for investors. In 2019, the global FemTech market generated $820.6 million, with a market value estimated to be worth $50 billion by 2025 (Frost & Sullivan).
Tech4Eva
The first Swiss Accelerator Global Program in the field of FemTech

Tech4Eva is an equity-free virtual accelerator program on a mission to create an international and inclusive innovation community, where disruptive start-ups and projects from around the globe develop innovative solutions for improving or advancing technologies relating to women’s health and achieving respective growth.

The vision of the organization is to build a global FemTech community by connecting all stakeholders in different markets active in the sector.
Tech4Eva
What we are looking for

Areas of Focus:
- Pregnancy and Post-Partum
- Wellness
- Period Health
- Fertility & Infertility
- Menopause
- Mental Health
- Family Life
- Prevention
- Treatment
- Care
- Oncology

Technology Solutions
- Application Software
- Apps B2C Information platforms
- Therapeutics/Wearable devices
- IoT Preventive medicine
- Diagnostics
- Monitoring equipment
- AI services
- Consumer non-durables
- Personal products
- Outcome management and InsurTech

Maturity
The program Tech4Eva is open to start-ups and innovative projects from Switzerland, Europe and around the globe. We will accept both early and late stage companies. Ideally you are working on your go-to-market strategy and/or are considering fundraising.
# 2022 Tentative Program

Through the community that the program aims to build, Tech4Eva supports the growth of the start-ups in the program and the development of ideas from innovators with: community events including roadshows, monthly peer-to-peer sessions for growth-stage start-ups, 6+ training sessions for early-stage start-ups, 6+ start-up workshops, and recurring mentor meetings.

110 applications for the 2021 program

A diverse community

We encourage women to launch their ideas

Only a small percentage of global start-ups are led by female founders. Our application process counts more than 65% of start-ups and early-stage projects founded or co-founded by women.
A medical device for non-invasive analysis of embryos in assisted reproduction cycles. It will help doctors choose the most viable embryo to obtain a pregnancy.

If you are in femtech, Tech4Eva is for you. From great experts giving very relevant advice to other founders in your same boat, it’s just a great program.

At ASPIVIX, we innovate women’s care as we believe it’s about hefty time for gentler and more modern gynaecology! We create a new generation of medical instruments, eliminating pain and bleeding, for millions of women every year. CAREVIX is a single-use medical instrument designed to replace the traumatic tenaculum which is nowadays a standard of care in millions of gynaecological procedures. CAREVIX allows gentle handling of cervix for all procedures requiring an access to the uterus in gynaecology.
Carbomed Medical Solutions is an Austrian female empowerment tech start-up upon a mission to break the taboo which surrounds speaking out about trying to conceive and cycle tracking. breathe ilo is the world’s first fertility tracker that uses breath analysis to identify a woman’s ovulation pattern and fertile window in a way that is easy, comfortable and within one minute. It is a small handheld device synced to an app that reads the breath’s CO₂ saturation to determine where a woman is in her cycle with incredible accuracy and can be done at any time of the day.

"Tech4Eva is an exclusive and invested accelerator with a great agenda of helping the Femtech entrepreneurs and companies."

"The program is an excellent opportunity to gain a better understanding of the rapidly expanding Femtech sector."

"We graduated from several accelerators. Tech4Eva was the most focused one, very well organized and implemented. Great experience that we recommend to every entrepreneur in the femhealth field."

“Selected growth-stage start-ups”
Metabolomic Diagnostics is a deep-tech company specialized in the development of novel biomarker-based diagnostic solutions for complex diseases. Metabolomic Diagnostics current focus is on pregnancy health, including laboratory test for screening for Preecclampsia risk early in pregnancy.

www.metabolomicdiagnostics.com

"We loved the Tech4Eva program. Our team particularly appreciated the Roadshows and the selection of mentors. They gave us the extra support we needed and helped us build new connections worldwide to pursue our growth."

