Alum Regan Linton, Artistic Director in Residence for Denver’s Phamaly Theatre presents their film "Imperfect" to International Acclaim!
In the year 2050, people will look back on 2021 and recall it as a seminal year in the history of Swim with Mike. The organization launched its own 501(c)(3) Non-Profit Corporation with the official new name, “Swim with Mike Foundation.” In order to expand our reach and evolve into a truly nationwide entity, we also successfully negotiated a transition from the USC Athletic Department, into an independent organization with the volunteer members of the Board holding fiduciary responsibility, a paid staff and a proprietary database and software to manage the entire operation. With this new structure, we retain our close connection with the University, but the responsibilities now fall squarely on our shoulders. New tax regulations, hiring practices and audit requirements add to the complexity of what we do, but our Mission is still in keeping with the purpose we’ve had for over four decades.

“The Mission of Swim with Mike Foundation is to change the lives of student athletes who have experienced catastrophic injury or illness by providing scholarships, creating community and instilling hope and purpose.”

Our Family Association also adds a level of mentoring and community to the funds we distribute in the form of scholarships. One of our primary values is to remain “Relationship-Centered.” Most reassuring is the level of support we have retained with our donors during this transition. Swim with Mike Foundation has been able to launch itself with our largest gift ever (one million dollars from “Jersey Mike’s Subs”) as well as an outstanding result on our annual “Tote Board” thanks in large part to the remarkable efforts of our co-founder, Ron Orr. Our other co-founder, Mike Nyeholt remains engaged and aligned with our progress and direction. After a two-year hiatus from USC, those swimmers that have regularly participated in our annual Swim are already gearing up for the April 9, 2022 event at USC’s Uytengsu Aquatics Center.

What matters most is that we continue to fund our scholarship recipients’ education and continue to provide them with mentors, guidance and advice on how to return to their dreams and hope of independence. None of this would be possible without the care and support of our volunteers, donors, staff and, of course the Board of Directors. For an organization of this size and significance, there are always tasks that need doing, and new policies are being enacted before many of the individual decisions can be made. We have multiple Committees which provide valuable recommendations, including Finance, Technology, Family Association, Scholarship Council, Planned Giving and Personnel. If you think you can add to our efforts, or wish to serve on a Committee, I invite you to contact me. We can always use the help. Our recipients deserve nothing less.

John Naber, President
Swim with Mike Foundation
41 YEARS AND BEYOND

We never would have imagined 40 years after the initial Swim For Mike that SwM would be evolving into an independent National Foundation – the Swim with Mike Foundation. The new SwMF will continue to maintain and enhance our 40-year mission to financially assist physically challenged athletes pursuing their personal, professional, career and educational goals through SwMF scholarship support.

Swim with Mike’s mutually rewarding 40-year relationship with USC remains intact, and we have the full support of our many campus partners, friends and colleagues as we continue to grow our national reach. USC offered great foresight and sportsmanship in our 20th year as we partnered to initially expand our influence beyond USC to include SWM scholarship support nationally to physically challenged student-athletes. Now, as an independent national foundation we are poised to positively affect even more lives of those who have experienced tragic accidents that have forever altered their lives and ambitions, and to instil the importance that our SWM scholarship support comes with the responsibility of helping pass on the gift of education and hope for a future to student-athletes at their time of greatest need.

Every single volunteer, friend, donor and member of our SwM Family represents our growing community of support. We simply could not have achieved the accomplishment of changing the lives of nearly 300 SwMF scholarship recipients without you. We all share the joy of seeing these lives touched by the magic of an education that you have provided for them. They would like to thank you too.

All of the impact and influence would not have been possible without the trust and generosity that lead to our largest commitment ever. Peter Cancro, CEO and Founder of Jersey Mike’s Subs and his wife Tatiana share our vision of National growth possibilities by making a ten-year financial commitment to an independent foundation.

So, please join our scholarship recipients, their families and friends and the entire Swim with Mike Family at our 41st SwM Reunion on April 9, 2022 at the USC Uytengsu Aquatics Center to celebrate our transformational success and embrace our promising future!

See you there!

Mike Nyeholt
Co-Founder
Chair Emeritus

Ron Orr
Co-Founder
Executive Director
Our 2021 SwM Zoom Back-to-School Brunch was a great success and provided an opportunity for current and alumni scholarship recipients, their families and friends to meet and learn about each others’ educational pursuits and personal accomplishments. Attendees participated in interest-specific break-out rooms at the conclusion of the program.

