Introduction

Metaversum (\$MTC) is going to become the cryptocurrency that enthusiasts all around the world will trade their services, experiences and products with. It will become the identifying symbol for a group of people who have chosen a life aside the beaten tracks of convention. We offer a partnership and a strategic alliance. It will be the place to go! Let's start and meet the future!

PHILOSOPHY

People who are convinced that life takes place outside the restricted areas of government, states and nations. We are all one people. Enthusiasts know that from experience, and we are envisioning a time where enthusiasts can connect themselves with the roots of our ancestors. But not in the original ways when early enthusiasts were traveling the deserts from one oasis to another, risking their lives. Rather as their digital descendants.

The number of people who want to break boundaries and who are following their callings is steadily increasing. Those are the ones we address. As one knows though working and living digitally has its obstacles. When one's work can be fulfilled digitally there are many questions arising:

- Where to work on which grounds?
- Where to look for the right digital environment?
- Which services are there to use in the metaverse?
- Is there some kind of mutual community to support me far away from home?
- What if my business gets in trouble and who can help me as a specialist?
- How about experts in relevant fields like international living in the metaverse?
- What about health and other insurances abroad?
- Should I deregister at home and give up my appartement?

metaversum.plus will be next big thing in the digital market

KNOW MORE INFORMATION AT
www.metaversum.plus

All this information, the relevant services and much needed products will be shared on our platform metaversum.plus. The platform that allows only digital enthusiasts and providers of substantial metaverse needs to come together for business, information and social reasons. The platform will be the digital marketplace that everyone from every place can go to. Where everyone will understand each other and trust each other because one knows the other is from the same kind. There will be interaction even aside the platform through the Metaverse, too. All that to be able to live the metaverse life better, easier and successfully in the real and the virtual world.

At the marketplace metaversum.plus and within the metaverse \$MTC will be the currency to use. As we are believing in the values of trust and transparency the money system must be adjusted adequately. Therefore we use the blockchain technology and its decentralized setup.

Our idea is that every soul deserves and demands to be free. That is what \$MTC and metaverse.plus contribute to. We are investing ourselves, our lifetimes and work into it.

Do you join us?

"Developing a business idea for the metaverse not only on paper, but having the courage to put it into practice and to accept the personal and financial risk connected with this, is not always rewarded. But we guarantee to surprise the market in the next few months with extraordinarily intelligent services."

The metaversum.plus -Team

DISCLAIMER

THIS SECTION ON RISK AND DISCLAIMER IS NOT AND DOES NOT PURPORT TO BE A COMPLETE ENUMERATION OR EXPLANATION OF THE RISKS INVOLVED WITH THE PURCHASE OF \$DIGITAL NOMAD TOKENS. THERE MAY BE ADDITIONAL MATERIAL RISKS THAT THE DIRECTORS DO NOT CURRENTLY CONSIDER TO BE MATERIAL OR OF WHICH THE DIRECTORS ARE NOT AWARE. THE FOLLOWING THEREFORE HIGHLIGHTS CERTAIN RISKS TO WHICH DIGITAL NOMAD PROJECT IS SUBJECT TO AND WHICH DIGITAL NOMAD WISHES TO ENCOURAGE PURCHASERS TO DISCUSS WITH THEIR OWN PROFESSIONAL ADVISORS.

Prospective \$MTC Token purchasers should conduct such independent investigation and analysis regarding, the \$MTC Token, and all other relevant market and economic factors as they deem appropriate to fully evaluate the merits and risk of their purchase. The company and its directors disclaim any responsibility to advise purchasers of \$MTC Token of the risk and considerations associated with the purchase of \$MTC Token as they exist at the date hereof or from time to time hereinafter. Each prospective purchaser of any \$MTC Token must determine, based on his/her own independent review and such professional advice (including, without limitation, tax, accounting, credit, legal and regulatory advice) as it deems appropriate, that the purchase of \$MTC Token is appropriate and suitable for it, notwithstanding the clear and substantial risks inherent with the purchase of \$MTC Token. You should consult with your own legal, regulatory, tax, business, investment, financial, and accounting professional advisors to the extent that you deem it necessary, and make your own decisions including decisions regarding the suitability of this purchase based upon your own judgment and upon advice from such professional advisors as you deem necessary and not upon any view expressed by any party mentioned in this whitepaper.

THE CRYPTO MINING INDUSTRY OVERVIEW

Cryptocurrency has remained a disruptive technology since its entry into the world in 2009 and has shaped the way things are done in many sectors around the globe. Bitcoin is the most popular cryptocurrency in the world with nearly 1.000.000.000.000\$ market capitalization. Ethereum has become a blockchain technology that allows major investment companies to regulate and structure the financial markets. Metaversum Coin (\$MTC) is going to become a part of that new way of currency and technology usage. For a more transparent way of offering and using services digitally.

What is crypto mining? How does it work? What are some of its benefits?

Crypto mining is the process of using computers to solve complex mathematical problems in order to validate transactions in a cryptocurrency network. The reward for solving these problems is usually paid out in the form of new coins or tokens.

Mining is a way to earn cryptocurrency without having to purchase them directly from exchanges. This means that you don't have to pay transaction fees and you can also get rewarded for helping to secure the network.

The biggest problem with this method of earning money is the amount of time, energy, and hardware resources required to mine cryptocurrencies. However, as more people begin to use digital currency, the difficulty of mining increases which makes it more profitable.

In addition to being an alternative source of income, crypto mining has other advantages such as decentralization, security, and anonymity. These factors make it easier to conduct business online because no one knows who owns what addresses or how much wealth they possess.

This guide will provide detailed information about the different types of crypto mining available today and explain how each works.

