* The programme reflects General Assembly resolutions 75/290 A and B; 67/290; 70/299; and the 2030 Agenda. It is based on assumption that it will be an in-person meeting. In case the circumstances will warrant a hybrid meeting, the hours will need to be reduced, which will affect the time allocated to VNR presentations and other sessions.

**The sessions will look at synergies and trade-offs among these SDGs and across all the SDGs. SDG 17 will be discussed in all SDG sessions.

SDG 6 SPECIAL EVENT

The 2022 SDG 6 Special Event will take the SDG 6 Global Acceleration Framework to the country level by sharing national experiences implementing the targets for water and sanitation. The SDG 6 Global Acceleration Framework aims to deliver fast results for SDG 6 at an increased scale and strengthen system-wide collaboration at the country level. The five accelerators outlined in the Framework – Financing, Data and Information, Capacity Development, Innovation and Governance – will dramatically improve the international community's support to country progress. Acceleration for water and sanitation in the context of the UN 2023 Water Conference will also be discussed during this Special Event.

Co-hosted by Mr. Gilbert F. Houngbo, the Chair of UN-Water, and Mr. Liu Zhenmin, the Secretary-General of the UN 2023 Water Conference.

Inter-Parliamentary Union

PARLIAMENTARY FORUM

Wednesday, 13 July;
10:00 – 13:00
In person

This year's Parliamentary Forum at the HLPF will centre on SDG 17, the development partnership goal, as a key enabler of the whole SDG enterprise. The Special Event will draw on three SDG 17 targets of particular relevance to parliaments that are key to financing the SDGs, namely, domestic revenue mobilization, development assistance and public-private partnerships.

Organized by the Inter-Parliamentary Union.

HLPF: Transformation, Inclusion & Relevance?

"The relevance of HLPF is if it can encourage governments to engage in an inclusive transformation and recalibrate the context for an honest partnership between the state and non-state actors with greater intensity and urgency".

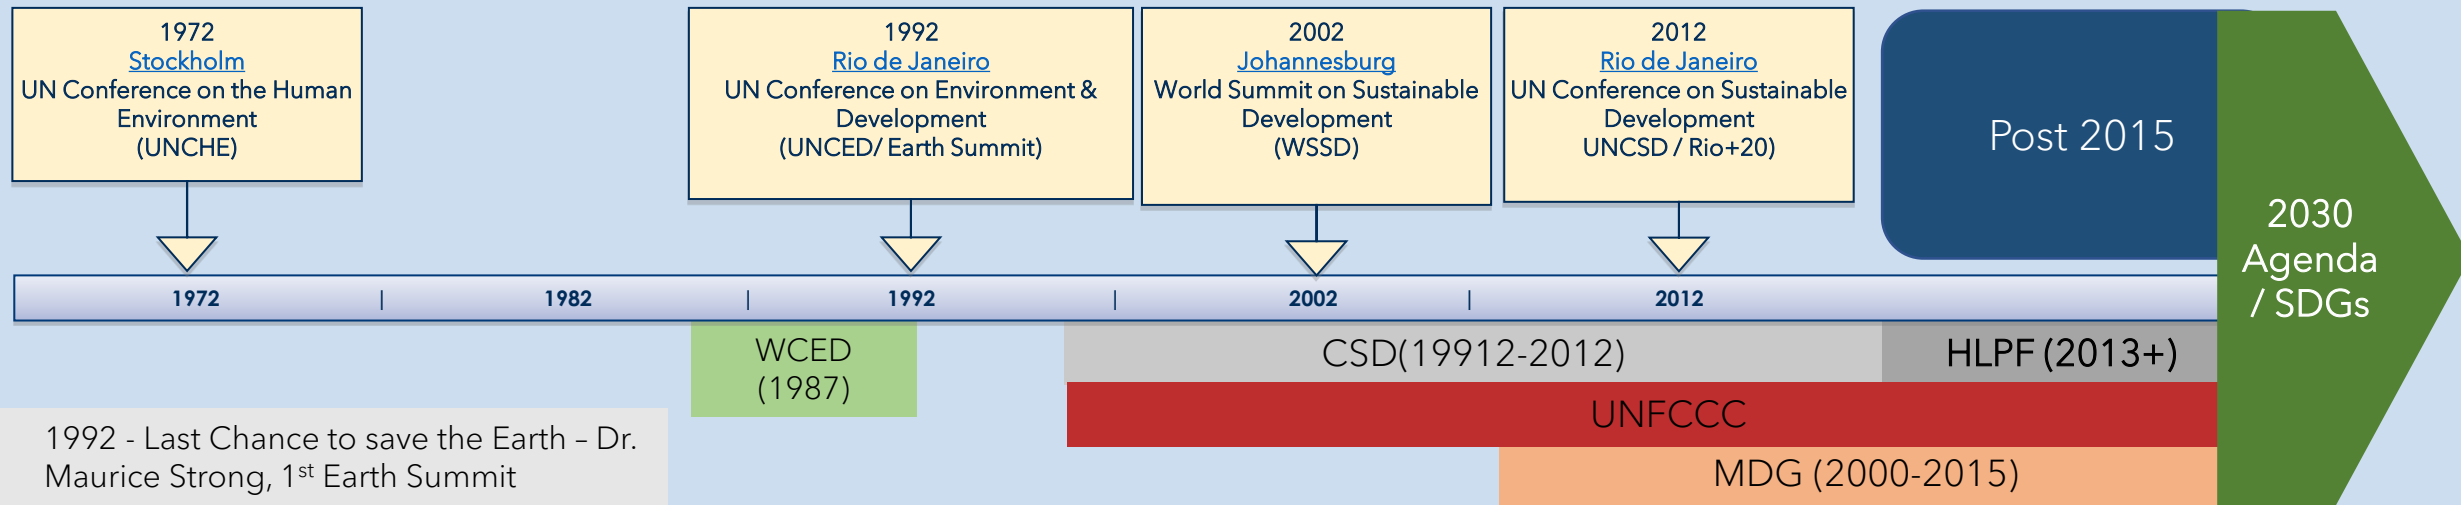

Earth Negotiations Bulletin (ENB) Meeting Coverage, from HLPF 2017

Sri Lanka Statement to Session 15 at HLPF (15th July 2016)
From inspiration to action: Multi-stakeholder engagement for implementation
Uchita de Zoysa (Chief Negotiator for Sri Lanka to HLPF 2016 / Sustainable Development Advisor of the Ministry of Sustainable Development and Wildlife Sri Lanka)

1. Firstly, I must state that the inspiration must be drawn from the fact that the 2030 Agenda is centrally about transformation and we must engage in a profound discourse of transforming the way we make decisions that affects others.
2. Therefore, stakeholder engagement must not be limited to mere consultation and we should not be complacent by simply providing a space for constituency statements.
3. If sustainable development is to be truly the transformatory agenda of the world, then all the stakeholder and the public must have a sense of ownership.
4. How can SDGs capture the imagination all people in a way that they actively engage in the transformation, as transformation will not merely come through policy processes.
5. There are no blueprints that can easily be adopted and we are in search of a new way of planning the future collectively.
6. It may not be in the comfort zones of conventional planning fraternities, but business as usual cannot advance the transformation.

Has HLPF Replaced CSD? How Political is the Forum?

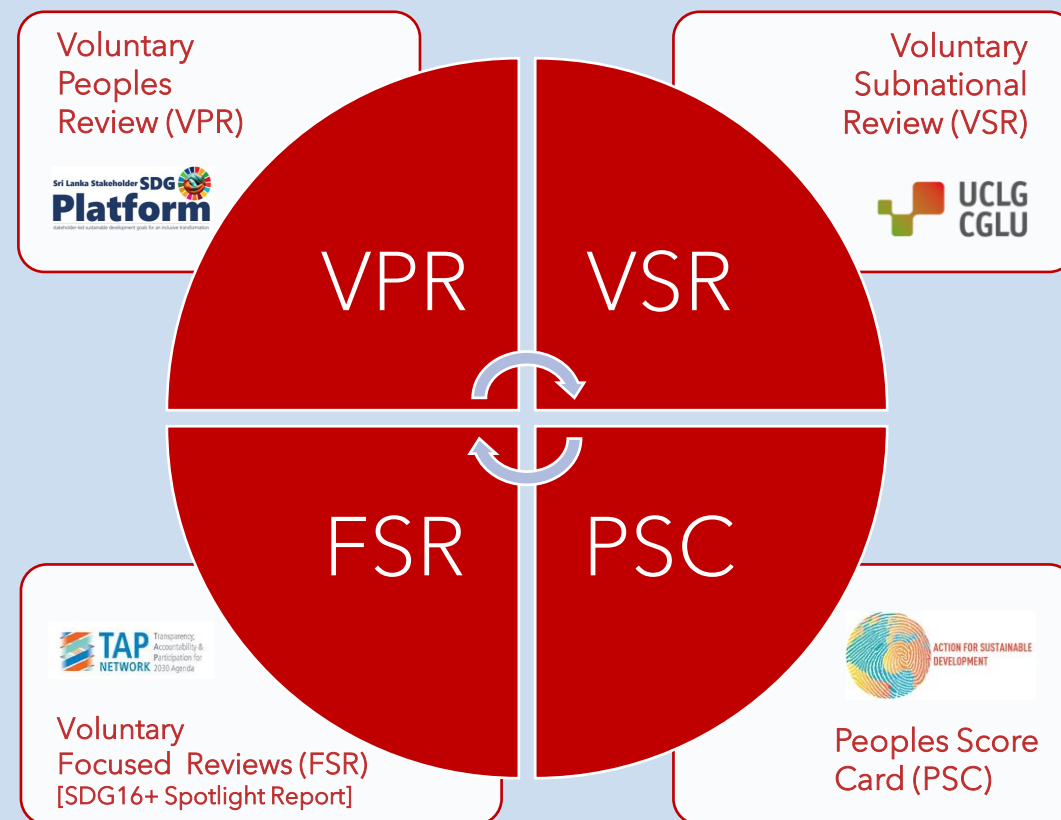

- 1992 - Last Chance to save the Earth - Dr. Maurice Strong, 1st Earth Summit
- 2012 - There has been no political commitment to Agenda 2021, Rio+20
- 2013 - Failure of the Commission for Sustainable Development (CSD) lead to the establishment of the HLPF
- 2016 - to date, SDGs are failing! It's not about the Transformation!