We were pleased to be joined by our special guests, Jersey Mike’s Subs CEO and Founder Peter Cancro and his wife, Tatiana. Peter told us that when he met Ron Orr a few years ago and read the SwM mission statement, he felt that it was a “good fit” with Jersey’s Mike’s slogan of “Make a Difference” and “we immediately got on board.” Peter assured us of their continued support, and in addition to their recent $1 million gift, pledged $5,000 to the Swim with Mike Foundation, which is $5,000 per current recipient funding for spring semester and new scholarship students. Peter tells us that he and Tatiana feel very fortunate to be able to be involved and supportive of the SwMF. And we are most fortunate to be the beneficiaries of their most generous kindness and friendship!

Kaia Hedlund, SwMF Director of Recipient Relations, introduced SwM alumnae recipient Regan Linton (USC, University of Denver, UC San Diego 2013) who is a professional actor and Artistic Director in Residence for Phamaly Theatre Company in Denver. Phamaly is a dedicated group of disabled actors, technicians, staff and volunteers who passionately perform their craft. Phamaly has grown into a premier theatre company for actors with disabilities, and we were pleased to be the first to present the trailer of their short film “Imperfect” which will be shown next month at the at the Prague International Film Festival and the Denver Film Festival.

The program continued with each of our 42 attending scholarship recipients updating the crowd on their personal and educational endeavors. The recipients represented the wide national demographic range that is the SwM Family - from Stanford on the West Coast to Johns Hopkins on the East and many universities in between.

It was such a pleasure to learn more about each of these outstanding students’ accomplishments and goals and to learn about their rewarding experiences made possible through the SwM support.

At the conclusion of this segment, the attendees divided up and jointed interest-specific break-out groups led by SwM industry leaders, and this activity rounded out another successful Annual SwM Back-to-School Brunch!
New and Returning Scholarship Recipients

We are pleased to introduce you to our 14 new SwM 2021-22 scholarship recipients, and three alumni SwM scholarship recipients who have decided to continue their education with a second, advanced degree. These outstanding students join our total of 52 recipients at 40 universities nationwide. Please visit our website at swimwithmike.org to learn more about all current SwM scholarship recipients.

New Recipients

Ella Ivie – Agoura Hills, CA
Louisiana State University – B.A. Business and Apparel and Textile Design – Spring 2025

Ella was a typical high school student. Club and high school Soccer, Friday night football, challenging but fun classes and lots of activity. During practice for an upcoming soccer tournament, Ella suffered a horrific ankle sprain. Subsequent examination diagnosed an Aneurysmal Bone Cyst Tumor in her right tibia. The tumor had destroyed 75% of the bone and was threatening the entire structure of her leg. Major surgery to remove the tumor was followed by months of recovery and later the regrowth of the tumor along with three other tumors. Assorted tumor fighting therapies followed, all with the knowledge that her aspirations to play college soccer had vanished. Ella graduated with her class and moved on to study at Louisiana State University.

Erika Wilson – Pell City, AL
Duke University – OTD Occupational Therapy – Spring 2024

A normal twelve-year-old girl goes from competitive dance and playing games with her friends to being paralyzed from the waist down in span of 30 minutes time. The diagnosis was Transverse Myelitis. Erica couldn’t understand it and she certainly couldn’t pronounce it. She frustrated the Children’s Hospital staff as they tried to teach her how to use the wheelchair. She gave the worst time to the Occupational Therapist who looked her in the eye and reaffirmed that while her tears were valid, her life was not over.

The OT made a lifelong impact on Erica because she listened and taught her how to adapt to her new lifestyle. Erica went on to complete her Bachelors degree at the University of Illinois where she was a star on the wheelchair basketball team. Wheelchair basketball taught her to be more disciplined, responsible, and adaptable in any situation, all skills that will serve her well as she pursues her lifelong dream of becoming an Occupational Therapist. Erica loves spending time with her friends, family and her cat Winx.
Parker started his athletics career in swimming at the age of four, later joining a swim team when he was nine, competing for three seasons. He followed that by beginning Tae Kwon Do at six, going on to earn three black belts in Tae Kwon Do. Once in high school, he began football, playing as a linebacker. As Parker was preparing to start his sophomore year, he was in a diving accident at Ocean City Beach in Maryland. The accident resulted in a C4/C5 incomplete spinal cord injury. Four months of rehab therapy followed, and he returned home for Christmas. Intense physical therapy allowed him to regain the ability to walk with assistive devices, including a walk across the stage to receive his high school diploma. Since Parker's accident he was able to transition to adapted sports including handcycling and wheelchair rugby. He started out as an engineering major but changed his major to his real passion, film studies.

