1. Glossary

Below is a list of terms used in this whitepaper with their respective explanation for a better understanding.

- **ERC20**
  Standard of the smart contract in the Ethereum network.

- **Ethereum**
  Decentralized platform capable of executing smart contracts and applications using blockchain technology.

- **Exchange**
  Platform that mediates the purchase and sale of cryptocoins.

- **KYC (Know Your Customer), AML (Anti Money Laundering)**
  Institutional policies that identify exchange users in order to combat money laundering and the financing of terrorism

- **Smart Contract**
  A computer protocol intended to digitally facilitate, verify, and enforce the negotiation or performance of a contract.

- **Token**
  A virtual asset that exists natively on a blockchain (e.g., ERC-20 tokens exist natively on the Ethereum blockchain). Tokens can be sent and received and used to purchase goods and services offered by the creating organization or any organization that accepts it.

- **Wallet**
  A software application that facilitates the storing, sending, and receiving of cryptocurrencies and tokens.

- **Trading Pairs**
  A trade between one type of cryptocurrency and another, used to calculate the value of tokens at the time of the negotiation of purchase and sale.

- **GRC**
  The Greencoin.AI token that runs as an ERC-20 on the Ethereum Blockchain.
3. Mission Statement

GreenCoin.AI’s mission is to provide a Sustainable Decentralized Ecosystem where every member of the GreenCoin community has the opportunity to get rewarded for improving their health and fitness while simultaneously earning money back into their wallet.

4. Introduction

GreenCoin.AI was founded in 2019 with the belief a person’s physical and mental health is not a bargaining chip that can be easily sacrificed. These days healthy food is expensive and physical fitness is a large time and financial commitment. GreenCoin’s revolutionary technology aims to solve this by paying back the users in real time for their efforts.

GreenCoin.AI is the first technology company to use Blockchain and AI to provide a comprehensive Fitness Experience where our members will get a return on their investment simply by burning calories. Users will improve their physical fitness to earn the most valuable reward in the world: Money

Within the GreenCoin.AI Community. Every person’s wealth and health is constantly improving. We call this BURN TO EARN. With our upcoming unique line of training equipment, all provided with our proprietary AI chip, there has never been a greater motivator to exercise.

Imagine that every time you work out, you are rewarded not with loyalty points but with real money that can be spent. GreenCoin.AI is committed to providing users real utility so that they spend their hard earned money to buy products, play games and subscribe to a wide variety of services they find beneficial.

We aim to not only become the largest decentralized community in the world but provide the most value to each and every one of our users. Our ecosystem of Members / Fitness trainers / Merchants / Game providers will all come together to create the ultimate experience.
5. The Opportunity

Currently, personal fitness suffers from the following:

A. Gyms and at-home equipment can be expensive and draining on your wallet
B. Lack of incentive program when compared to other industries
C. Even those with an incentive program only offer minor awards in the form of credits or referral programs

GreenCoin.AI introduces the concept of Burn-to-Earn (compared with Play-To-Earn) as the next big trend in global fitness. With Burn-to-Earn, users are motivated to burn calories with the most powerful incentive in the world – real spendable money. When exercising using GreenCoin.AI equipment, the more active a user is, the more they will be rewarded in real GRC Tokens. The tokens will be deposited directly into the user’s wallet with no third party in the middle. The process of “mining” GRC becomes the actual act of exercising.

Burn-to-Earn is the foundation of our whole ecosystem. With the GRC that users earn, they will be able to either spend it for discounted purchases through our large network of trainers, content providers, and merchants; or simply convert it into cold-hard-cash.
6. The Ecosystem

At our core, GreenCoin.AI revolves around the proprietary GreenCoin.AI fitness equipment with built-in AI chips that directly communicate with the GreenCoin.AI wallet. When users exercise, they are rewarded with GRC which they can spend throughout the ecosystem.

