# Introduction

Digital Nomad (\$DNC) is going to become the cryptocurrency that nomads all around the world will trade their services, experiences and products with. It will become the identifying symbol for a group of people who have chosen a life aside the beaten tracks of convention. We offer a partnership and a strategic alliance. It will be the place to go! Let's start and meet the future!

## PHILOSOPHY

People who are convinced that life takes place outside the restricted areas of government, states and nations. We are all one people. Nomads know that from experience, and we are envisioning a time where nomads can connect themselves with the roots of our ancestors. But not in the original ways when early nomads were traveling the deserts from one oasis to another, risking their lives. Rather as their digital descendants.

The number of people who want to break boundaries and who are following their callings is steadily increasing. Those are the ones we address. As one knows though working and living as a digital nomad has its obstacles. When one's work can be fulfilled digitally there are many questions arising:

- Where to work on which grounds?
- Where to look for the right digital environment?
- Which services are there to use?
- Is there some kind of mutual community to support me far away from home?
- What if my business gets in trouble and who can help me as a specialist?
- How about experts in relevant fields like international taxation?
- What about health and other insurances abroad?
- Should I deregister at home and give up my apartment?

***Nomadzon.com will be next big thing in the digital market***

KNOW MORE INFORMATION AT  
[www.digitalnomad-coin.com](http://www.digitalnomad-coin.com)

All this information, the relevant services and much needed products will be shared on our platform Nomadzon.com. The platform that allows only digital nomads and providers of substantial nomad needs to come together for business, information and social reasons. The platform will be the digital marketplace that everyone from every place can go to. Where everyone will understand each other and trust each other because one knows the other is from the same kind. There will be interaction even aside the platform through the Metaverse, too. All that to be able to live the digital nomad life better, easier and successfully in the real and the virtual world.

At the marketplace Nomadzon.com and within the metaverse \$DNC will be the currency to use. As we are believing in the values of trust and transparency the money system must be adjusted adequately. Therefore we use the blockchain technology and its decentralized setup.

Our idea is that every soul deserves and demands to be free. That is what \$DNC and Nomadzon.com contribute to. We are investing ourselves, our lifetimes and work into it.

### ***Do you join us?***

*"Developing a business idea as a digital nomad not only on paper, but having the courage to put it into practice and to accept the personal and financial risk connected with this, is not always rewarded. But we guarantee to surprise the market in the next few months with extraordinarily intelligent services."*

*The Nomadzon.com-Team*

## DISCLAIMER

THIS SECTION ON RISK AND DISCLAIMER IS NOT AND DOES NOT PURPORT TO BE A COMPLETE ENUMERATION OR EXPLANATION OF THE RISKS INVOLVED WITH THE PURCHASE OF \$DIGITAL NOMAD TOKENS. THERE MAY BE ADDITIONAL MATERIAL RISKS THAT THE DIRECTORS DO NOT CURRENTLY CONSIDER TO BE MATERIAL OR OF WHICH THE DIRECTORS ARE NOT AWARE. THE FOLLOWING THEREFORE HIGHLIGHTS CERTAIN RISKS TO WHICH DIGITAL NOMAD PROJECT IS SUBJECT TO AND WHICH DIGITAL NOMAD WISHES TO ENCOURAGE PURCHASERS TO DISCUSS WITH THEIR OWN PROFESSIONAL ADVISORS.

Prospective \$DNC Token purchasers should conduct such independent investigation and analysis regarding Nomadzon.com, the \$DNC Token, and all other relevant market and economic factors as they deem appropriate to fully evaluate the merits and risk of their purchase. The company and its directors disclaim any responsibility to advise purchasers of \$DNC Token of the risk and considerations associated with the purchase of \$DNC Token as they exist at the date hereof or from time to time hereinafter. Each prospective purchaser of any \$DNC Token must determine, based on his/her own independent review and such professional advice (including, without limitation, tax, accounting, credit, legal and regulatory advice) as it deems appropriate, that the purchase of \$DNC Token is appropriate and suitable for it, notwithstanding the clear and substantial risks inherent with the purchase of \$DNC Token. You should consult with your own legal, regulatory, tax, business, investment, financial, and accounting professional advisors to the extent that you deem it necessary, and make your own decisions including decisions regarding the suitability of this purchase based upon your own judgment and upon advice from such professional advisors as you deem necessary and not upon any view expressed by any party mentioned in this whitepaper.