Misha Palla – Philadelphia, PA
Columbia University – MBA – Spring 2023

Misha's career aspiration is to become a champion for meaningful change, specifically fostering an inclusive culture within the technology industry and world more broadly. She is passionate about these empowerment efforts for individuals with disabilities given her own journey. In the summer of 2016, Misha was injured in a boating accident that mangled her right leg. Her leg was later amputated, and Misha went from an able-bodied athlete who received a black belt in Tae Kwon Do to a person with a physical disability. The mental and emotional skills learned in Tae Kwon Do such as self-discipline and the ability to stay present were essential to her recovery and subsequent self-sufficiency. She found a new passion for cycling after the accident that restored her passion for sports. Misha was admitted to the MBA program at Columbia University with the goal to become a corporate strategy professional in the technology industry. She hopes to use the skills developed during her MBA experience to lead her colleagues and classmates in sponsoring educational training and employability initiatives for individuals with disabilities.

Natalie Fung – San Marino, CA
USC – M.S. Communications/Data Science – Spring 2023

Natalie played volleyball as a kid and was in the high school Marching Band. She went on to USC, her dream school, and majored in Public Relations with a minor in French. She was set to graduate early with job opportunities in sight when suddenly, while in a taxi in Las Vegas, an auto accident resulted in a C5 spinal cord injury. After three months in the hospital, Natalie returned to USC and finished her degree. She found her place with dance when she joined an internationally recognized wheelchair dance team called the Rollettes, which was recently featured in an Aerie campaign and on shopdisney.com. In addition to dance, she also mentors women and girls with disabilities and is the disability advocate on the team. Natalie recently moved out of her family home for the first time since becoming a quadriplegic and is living alone at USC, where she is currently pursuing an MS in Communications Data Science with the goal to help the disability community through more data and technology.

Parker Haller – Woodbridge, VA
George Mason University – B.A. Film and Video Studies – Spring 2024

Parker started his athletics career in swimming at the age of four, later joining a swim team when he was nine, competing for three seasons. He followed that by beginning Tae Kwon Do at six, going on to earn three black belts in Tae Kwon Do. Once in high school, he began football, playing as a linebacker. As Parker was preparing to start his sophomore year, he was in a diving accident at Ocean City Beach in Maryland. The accident resulted in a C4/C5 incomplete spinal cord injury. Four months of rehab therapy followed, and he returned home for Christmas. Intense physical therapy allowed him to regain the ability to walk with assistive devices, including a walk across the stage to receive his high school diploma. Since Parker's accident he was able to transition to adapted sports including handcycling and wheelchair rugby. He started out as an engineering major but changed his major to his real passion, film studies.
Alexander Torelli – New York, NY
Yale University – Master of Business Administration – Spring 2023

Alex grew up in southern Connecticut and was a very active child. He participated in soccer, basketball, hockey, baseball and swimming. At the age of six he was introduced to two sports that he became very passionate about: tennis and skiing. He played on his state champion high school varsity tennis team. In the winter he skied in Colorado, Utah and Vermont as much as possible until in 2012 he suffered an accident that left him paralyzed from the chest down. Since that day, remaining active has been pivotal to Alex’s physical and mental health. Handcycling is a favorite and he has even returned to the slopes on a monoski. Through handcycling, Alex has helped raise funds for organizations such as the Christopher and Dana Reeve Foundation and the United Spinal Association. Alex completed his Bachelors degree at Dickinson College in 2016 and has worked in finance in the education sector since then. Post-MBA, Alex hopes to transition into the education technology industry, helping to deliver top-quality education to underserved and marginalized populations. Alex is the first Swim with Mike scholarship recipient to attend Yale University.