- Marking an important milestone, the UN commission on sustainable use of the world's resources concluded two decades of work, paving the way for the incoming High-level Political Forum to boost efforts to tackle global economic, social and environmental challenges.
- According to Secretary-General Ban Ki-moon's report on the lessons learned from the Commission, the contributions achieved by the CSD were also accompanied by a number of shortcomings, including the failure to fully integrate the economic, social and environmental dimensions of sustainable development."
- The creation of the Forum emerged from Rio+20's outcome document "The Future We Want," to ensure that sustainable development tops the agenda of the highest levels of Government and is embraced by all actors.

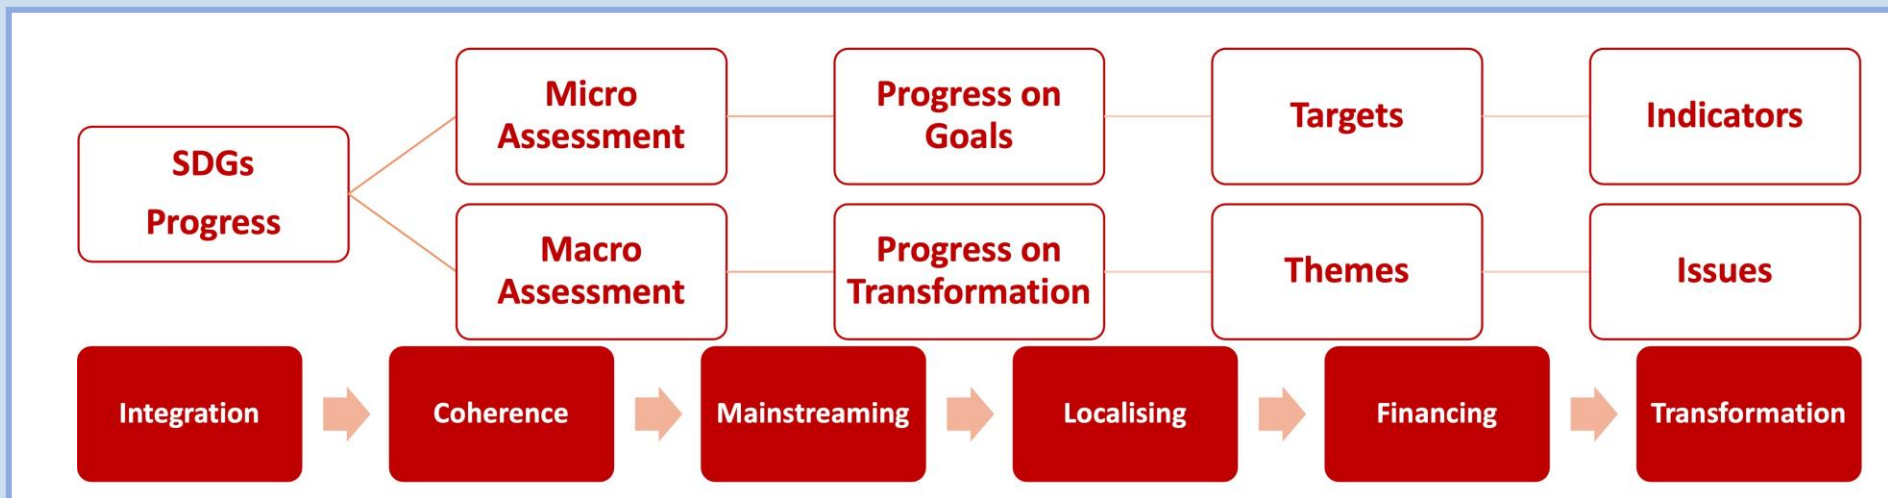

VNR: Commitment, Obligation or Deception?

1. Do Voluntary National Reviews (VNR) provide actual insight into local to global transformation?
2. Are they representative of whole of government and whole of society?
3. Are they derived through a methodological approach to data collection, analysis and review?
4. How can HLPF assess the progress if the actual transformation or gaps are not honestly reported?
5. Where is the dialogue between governments and stakeholders?
6. Where is the space for stakeholder reporting?
7. How are global assessments made without inclusive reviews?
8. HLPF must recognize people in an inclusive transformation!

Recalibrating the Context: HLPF 2022 & Beyond

"The relevance of HLPF is if it can encourage governments to engage in an inclusive transformation and recalibrate the context for an honest partnership between the state and non-state actors with greater intensity and urgency".