"Tech4Eva provided the team at Metabolomic Diagnostics with a great insight into the Femtech ecosystem. It was a pleasure to work with the Tech4Eva team who supported the cohort companies."

Impli improves healthcare and makes patients lives easier with implantable technologies.

www.impli.org
MOMM Diagnostics is developing a fast and precise point of care test for preeclampsia - a dangerous pregnancy condition. Our technology will assist doctors on-site to save the lives of mothers and babies. MOMM Diagnostics’ novel patented point of care technology allows the quantification of low-abundant biomarkers from a single drop of the mother’s blood. MOMM’s rapid preeclampsia test aims at reliable and early-stage molecular diagnosis of PE during doctors’ visits, using low-cost single-use cartridges and a hand-held reader.

A pole of innovation as Tech4Eva's birth house

The EPFL Innovation Park supports disruptive innovations and the transfer of technologies of the prestigious Ecole polytechnique fédérale de Lausanne (EPFL) and other regional academic partners, by providing flexible office space, training, acceleration and coaching services. Building a true sense of community, the Park is devoted to housing start-ups, SMEs, research teams and innovation cells from major companies that operate in fields as diverse as information technology, computing, health and nutrition, engineering, transport, telecommunications or materials.

In constant evolution since it was founded in 1991, EPFL Innovation Park currently houses 14 buildings with access to various laboratories and cutting-edge research, hosting over 150 start-ups, 26 large companies and around 20 services providers. The vibrant campus provides a unique environment to a large network of dynamic entrepreneurs and established companies for exchanging ideas and knowledge.
Groupe Mutuel is Tech4Eva’s main sponsor and is one of the leading personal and health insurance companies in Switzerland: more than 1.3 million private customers and close to 24,000 companies rely on the insurer every day. In addition to compulsory health insurance (LAMal/KVG) and supplemental insurance (LCA/VVG), customers can choose from an extensive range of life insurance plans to cover risks and provide for their individual retirement benefits, as well as from a range of patrimony insurance solutions. Moreover, Groupe Mutuel insurers provide daily allowance insurance to companies, pursuant to LAMal/KVG and LCA/VVG, as well as compulsory accident insurance (LAA/UVG). Groupe Mutuel also manages Groupe Mutuel Prévoyance-GMP pension fund.
FemTech Analytics (FTA) is a strategic analytics agency focused on relatively young yet already treated as the next big market disruptor FemTech market, which embraces the cornerstone subsectors such as Longevity for women, Mental Health & Healthy Lifestyle, Reproductive Health, and General Healthcare. The range of activities includes research and in-depth analysis on major areas of high potential in the FemTech industry, maintaining profiling of companies and governmental agencies based on their innovation potential and business activity, and providing consulting and analytical services to advance the FemTech sector.

Fermata accelerates the development of the FemTech ecosystem and a community that celebrates diversity in society. Create a place for women to share their concerns and issues related to their bodies Curate FemTech products from around the world and provide solutions in Asia.

Ferring Pharmaceuticals is a research-driven, specialty biopharmaceutical group committed to helping people around the world build families and live better lives. Ferring is a leader in reproductive medicine and maternal health, and in specialty areas within gastroenterology and urology.

Joyance Partners is the first venture fund focused on finding and growing new companies that deliver Delightful Moments derived from science. Delightful Moments are part of all human experience: the small, but powerful, separations from the daily humdrum when we feel stronger, calmer, more joyful, more in control, more distant from pain and anxiety.

Women of Wearables (WoW) is a leading global organisation aiming to inspire, connect, and support women and allies in emerging technologies such as wearable tech, IoT, health tech, and everything in between.

Swissnex is Switzerland’s Science and Technology global network connecting Switzerland and the world in education, research and innovation. Swissnex’s mission is to support the outreach and active engagement of our partners in the international exchange of knowledge, ideas and talent. Swissnex is the launchpad for Swiss startups going global. Our equity-free startup programs are customized to the needs of entrepreneurs exploring or entering the UK market, and we co-create programs and provide services to other Swiss innovation partners.