Avery Downing – Cordova, TN
University of Alabama – M.A. English – Spring 2022

Aery began competitive gymnastics at the age of four. She advanced up the ranks until at the age of 13, she fell during practice, resulting in a complete spinal cord injury at the T-11/12 level. The joy and team camaraderie that came from practice and competition was gone and she struggled with that until she found adapted sports. After high school graduation, Avery went on to the University of Alabama because of the university’s outstanding adapted sports programs. She has won one national championship with the wheelchair basketball team, three with the wheelchair tennis team and is currently a member of the USTA national team. Avery received the Alabama Adapted Athletics Academic Award and UA’s Presidential Scholarship for her first four years. She completed her dual major in English and Spanish and went on to an accelerated Master’s program in English Literature. Her focus within the English Literature program is southern American Literature with specific attention to representations of disability and the works of Flannery O’Connor. Avery began teaching and tutoring while in high school and has plans for a career in education.

McKenna Woodhead – York, SC
Clemson University – B.S. Marketing – Spring 2025

McKenna was an active teenager who excelled in soccer but also enjoyed recreational sports. In June of 2018 she was in a jet ski accident and broke her neck leaving her paralyzed from the chest down. This lifechanging injury left her using a wheelchair for mobility but also brought new opportunities. She learned to water ski, snow ski, play wheelchair rugby and to play tennis. She was so motivated by those who helped her get back to herself after her injury that she wanted to inspire others. Adaptive sports and motivational speaking help her greatly with both her physical and mental strength. McKenna volunteers with the Trauma Survivors Network at Atrium Health Hospital. She loves being able to connect with people who are dealing with recent spinal cord injuries. McKenna understands that they are likely going through the toughest time in their lives and enjoys being able to motivate and serve as a positive example for them to emulate.
Krista was born in Guatemala, where she lived a full and active life. At the age of five, she was diagnosed with a lymphoblastic lymphoma that had wrapped around her spinal cord and kidneys. Her family made the difficult decision to move Krista to Boston, Massachusetts for life saving chemo treatments. Help came too late, and the aggressive growth of the tumor resulted in paralysis at the T-4 level. Physical therapy allowed her to regain some movement and function, but she was still dependent upon a manual wheelchair. The chair then allowed her to pursue adaptive sports and there she thrived. She first tried handcycling, then monoskiing, and then wheelchair basketball with the Denver Rolling Nuggets. Eventually she found her passion in wheelchair tennis and competed as an undergraduate for Biola University. Upon graduation from Biola, Krista was admitted to UCLA to study Design and Media Arts to work on experimental film that focuses on the disability experience. Krista will also be the first adaptive athlete to represent UCLA at the national level. Krista becomes the sixth Swim with Mike scholarship recipient to attend UCLA.

Allison McKernan – Spokane, WA
Gonzaga University – Engineering Management – Spring 2024

Alli was an active twelve-year-old who competed in soccer, basketball, volleyball, and gymnastics. While sledding in Newport, Washington on New Year’s Day of 2015, Alli ran into a tree and suffered a spinal cord injury at the C 4/5 level. Her competitive spirit and determination culled from all her years in sports came into play as she pushed herself in rehabilitation and in school. Alli met SWM and Gonzaga alum Nate Higgins at a reception prior to the NCAA Basketball Championship Game in 2017. Nate introduced himself and suggested that when she was ready for college she should consider applying. Four years later he was assigned to interview her for the scholarship. Alli went on to high school where she was involved heavily in various clubs and loved being a part of every event/activity her school had to offer. She was voted Student Body President her senior year, graduated as valedictorian with a 4.0 GPA, and was a member of the National Honor Society.

Ignacio Montoya – Los Angeles, CA
Cal State LA – M.S. Kinesiology – Spring 2022

Ignacio Montoya is the epitome of the American Dream, a dream he is literally creating one step at a time in his own neuro-recovery to cure paralysis and change the standard/continuum of care for spinal cord injuries worldwide. He is an Air Force officer, fighter pilot-select, biomedical engineer, soon to be kinesiologist, and the Chief Scientific Officer of HINRI Labs - a nonprofit that's aimed to do just that, Cure Paralysis. Ignacio, from a young age, grew up not fearing obstacles and has always created his own path forward. His levels of perseverance and determination are unmatched and when sprinkled in with a little bit of faith there's no stopping him. When he injured his spinal cord, December 2012, getting up and recovering just became another workable objective he was sure to achieve. Since then, he has traveled the world evaluating and participating in the most groundbreaking clinical trials and translational biomedical breakthroughs known to date. Today he is in LA working alongside Dr. Reggie Edgerton, the worldwide leader of SCI research, to show the world that Everything is Possible.