The GreenCoin.AI Ecosystem is divided into 4 categories of community members:

6.1 The Members

Members are the GreenCoin.AI users that exercise and are rewarded with GRC Tokens. With the GRC in their wallet, they can purchase everything ranging from food, clothes, games, coaching sessions, and subscriptions.

6.2 Fitness trainers & Coaches

Professional fitness trainers and coaches will be readily available to guide the Members through various online exercises. These sessions will be offered at a discount for Members paying with GRC. The most active and experienced Members even have an opportunity to become fitness trainers/coaches themselves and open up an additional revenue stream.

6.3 Content Creators

GreenCoin.AI will offer a variety of content to entertain and further motivate the users. These range from online games played while exercising, to Social Media Influencers posting the latest and greatest workout routines and nutrition regimens. This content will be available as a Freemium service so all users have the opportunity to play and participate with higher tiers being bought by the members using GreenCoin and paid directly to the content providers.

6.4 Merchants

As GRC flows around the ecosystem, one key part will be our partnerships with various merchants to allow the spending of GRC on real-life goods as well. Discounted items are a further reward to those who exercise with GreenCoin.AI equipment and will include gym memberships, food & drinks, athleisure wear (e.g., Lululemon), fitness/diet coaches, and even entry into exclusive events hosted by GreenCoin.AI and Greencoin.AI partners.
7. The GreenWallet Mobile Application

The GreenWallet is the portal for all users to interact with the GreenCoin.AI Ecosystem. The GreenWallet will be a mobile app with a fully functional Ethereum wallet to store all GRC earned by Members. As it is a wallet, Members will be able to directly spend GRC from within the GreenWallet on any of the offerings described throughout this whitepaper. Furthermore, it will also directly link to all GreenCoin.AI equipment and track/display the fitness data to help users get a better picture of their exercise/health habits.

*App currently under development, v1 of design*
8. The Team

Mr. Pink  
CEO | Chairman

Mr. Pink Wangsuo, is a global entrepreneur who has been featured in the largest business magazines in the world. He previously founded the Mr. Pink Ginseng Drink, which he expanded into 27 countries. Additionally, he successfully introduced a CBD product line and fashion collection and continues to be a key advisor to many businesses throughout Hollywood and the Middle East. Mr. Pink is also one of the largest shareholders of ATXG Group, a supplier to the world’s most well-known brands such as Armani, Prada, Burberry, and Ferragamo.

Mr. Newton Howard  
Co-Founder

Newton Howard is a brain and cognitive scientist. He is a professor of computational neuroscience and former director of the Mind Machine Project at MIT as well as functional neurosurgery at the University of Oxford, where he directs the Oxford Computational Neuroscience Laboratory. He is also the director of MIT’s Synthetic Intelligence Lab, the founder of the Center for Advanced Defense Studies and the chairman of the Brain Sciences Foundation.

Tom Zhang  
Head of Talent

Dr. Tom Zhang is a recognized expert in HR Management and Talent Acquisition in Silicon Valley. As the first Tesla HR for Asia Pacific, he helped build the early Tesla team in China, Japan and Australia. Prior to Tesla, he worked in the HR Department at Google and Tencent America. His other areas of expertise include US/China labor law compliance, executive compensation and talent management. He received his PhD degree in Electrical Engineering from Zhejiang University.
8. The Team

Nick Von
Technology Director

Nick Von has been a successful entrepreneur since a young age. Generating over $20,000 at the age of 9 years old, he began writing code and developing software, technology and e-commerce. Shortly thereafter, he began to build out highly-scalable e-commerce and tech solutions in a variety of industries, which resulted in him dropping out of high school to pursue his passions. He built one of the top 10 iOS games on the app store before the age of 18. He also created one of the quickest growing e-commerce stores since the creation of Shopify. He specializes in viral growth of corporations. He is a hard believer in the future of cryptocurrency and block chain. His new project, is a unique, workout to earn cryptocurrency, called Greencoin.AI. Founder of Greencoin.AI, Mr. Pink, met Nick through mutual friends at a cryptocurrency conference in 2020. Mr. Pink truly believes Nick Von to be the next Vitalik Buterin. Nick Von is now one of the largest coin holders of Greencoin.AI.

Markus Brun
Marketing Director

Prodigy software engineer and programmer who started working professionally in artificial intelligence at age 16. His expertise in artificial intelligence allows him to build highly scalable solutions using machine learning which in the past has enabled him to solve complex multimillion dollar problems.

Years beyond his age, Markus is the definition of an innovator. His technical skills and passion for building strong online communities has allowed him to become one of the key figures in a wide variety of Crypto and NFT projects.

Markus is currently a large contributor to Greencoin.AI and is aligning all of his expertise and efforts towards building the next generation of utility based tokens.
9. Fitness Equipment

The GreenCoin.AI Fitness Equipment is the heart of the company and powers the entire ecosystem. Each product in our line has a built-in AI chip which is in direct communication with the GreenWallet mobile application. The main function of the AI chip is to monitor the workout and to ensure the member will receive the correct rewards based on their level of exercise. Another feature of the AI chip is to gather critical data to enable optimized coaching and health tips to the member. The chip will enable AI based analysis of each member so that personalized support and service can be provided to millions of members daily. The first in line to be launched will be the GreenCoin.AI bike which is planned for Q4 2022. Launches of the watch, treadmill, and additional equipment will be spread throughout 2023.

9.1 The GreenCoin.AI Bike

This revolutionary bike will be the flagship product with a futuristic design and features a super sized smart-display to provide the best user experience for anyone riding it. The screen will be wi-fi enabled and allows riders to connect to the GreenWallet, view their work-out data, and compete in various activities offered by GreenCoin.AI and our Content Creators.

*Image is conceptual design and prototypes began manufacturing in Q4 2021.
9.4 The GreenCoin.AI Watch

The Watch will feature a stylish design that offers similar features to traditional-smart watches with the leading advantage being that it will be blockchain enabled. This means that even when you are doing your regular steps around the house or office, users will have the ability to earn GRC. Counting steps has never been more exciting.
9.2 The GreenCoin.AI Treadmill

This treadmill will make running more exciting than ever before. A full-sized 55-inch (vertical) display will ensure that runners can be fully immersed in the experience. Whether they choose to run through the dazzling rainforest, a beautiful canyon, or through the stunning Himalayas, the screen will provide an experience that trumps all other forms of running.
9.3 The GreenCoin.AI Mirror

Would you rather lift weights, work with resistance bands, or do pure calisthenics? The Mirror will be the go-to option. This 6-foot tall mirror can be either placed on a wall or stood-up in any open space. The mirror will include a HD-camera that can track all repetitions being made while exercising and reward users accordingly. The smart technology will further be able to assist with parts of the exercise to ensure that form is perfect to get the most efficient work-out and prevent injuries.
10. Timeline

Since its inception in 2019, GreenCoin.AI fully believes that there can be a way for a persons’ health, wealth, and happiness can simultaneously benefit.

“We have a goal to reward users like never before and push the world to a greener, healthier state.”

Past and Future: Milestones achieved & future progress

2019
- Q1: Platform concept and initial development
- Q3: GreenCoin Blockchain Foundation was founded

2020
- Q1: Hardware design

2021
- Q1: Prototyping of the GreenCoin.AI Chip
- Q2: ERC-20 Token on Ethereum Mainnet

2022
- Q1: Public launch of GreenCoin.AI
- Q2: Launch of the GreenWallet mobile app
- Q3: GreenCoin Phase 2 (Initial Hardware Launch)
- Q4: GreenCoin Phase 3 (Complete ecosystem with Gym / Trainer / Merchant partnerships)

- Roll Out of Watch, Treadmill, and Mirror
11. Commercial Launch, 4 Phases

To ensure a successful launch and the highest quality of products, services, and safety for all our customers, we have spread out the launch into three phases. Each phase will undergo strict quality assurance and safety inspections to provide the best possible experience.

