

SIMPLY MEANINGFUL VIDEO.

FRONTIER

Built for Multi-location Enterprises**Hardware Included | Optimized for Low Bandwidth**

ALL-IN-ONE VIDEO AI SOLUTION FOR RETAIL / VENUES / ENTERPRISES / CAMPUSES

Frontier is Dragonfruit's revolutionary video AI platform purpose-built for multi-location enterprises. It's comprised of three breakthrough products – Video Management, Visual Intelligence, and Digital Investigations. Frontier takes video management and AI analytics to new heights with the world's most powerful Base Station, most advanced cloud intelligence, and simplest installation and configuration. Connect hundreds of sites with a single console and add award-winning analytics à la carte. No matter where you're located, Frontier can help you experience a new horizon in video AI.

FEATURE MANIFEST

- Tailor-made for multi-location deployments
- Infinitely scalable cloud intelligence
- Powerful Apple M2 Base Station hardware
- Effortless installation
- Revolutionary user experience
- Leverages existing cameras – IP and analog
- Attractive pay-as-you-go pricing

VIDEO MANAGEMENT

LIVE VIEW: Low-latency video streaming; view events as they happen

VIDEO WALL: Central visibility across all locations with customizable wall

LOCAL STORAGE: Your choice of on-device or NAS

CLOUD STORAGE: Unlimited cloud video retention available

VISUAL INTELLIGENCE

COUNTS: Get metrics on how many people/vehicles are going through your space

HEAT MAPS: Visualize movement patterns of people/vehicles

OCCUPANCY: Understand how many people are in a space at a given time

DASHBOARDS: View business metrics on how your space is being utilized with graphs, plots, and charts

DIGITAL INVESTIGATIONS

VIDEO SEARCH: Quickly find people or vehicles using powerful AI filters

AI FAST FORWARD: Condense hours of video into minutes to expedite video review by 10-100x

REDACTION: Automatically redact detected objects in a video clip; by object, not frame-by-frame

LPR: Read and report vehicle license plates using existing cameras

ABOUT DRAGONFRUIT

Dragonfruit AI is retail's first massively-scalable video AI solution, combining consumer-grade usability with enterprise-grade capability. Our revolutionary Frontier platform is comprised of three breakthrough products – Video Management, Visual Intelligence, and Forensic Investigations – and delivers patented, award-winning technology to multi-location enterprises. The hybrid solution is designed for bandwidth-constrained environments, and powers instant-on advanced analytics priced by consumption. Our flexibility, customizability, and effortless deployment help companies seamlessly transform their video data into business intelligence.