## THE CRYPTO MINING INDUSTRY OVERVIEW

Cryptocurrency has remained a disruptive technology since its entry into the world in 2009 and has shaped the way things are done in many sectors around the globe. Bitcoin is the most popular cryptocurrency in the world with nearly 1.000.000.000.000\$ market capitalization. Ethereum has become a blockchain technology that allows major investment companies to regulate and structure the financial markets the same XY. Digital Nomad Coin (\$DNC) is going to become a part of that new way of currency and technology usage. For a more transparent way of offering and using services digitally.

# Problem & Solution

DNC is the first crypto currency that is addressing and solving nomad's needs all around the globe. From finding the best working and living spot to the like-minded people. The ideal financial support in foreign places without extra charges. With international insurance coverage and support no matter where and who you are. The questions above are dear to many digital nomads and the ones who are planning to undertake that step into worldwide freedom. Since there is no structured platform to meet like-minded people who offer answers and practical services Nomadzon.com is going to deliver exactly that. We met many people from all of Europe. Every country seemed to do it differently on a first glimpse but when we were looking at the data it was clear that most countries are really similar in what nomads have to know. That is why we started this initiative, in which we had the dream to found our new country, an island of freedom, a place on earth, which can feel like heaven. A place where we can be free and united again.

Therefore we started going south in search of the right environment and possibilities. Most of us are from Germany, as can be seen here <https://ourworldindata.org/grapher/covid-stringency-index?tab=chart&country=~DEU>

our government puts some of the strictest restrictions into place. That's why we left and started going first to Croatia and afterwards to Montenegro. Where we bought a ship, to show the world that we are really doing what we are talking about and finding ways where there are none yet.

## HOW CAN THE DIGITAL NOMAD COIN BENEFIT A GREATER FUTURE?

Nomadzon.com will allow everyone to make new paths. Through guides and support along the way. Either as the one who is guided and needs help when it comes to working as a digital nomad. When questions like “Which way of marketing is needed for my services and how can I buy them cheap?” or “Where can I live and work with a strong connection to fulfill my customers' needs?” arise, the platform is going to offer solutions. There you will be able to buy the services of a marketing agency that is specialised on clients just like yourself or find the right experts of your goal area to book your accommodation and office with. As you know it with Amazon.com there will be reviews as an orientation and the best prices available. You can not only as a customer use the platform but also to offer solutions for relevant topics of digital nomads and increase your business outreach while offering other people more freedom in their lives. Sounds too good to be true, right? Yes, we are idealists and visionaries!

# The Technology

## BLOCKCHAIN 1.0 – BITCOIN

Blockchain is the transformational technology that powers Bitcoin and has rapidly gained popularity on a global scale. It is providing new foundations for economic, legal, and political systems. Blockchain technology can change the way businesses provide services much as the internet did a few decades ago. Depending on perspective, the definition of a Blockchain network can differ. Authors Don and Alex Tapscott of

"Blockchain Revolution" define Blockchain as "an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value". From a technical perspective, a Blockchain is a term for a distributed, P2P network. It is append-only, immutable, and only updatable with the consent of the peers within the network which is performed using the built-in consensus mechanism. It is a global network of peers in which each peer holds a copy of the distributed ledger. It contains every P2P transaction from the very first to the most recently verified, all in chronological order. Cryptography is used to sign each transaction, which offers high security and integrity.

## UTILITY TOKENS

Utility Tokens represent access to a current or future product or service; in this case, Digital Nomad Coin. Buying digital tokens could be considered as buying a software license that gives the owner the right to access the final product or service. One thing that differentiates tokens from software licenses is that they are transferable, user-to-user, or user-to-crypto exchange. This is why it is so exciting to introduce Digital Nomad Coin to the cryptocurrency community. Digital Nomad Coin, when compared to the vast majority of tokens available, actually has a utility. We are not just hoping our token gets seen by the right person. What is an ILO? ILO stands for Initial Liquidity Offering, which is a new fundraising mechanism through which projects can raise funds by selling tokens on Defi, based Decentralized Exchanges without an ICO. ILO is designed in a bid to eliminate the problem of liquidity during token launch. As opposed to centralized exchanges, when a new token is listed on a decentralized exchange there is no need to wait for a long time to sell the tokens. ILO uses AMM or Automated Market Making mechanism to sell tokens in the form of computer programs that are ready to pay for the tokens. In the process of an ILO, the liquidity contributors will receive the new tokens in exchange for the contribution to the pools for the AMM to work for new tokens. Since these liquidity contributors take risks to buy the new tokens, they are offered bonuses known as yields. The contribution of liquidity is in the form of established coins like BNB. If the token holders sell a lot of new tokens through AMM, the liquidity pool for that token will become skewed, as the token holder receives stable coins held in the pool. Digital Nomad Coin will be making use of a reputable ILO platform and Pancakeswap as our AMM provider. When setting up the ILO, you must lock a percentage of the raised currency as counter liquidity to the sale token. The reason for this is to guard liquidity providers against rug pulls (a situation where project teams can withdraw all liquidity from the AMM without the investor being informed. For Digital Nomad, we would lock 51% of the currency raised. The ILO platform uses a special locker to lock the liquidity. The liquidity locker revokes the access of developers to move LP from a start date to an end date. There are many benefits of running an ILO including:

- Faster Sale
- Immediate Liquidity
- Lower Cost
- Fair methodology

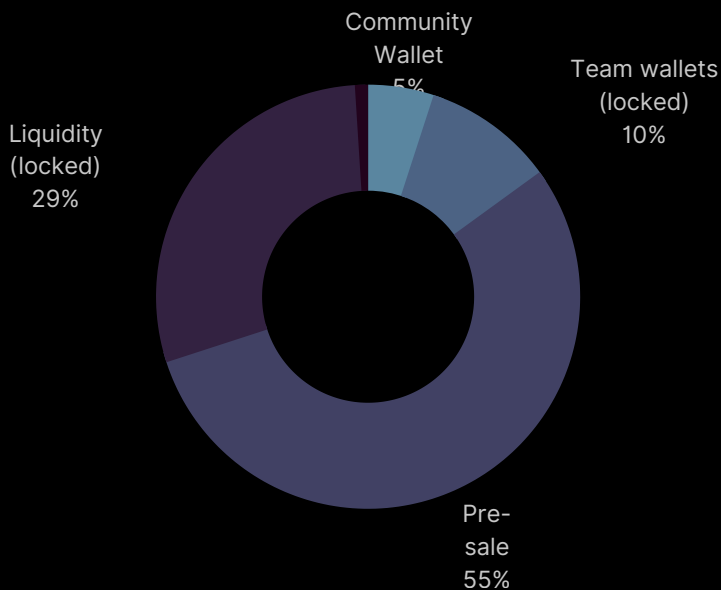

## DIGITAL NOMAD - THE ECOSYSTEM

### \$DNC Token

The blockchain network to be utilized will be the Binance Smart Chain (BSC). The BSC network is widely used and accepted throughout the Cryptocurrency space. It will also cost dollars to send out rewards to all of our holders instead of the thousands it would cost on Ethereum. To gather the funds needed, the \$DNC token will be launched on an ILO platform. After the ILO, investors can buy \$DNC through Pancakeswap V2 where a fixed price per token will be established.

## DIGITAL NOMAD - THE ECOSYSTEM

- Token Symbol \$DNC
- Sale Start TBD
- Sale End TBD
- Total token supply 100,000,000 \$DNC
- Hard Cap 1200 BNB
- Soft Cap 900 BNB
- Currency accepted BNB
- Liquidity Locked Amount 51%

## DIGITAL NOMAD - THE ECOSYSTEM

If the hard cap is not reached, the unsold tokens would be burned automatically with the ILO provider. It is our belief that the hard cap would be obtained easily due to our social reach, project relevance, and our market research. Thus, the project would have too much demand, which is a good thing for the token post the ILO stage

## WHAT IS THE REWARD SYSTEM?

Investors will get great benefits investing in this coin. This project is going to revolutionize how the possibilities of modern work life can be understood. This is not a short project in which the team wants to do a Rug Pull. We will do everything possible that this project stays liquid all the time, in a way that short term and holders benefit from it and the longtime vision can be realized.

Our roadmap is our mission and this is why we are fighting for all of it because we know by our own blood, sweat and heart how hard it can be to travel as a digital nomad.

Furthermore we will ensure that investors who hold their coin get regular airdrops, stacking rewards and even interesting courses and NFTs, which help to live truly free. Those rewards will also give you more benefits when it comes to meeting in the Metaverse or trading services and goods on the future platform. Stay tuned for all the surprises that are about to come straight into your home, pocket and heart.

The 5% of \$DNC bought will be stored on the community wallet. The community wallet will only be used on its holders. This means we will never sell tokens to fund expansion of the project, use for marketing expenses. The goal Digital Nomad Coin wants to achieve is every time we interact with the digital nomad ecosystem it will always be in a positive way. A project should never have to sell their own tokens to pay for expenses but rather increase the value provided to the investors.