**Phase 1**

Launch the GRC Token on Ethereum blockchain and create the GreenWallet Mobile App for all users to store GRC and as an entry point into the GreenCoin.AI Ecosystem.

**Phase 2**

Launch flagship bike and introduce the Burn-to-Earn mechanism where users can begin earning GRC through exercise.

**Phase 3**

Launch partnerships with all parties described in the Ecosystem (Trainers, Content Creators, Merchants) and ensure the seamless integration of each piece to complete the entire ecosystem. This is where Burn-To-Earn is in full effect as all members of the ecosystem can be earning GRC.

**Phase 4**

Launch the Watch, Treadmill, and Mirror and ensure a smooth integration into the ecosystem.
11.3 GreenCoin.AI and Consensus

We will run Consensus Voting every quarter where we will propose, vote and implement additions to improve the GreenCoin.AI Network and Ecosystem. Note that initially, our core team will make most decisions but we will move to a DAO-governed model over time.

11.4 Definition

GreenCoin (GRC) is a decentralized reserve currency available on the Ethereum Network based on the GRC token. Each GreenCoin token is backed by a basket of assets (e.g., GRR, GR-POLY, LP Tokens, etc) in the GreenCoin.AI treasury, giving it an intrinsic value that it cannot fall below. GreenCoin.AI introduces economic and game-theoretic dynamics into the market through staking and minting.

Our goal is to build a policy-controlled currency system, native to the Polygon network, in which the behavior for users to burn calories generates the GRC token. In the long term, we believe this system can be used to optimize for stability and consistency so that GRC can function as a global unit-of-account and medium-of-exchange currency. In the short term, we intend to optimize the system for health and wealth creation. We intend to achieve price flatness for a representative basket of goods without the use of fiat currency, in order to allow the cryptocurrency industry to detach once and for all from the traditional finance world.

11.5 How do I participate?

There are two main strategies for market participants: staking and minting. Stakers stake their GRC tokens in return for more GRC tokens, while minters provide LP tokens or GRR tokens in exchange for discounted GRC tokens after a fixed vesting period. Members can, when Phase 2 and 3 are launched, also Burn Calories to earn GRC tokens using a suite of health tracking applications and products, e.g. Bikes, Mirrors, Watches, and Fitness Trackers.
14.2 Burn-to-Earn

Burning calories has never been more rewarding with our Burn-to-Earn initiative. Whenever a user begins a workout using GreenCoin.AI equipment, the reward calculation begins. Users must exercise and reach a minimum amount of 100 calories burned to qualify for the minimum reward. Afterwards, each calorie burned will directly translate into additional GRC rewards. The full algorithm for calculating the amount of GRC rewarded is below.

Additionally, Burn-to-Earn also has a dual effect where a percentage of the total calories burned by all users will be used to calculate an amount of token burn. The token burning will be in phases where initially a higher percentage is burned and this amount drops lower as the ecosystem grows. The complete chart is on the following page and currently 10% of the total supply is reserved for Burn-to-Earn token burning.

15. The GreenCoin.AI Rewards Program

GreenCoin.AI has, by using a considerable amount of resources, defined the critical calculations related to our rewards program. It is with confidence we are introducing our Burn-to-Earn Your Fortune rewards program to the world. In this section we will introduce the most critical variables and calculations that are involved in optimizing the distribution of our GreenCoin Rewards (GRR) to all our members.

We have listed three core calculations below:

\[
F(s,i) = B_i + 75\% E_i + \frac{1 - w}{1 - w} s_i + B_i + \frac{1 - w}{1 + w} s_i + 50\% E_i + \frac{1 - w}{1 + w} s_i \\
\]

\[
B_i + \frac{1 - W}{1 + W} s_i \geq S \\
\]

\[
a = \frac{U_c}{1 + U_2 + U_3 + \ldots + U_a} \\
\]