Krista Ramirez-Villatoro – La Habra, CA
UCLA – M.A Design and Media Arts – Spring 2023

Krista was born in Guatemala, where she lived a full and active life. At the age of five, she was diagnosed with a lymphoblastic lymphoma that had wrapped around her spinal cord and kidneys. Her family made the difficult decision to move Krista to Boston, Massachusetts for life saving chemo treatments. Help came too late, and the aggressive growth of the tumor resulted in paralysis at the T-4 level. Physical therapy allowed her to regain some movement and function, but she was still dependent upon a manual wheelchair. The chair then allowed her to pursue adaptive sports and there she thrived. She first tried handcycling, then monoskiing, and then wheelchair basketball with the Denver Rolling Nuggets. Eventually she found her passion in wheelchair tennis and competed as an undergraduate for Biola University. Upon graduation from Biola, Krista was admitted to UCLA to study Design and Media Arts to work on experimental film that focuses on the disability experience. Krista will also be the first adaptive athlete to represent UCLA at the national level. Krista becomes the sixth Swim with Mike scholarship recipient to attend UCLA.
Jack O’Neil – Colorado Springs, CO
University of Wyoming – B.A. Journalism – Spring 2025

Jack started swimming at the age of six and spent two summers on a summer league swim team before moving on to a year-round club where he specialized in backstroke and middle-distance freestyle. Jack was born with congenital deformities in his left leg that required many surgeries to fix. After almost 10 years of trying to save his leg, Jack decided that having his leg amputated above the knee was the best decision. He returned to the pool just weeks after the amputation and grew to become an advocate for athletes with disabilities as well as an outstanding swimmer and triathlete. Jack qualified for USA Para-swimming nationals at the age of 10 and went on to second-place finishes at both the USA Para-swimming and USA Triathlon para-nationals. As a high school swimmer, he was the first athlete with a disability to qualify for the Colorado State Championships under able-bodied time standards. Jack was recruited to swim at the University of Wyoming by Head Coach Dave Denniston, a 2008 USA Paralympian in Swimming. Denniston, being very familiar with Swim with Mike, recommended that Jack apply for the scholarship.

Nadia Burns – Falls Church, VA
University of Georgia -B.A. Fashion Merchandising & Sustainability - Spring 2025

Nadia comes from a family of swimmers and swimming coaches and started competitive swimming at 5. Nadia enjoyed success in Softball, but Swimming became her passion as she began competing year-round. At 14, Nadia's health began deteriorating; on New Years Day 2017, she woke up with a severe headache that never stopped. In and out of the pool became in and out of the hospital, with headaches, nausea, falling, and uncontrollable heart rate, but no relief or answers. After extensive medical travel, Nadia was finally diagnosed with several severe maladies leading to urgent surgery, stabilizing her neck and skull. Eventually, she returned to school, but not to competitive swimming. Fortunately, her coach asked her to join his staff at York Swim Club where she spent four years as a young, but inspiring coach. Even without range of motion in her neck, Nadia's perseverance allowed her to begin training again, and even compete for her High School team which won the 2021 Virginia State Championship! After high school graduation, Nadia moved on to the University of Georgia to study Sustainability.

Joe Radanovich – Westchester, CA
Texas Christian University – B.A. Finance/Management – Spring 2024

Growing up in the LA area and competing in volleyball, Joe was aware of Swim with Mike and how wonderful the program was. He never thought he would be in a place where it would directly affect him. Joe played both beach and indoor volleyball at the club and high school level his junior and senior years on the Loyola High School varsity. After graduation he went on to Texas Christian University and continued to play recreationally. On November 5, 2020 while he was just finishing up his first semester at TCU, Joe was in a serious automobile accident and was thrown from the vehicle. Two collapsed lungs, 2 shattered vertebrae, 2 broken shoulder blades, 7 fractured ribs, a fractured hand and a brain injury were the result. After several weeks in the hospital, Joe transferred to Craig Hospital for rehab. Upon returning home he found that family and friends had retrofitted the family home. He was able to finish up the semester while at Craig and went on to finish his second semester online from home. Joe returned to TCU in the Fall of 2021.
Returning Recipients

