

ROSENBERG + FECCI

Insight beyond the numbers.™

www.rosenbergandfecci.com

COMMODITY & ENERGY

R&F performs field examinations on two of the largest energy traders in the USA as well as multiple smaller energy traders. Other commodities analyzed include: ferrous and non-ferrous metals, grains & legumes, sugar, coffee & chocolate. R&F is also versed in handling exams related to quasi-commodities such as plastics and steel.

R&F has experience working with companies categorized as Energy Service Company (ESCO). We understand the difference between guaranteed and non-guaranteed sales as well as true-up and market pricing. These nuances can have an unintended impact on the collateral if not properly understood in this industry.

In addition to general idiosyncrasies and the effect of various offsets related to these type of examinations, R&F has the skill to understand market pricing, differential pricing, forward & future contracts and how they affect the reported collateral.

Benefits of choosing Rosenberg & Fecci and the value added:

- As a result of our specialized scope, lenders have requested to collaborate with R&F to improve and enhance their (the lender's) own review and field exam processes
- Borrowers have leveraged the analysis provided by R&F to help present to their board or future investors regarding accurate and clean KPIs
- An improved and efficient field exam process for both lender and borrower

OUR COMPANY

Founded in 1996, R&F has earned and maintained a reputation for offering its clients the highest standards of quality, consistency and value making us an industry leader when it comes to asset based lending field examinations and other financial consulting services.
