

SHIBONK

 **BON_K PAPER**

(not-so-white paper)

what is SHIBONK?

Shibonk is a community driven token based on the Binance Smartchain Network (BEP20). We aim to build a utility intensive project through:

- ¹ Community Engagement
- ² Non Fungible Tokens (NFT's)
- ³ Metaverse Integration
- ⁴ Video games – Battle of the Bonks (BoB)

the origin of SHIBONK.

Known as the Dogecoin killer, the Shiba Inu Token was introduced in August 2020 for the sole purpose of destroying Dogecoin. The founders Ryoshi, Shytoshi, and our very own Yoshi developed a strong community that propelled a small market-cap project into a multi-billion dollar business, successfully achieving their goal of dethroning Dogecoin.

With the rise of DogeBonk – a derivative of Doge; Yoshi gathered three of the best developers/innovators he knew, Alpha, Bred & Dev to launch Shibonk – a new token designed for the purpose of protecting Shiba's image in the BonkWars.

the SHIBONK ecosystem

Shibonk aims to be listed on multiple exchanges to increase trading accessibility of the token. Furthermore, we are aggressively pursuing partnerships with Shiba Inu and other blockchain projects to help facilitate our long term goals. Shibonk provides utility through:

bonkenomics

Shibonk is a BEP20 token on the Binance Smart Chain.

One quadrillion tokens were minted for the initial supply. 30% of the tokens were immediately burned to a non-recoverable wallet address to set the initial deflation rate at 1.5% (30% of the 5% reflection). SHIBO has a 10% tax on each transaction. 5% goes back to the wallet holders as reflections, the other 5% is sent to the PancakeSwap Liquidity Pool. Since the burn address receives reflections, a portion of each reflection burns with each transaction.

This makes SHIBO deflationary,

resulting in higher prices over time as the supply of the token is constantly dropping. Each transaction redistributes a portion to wallet holders, and the remaining portion is sent to the burn wallet. Over time the deflationary tokenomics will accelerate as the burn wallet grows. Reducing the supply while maintaining a fixed demand is a means by which SHIBO will increase its token value for long term holders.

bonkenomics

(CONTINUED)

5% fee = redistributed to all existing holders
5% fee = added to the liquidity pool

organic marketing

In an industry that relies on individuals exchanging value with one another, nothing matters more than **community**. Shibonk harnesses the power of its community as a varied and ever growing talent pool to build on the Shibonk ecosystem. We empower our community members using a free-market model to drive growth, rewarding those who put in the most work. All are welcome to leverage the Shibonk brand for personal gain as the team sees this activity as mutually beneficial.

Shibonk will achieve success through a combination of community generated memes, organic promotion, and the decentralized development efforts of the combined team and community. If there is a need for expertise outside the knowledge of our community we have created a marketing wallet.

Our Community Wallet: `0xC78B061333B722493CbfFCcFe373B1d825f5f3eb`.

the BONK team

The Shibonk development team consists of a core team of 5, with an army of community devs and a significant number of contributors working on the project on a volunteer basis. Development is driven by the desire of each individual to increase the value of their investment. As such, the core developers were each given 10T tokens at launch to incentivize early development efforts.

YOSHI (co-founder/visionary)

One of the original Shibarmy Members who helped build Shiba early days. He founded Shibonk in order to defend Shiba Inu.

DEVON (co-founder/developer)

Finishing Bachelors in Computer Science. Helped create & launch Shibonk and responsible for lead development.

ALPHA (co-founder/project management)

Currently completing a masters in electrical engineering, innovation & entrepreneurship. Created Shibonk for the memes.

BRED (co-founder/project management)

Currently completing a masters in electrical engineering, innovation & entrepreneurship.

ZY (web/game developer)

Has a degree in Computer Engineering and is responsible for Web Development, Graphic Design and Game Development.

roadmap

Phase 1 3000 holders (Completed) 🐾
(Q1 2022) Organic marketing campaign (Ongoing) 🐾
'Bored SHIBO Bonk Club' NFT release (Ongoing) 🐾
Shibonk Merch (Ongoing) 🐾
Extensive social media campaigns (Ongoing) 🐾
BonkWars video game (Completed 12/25/2021) 🐾
CMC/CG Listings

Phase 2 10000 holders
(Q2 2022) Organic marketing & social media campaigns resume
New 'Bored SHIBO Bonk Club' release
New Shibonk Merch and online store integration
Battle royale based Battle of the Bonks (BoB)
Exchange listings
Partnerships with other crypto projects

Phase 3 50000 holders
(Q3 2022) Organic marketing & social media campaigns continue
Cross-community competitions
Launch on Shibarium Network
Partnership with ShibArmy

Phase 4 Organic marketing and social media campaigns continue
(Q4 2022) New 'Bored SHIBO Bonk Club' NFT release
Shibonk metaverse integrations
Adding more to the Shibonk eco-system through dApps, games,
project collaborations, art projects, forums, and other utility
applications
Extensive charity effort
