

QA Tester

About Digital Village

We are pioneers in the collaborative creation of the Metaverse. Our team at Digital Village strives for excellence in the digital realm, redefining the way we interact in digital spaces, and how those digital spaces feed back into everyday life. From all of us at Digital Village, we look forward to working with you, likeminded and forward-thinking pioneers, to change the world!

Responsibilities:

- Design test plans, scenarios, scripts, and processes to provide a repeatable and organized testing environment.
- Report test results to the team, with bug reports.
- Work directly with the development team to ensure bugs are fixed.
- Coordinate with public testers to garner data from open testing events.

Qualifications:

- A degree in computer science, engineering, a related field, or equivalent portfolio experience.
- Must understand programming languages, and QA methodologies.
- Understanding of git and test management software.

Desirable Skills:

- 1 - 2 years of experience in QA testing.
- Fantastic team working and critical thinking skills.

Please get back to metaverse@digitalvillage.io if you find yourself matching these requirements.

Thank you!

The Digital Village Team
