

PMP CERTIFICATION

- THE BASICS

The PMP certificate offered by PMI is available in 80 different countries and is one of the most widely respected project manager qualifications in the world.

The first major section of the cert deals with people. You will be examined on your skills in communication, conflict management, and dealing with stakeholders.

The second section is about process, specifically the five main project process groups of initiating, planning, executing, controlling and closing.

The third, most recently added section deals with the business environment, and how well a manager understands consolidating the project with the expectations, needs, and values of the company.

PMI offers a massive set of guidelines and practical examples known as the Project Management Body of Knowledge (PMBOK) which can be studied to ensure success in the exam.