Abigail Curtis - Independence, KY
University of Lynchburg

Abigail was always an active child participating in ballet, cheerleading, soccer, t-ball and cross country. She was diagnosed with idiopathic scoliosis when she was 11 years old. In September of 2012, she had a spinal fusion performed. During the operation, an error occurred. Abby came out of the surgery with a spinal cord injury that resulted in a loss of motor function from the waist down. After intensive physical therapy, Abby has been able to regain her ability to walk. However, due to the damage done during the surgery she is unable to participate in the sports she once loved. Instead of participating in the sports above, she became team manager of her high school Cross Country team so that she could remain involved in sports. Abby also became involved in community service at her local library. She was inducted into the National Honor Society and Spanish Honor Society while in High School. Abby graduated from Liberty University with a B.S. in Psychology and went on to pursue her M.Ed. in Counseling at the University of Lynchburg.

Jake Javier - Danville, CA
Duke University – Cal Poly San Luis Obispo
M.S. Biomedical Engineering, Fall 2023 - B.S. Biomedical Engineering, Spring 2021

Jake played football for most of his life starting at seven years old and on through San Ramon Valley high school where he played offensive and defensive line, achieved All-League honors and was named Senior Team Captain. Also, an outstanding student, he had several collegiate opportunities but chose Cal Poly San Luis Obispo for their football and engineering programs. On the day prior to his high school graduation, Jake broke his neck diving into a pool. Paralyzed from the chest down he was down but not out. A month after his accident he enrolled in a clinical trial where ten million embryonic stem cells were injected directly into his spinal cord. He later spent seven months at Craig Hospital in intensive rehab. After delaying college for a year of rehabilitation Jake changed his major from Mechanical to Biomedical engineering where he hopes to help progress the field of regenerative medicine. Jake was #70 on the football roster at Cal Poly and while he could not participate on the field, he assisted the team and the coaches from the sidelines. Jake graduated and went on to pursue his M.S. at Duke University.

Jonathan Jimenez - Alexandria, VA/San Diego, CA
USC - San Diego State University
M.S. Integrated Design, Business and Technology, Fall 2023 - B.A. Marketing, Spring 2021
USC Iovine and Young Academy

Jonathan’s parents migrated from Peru to Virginia in the 1980’s where he was born and raised. In Virginia, he grew up with his life centered around sports. He participated in swimming, taekwondo, baseball as well as basketball and soccer. After attending basketball summer camp at Bishop Ireton High School, he could never put down a basketball. After high school, he was a bit torn between working full-time and going to college, and on May 28, 2012, his life changed dramatically. He dove into the shallow end of a pool shattering his C-5 vertebrae. Two years later, he moved across the country to attend Project Walk where he is thriving in therapy and helping others by sharing his experiences and translating for Spanish speakers. Jonathan hopes to become a Creative Designer finished his Marketing degree at San Diego State and is now a graduate student at USC in the Iovine and Young Academy. Jonathan learned about the Swim with Mike family from his physical therapists at Project Walk whom all believed he was ready to take on new goals.
Long-time Swim with Mike friend, Jack Cameron, passed peacefully in September. We remember him as a true Renaissance man – an accomplished businessman, physics and math whiz, talented athlete, youth sports coach and deeply devoted to the SwM program since its inception.

Jack was a member of the Beta Theta Pi fraternity at USC, but his education was cut short when he was drafted to serve in the Korean War. Returning stateside, he married the love of his life, Barbara, and began his life-long career of building homes by founding JCC Homes.

Jack was CEO of JCC Homes for over 50 years, and the company built more than 5,000 homes throughout Southern California and Hawaii. 1,500 of those homes were on the Palos Verdes Peninsula. Jack also built the Palm Desert Tennis Club in 1973 and the Los Caballeros Racquet and Sports Club in 1977, which is the largest privately owned sports club in the country.

Jack and Barbara were residents of Rolling Hills Estates, where they raised their five children, for 60 years.

“Jack and Barbara Cameron have been very generous supporters of Swim with Mike since our 1981 beginning. They were honored with our 5th Annual SwM Volunteer of the Year Award in recognition of their active involvement. Our kind friend, Jack, will be greatly missed by the SwM Family.”

Ron Orr
