

# Main Street

## Money Monkeys

**Collection Total:** 5000

**Mint Price:** .2 BNB

**Mint Date:** TBA

### Overview

Main Street Money Monkey NFTs are a generative collection of unique pixel artworks that are limited to a total amount of 5000 and created from a variety of different attributes/traits. These NFTs will supply their owners with passive rewards in the form of Apeswaps \$BANANAS along with acting as a buyback and burn mechanism for Main Street's deflationary tokenomics.

### \$BananaBag Strategy and Mechanics

#### **\$BananaBag**

Money Monkey NFT's collectively represent holdership in the \$BananaBag. The \$BananaBag is an investment fund made up of farming/staking opportunities on Apeswap and will be funded with 100% of the minting money. With the goal of obtaining as many \$BANANAs as possible while redistributing them back to Money Monkey Holders. The strategy being to capitalize on Apeswaps multitude of passive rewards opportunities accompanied by \$BANANAs growth potential.

#### **Monthly Profit Redistribution**

\*All \$BANANA investments will be harvested monthly and distributed into these categories accordingly. Rewards distribution will begin 2 months after launch, in order to build the fund for maximum returns.

\$BANANA Redistribution to Monkeys- 75%

\$GNANA Reinvestment- 13%

\$BANANA Reinvestment- 5%

Gas & Fees- 5%

\$MAINST BuyBack & Burn- 2%

## **\$GNANA**

A \$GNANA Allocation to the investment strategy ensures that the fund will receive the best returns ApeSwap has to offer. This adds another unique feature to Money Monkeys, as \$GNANA holds Governance capabilities within the Apeswap ecosystem. Allowing the Money Monkeys to continually increase their say in decisions that govern the ecosystem in which they operate. A voting system and structure will be formulated in order to adequately represent each Money Monkey in the decision making processes.

## **\$MAINST**

Royalties on secondary sales will be used to fund buy back and burns of \$MAINST token. Along with a 2% allocation of \$BananaBag profit distribution being used in the same manner. This aims to help power \$MAINST tokens deflationary tokenomics. Which feature a fixed supply accompanied by 5% Burn and 3% immediate rewards distribution to holders on every buy/sell.

## **Mint Information**

1500 mints have been set aside for the team and a promotional airdrop to the NonFungible Apes of Apeswap (1per=1000mints). Leaving 3500 mints for whitelist and public sales. Money Monkey mints will cost .2 BNB, allowing the \$BananaBag to begin with over \$245,000 capital investment (BNB \$350) in Apeswap staking. Main Street will update the Money Monkeys Whitepaper after minting is completed. Providing starting allocations and updated information on the project mechanics and concept.