# Future & Mission

## HOW THE RAISED FUNDS ARE GOING TO BE USED

We are going to build the “Amazon” for digital nomads. We know how hard it can be to travel light and work while doing it. And we know as well how easy it is to be free if everything is matching.

You might not know the local language, where to go, or how to connect with people in the area. You are going to find all of that and more structured in one place with trusted partners.

As you can imagine building the digital infrastructure needed to pull such a concept off needs time, know-how and money. We are going to establish the secure server environment needed, the blockchain technology for maximal transparency and the right marketing strategy to have the best offers ready for digital nomads all around the world.

The major positions within our calculations are:

- marketing budgets
- steady support for customers
- digital infrastructure
- creating partnerships with local and digital suppliers
- securing the currencies promises and extending its possibilities through a digital and analog world

# The Team

To solve those challenges we have built a perfect team of coders, mathematicians, economists, designers, coaches, writers, investors and business people. Everyone is in the venture capital game for quite some time and here to create an engaging ecosystem and community. That will bridge the gap between investors and developers. For future digital nomads success.

With the leadership of the \$DNC project spearheaded by international military experts, leadership is at the core of our identities. The goal is to build a cryptocurrency community where investors will always have communication with the team members, complete transparency with developers and stay true to the main goal.

Distributing rewards among all \$DNC investors to be able to create a free world for everyone who is willing to follow his or her calling

# Road Map

## VISION/GOALS

10.000.000 nomads use \$DNC regularly for their payments regarding work & life around the globe at Nomadzon.com.

### 2022 / 2023

Launch Nomadzon.com where services are exchanged cheaper amongst the community in \$DNC only.

### Q2 2022

Cooperations with digital platforms especially important for nomads, e.g. AirBnB, LinkedIn.

Buy land in Decentraland to meet and cooperate digitally.

### Q1 2022

Launch worldwide marketing.  
Launch fiat onramp to directly invest.

First meetings in person in Montenegro.

### 12 / 2021

Create Website.

Launch and IPC of \$DNC.  
First global investors won.  
Create places to meet up.  
Setup Project for 2022.

## ROAD MAP - DIGITAL NOMAD - PROJECT OVERVIEW

### Q1 / 2022

Worldwide marketing campaigns are launched. Through social media, e.g. LinkedIn, Youtube and Meta, we expand our outreach and open up new possibilities to potential and already existing digital nomads. We create a movement that is incentivized through monetary reasons as the chance for interest rates as an investor of \$DNC. But also, for ideological reasons as a participant of a movement that revolutionizes the understanding of work in the 21th century. To make participation even easier the fiat invest will be possible by the end of the first quarter 2021. As an investor you can also join the founder's team in person in Montenegro to set the further expansion schedule and strategy plan.

The architecture of Nomadzon.com will be defined and the right personnel will be searched for and won as partners.

### Q2 / 2022

As our outreach creates attention and interest we approach big players to integrate their services into our platform. Companies such as Airbnb, Booking.com are only two of them representing the industry of modern housing. WeWork as a coworking space will be a potential supporter to create the right working environment. As financial partners we will address TransferWise and Revolut. As a partner for insurances to travel internationally Foyer Global Health will be spoken with. As we are a team of successful entrepreneurs we have large networks and for that reason will be able to win partners on all levels as part of our services.

Another major step that we will finance with the investor's money is going to be the property in Decentraland. Their interaction can take place for everyone who owns the \$DNC. This way we make sure that the community can establish itself independently from location and as a secure way of preparing oneself.

## Q3 / 2022

Nomadzon.com is launched and celebrates Go-live. Through our marketing campaigns, the partnerships with existing players and the virtual community we have prepared the Go to market properly. This way provider and buyer can be brought together right from the start. We calculate revenues of about 100.000\$DNC within the first four weeks. As only Digital Nomad Coins can be used on our platform the value of today's coins will increase dramatically when an estimation of nearly 1.000.000 digital nomads will use our services by the end of 2022.

## 2022 /2023

is the place to ask for everything related to digital working and offer all the services regarding it. 10.000.000 nomads use \$DNC to secure their life with the help of Nomadzon.com.

# Conclusion

Overall we are honored and proud to say that this project is not only going to be huge but also will have an amazing impact on the life of our nomads. Thank you for reading and hopefully we see each other soon on the island.

To support the project everyone can help. Immediate help as investing in the coin is the first step. If aside that you have further chances to support us and the idea, please reach out to us.

To be informed about every step and news follow us on:
