

Dispatcher is a fully-featured and versatile stand-alone solution, totally browser based, with no need for any installation or bespoke software.

It provides all the means required to track and control DMR-based mobile, portable and fixed terminals.

Dispatcher is one of many interconnected applications common to the SMC gateway, which work together to provide flexible custom solutions.

Features

- Platform agnostic
- Call logging
- Real Time GPS tracking
- Short-term history, up to 10,000 logged events
- Custom mapping