Types of Cryptocurrency Mining: Proof-of-Work (PoW) vs. Proof-of-Stake (PoS)

Proof-of-work (PoW) is the most popular type of crypto mining at the moment. It requires users to compete against one another by completing tasks that require significant computing power.

These tasks are designed to be difficult so that only powerful servers can complete them. Once a task is completed successfully, the miner receives a reward based on the size of the block and the number of transactions included in the block.

While PoW is the most widely used system, there are alternatives like proof-of-stake (PoS). In this case, miners receive rewards based on their stake rather than the amount of computational power they contribute.

PoS systems are becoming increasingly popular because they are less resource intensive than PoW.

Problem & Solution

MTC is the first crypto currency that is addressing and solving metaversum needs all around the globe. From finding the best working and living spot to like-minded people. The ideal financial support in foreign places without extra charges. With international insurance coverage and support no matter where and who you are. The questions above are dear to many enthusiasts and the ones who are planning to undertake that step into worldwide freedom. Since there is no structured platform to meet like-minded people who offer answers and practical services metaversum.com is going to deliver exactly that.

We met many people from all over Europe. Every country seemed to do it differently on a first glimpse but when we were looking at the data it was clear that most countries are really similar in what metaversiens have to know. That is why we started this initiative, in which we had the dream to found our new country, an island of freedom, a place on earth, which can feel like heaven. A place where we can be free and united again.

Therefore we started going south in search of the right environment and possibilities.

The Metaverse is the place to be. You can life there freely and enjoy earning money through this project.

HOW CAN THE METAVERSUM COIN BENEFIT A GREATER FUTURE?

There's an invisible layer between the physical world and the digital world. It's called the metaverse.

The metaverse is a virtual space where you can interact with other people, places, ideas and information.

It's a place where you can share your thoughts and feelings with others. A place where you can express your creativity and connect with other creators.

It's a space where you can explore, play, imagine and invent.

It's a universe of possibilities.

The metaverse exists right now. And it's growing every day.

In fact, the metaverse is expanding faster than the Internet did at its peak.

Soon, everyone will be able to access this incredible space. Soon, anyone will be able to build anything.

Soon, there will be no limits to what you can create.

The metaverse has been around since the dawn of civilization. But only recently has technology made it possible to experience it directly.

Now, thanks to the Internet, the metaverse is accessible to everyone.

Imagine the impact this could have on humanity. Imagine the potential for good. Imagine the possibilities for peace.

Imagine the possibility of connecting with people across the globe. Imagine the possibility of creating something truly unique.

Imagine the possibility for all of us to become our best selves.

Imagine the possibility that we might finally understand ourselves better.

Imagine the possibility we might finally find out who we really are.

Imagine the possibility.

It will come either with or without you.

We are here for you!

The Technology

BLOCKCHAIN 1.0 – BITCOIN

Blockchain is the transformational technology that powers Bitcoin and has rapidly gained popularity on a global scale. It is providing new foundations for economic, legal, and political systems. Blockchain technology can change the way businesses provide services much as the internet did a few decades ago. Depending on perspective, the definition of a Blockchain network can differ. Authors Don and Alex Tapscott of

"Blockchain Revolution" define Blockchain as "an incorruptible digital ledger of economic transactions that can be programmed to record not just financial transactions but virtually everything of value". From a technical perspective, a Blockchain is a term for a distributed, P2P network. It is append-only, immutable, and only updatable with the consent of the peers within the network which is performed using the built-in consensus mechanism. It is a global network of peers in which each peer holds a copy of the distributed ledger. It contains every P2P transaction from the very first to the most recently verified, all in chronological order. Cryptography is used to sign each transaction, which offers high security and integrity.

UTILITY TOKENS

Utility Tokens represent access to a current or future product or service; in this case, Metaversum Coin. Buying digital tokens could be considered as buying a software license that gives the owner the right to access the final product or service. One thing that differentiates tokens from software licenses is that they are transferable, user-to-user, or user-to-crypto exchange. This is why it is so exciting to introduce Metaversum Coin to the cryptocurrency community. Metaversum Coin, when compared to the vast majority of tokens available, actually has a utility. We are not just hoping our token gets seen by the right person. What is an ILO? ILO stands for Initial Liquidity Offering, which is a new fundraising mechanism through which projects can raise funds by selling tokens on DeFi, based Decentralized Exchanges without an ICO. ILO is designed in a bid to eliminate the problem of liquidity during token launch. As opposed to centralized exchanges, when a new token is listed on a decentralized exchange there is no need to wait for a long time to sell the tokens. ILO uses AMM or Automated Market Making mechanism to sell tokens in the form of computer programs that are ready to pay for the tokens. In the process of an ILO, the liquidity contributors will receive the new tokens in exchange for the contribution to the pools for the AMM to work for new tokens. Since these liquidity contributors take risks to buy the new tokens, they are offered bonuses known as yields. The contribution of liquidity is in the form of established coins like BNB. If the token holders sell a lot of new tokens through AMM, the liquidity pool for that token will become skewed, as the token holder receives stable coins held in the pool. MetaversumX Coin will be making use of a reputable ILO platform and Pancakeswap as our AMM provider. When setting up the ILO, you must lock a percentage of the raised currency as counter liquidity to the sale token. The reason for this is to guard liquidity providers against rug pulls (a situation where project teams can withdraw all liquidity from the AMM without the investor being informed. For Metaversum, we would lock 51% of the currency raised. The ILO platform uses a special locker to lock the liquidity. The liquidity locker revokes the access of developers to move LP from a start date to an end date. There are many benefits of running an ILO including:

- Faster Sale
- Immediate Liquidity
- Lower Cost
- Fair methodology

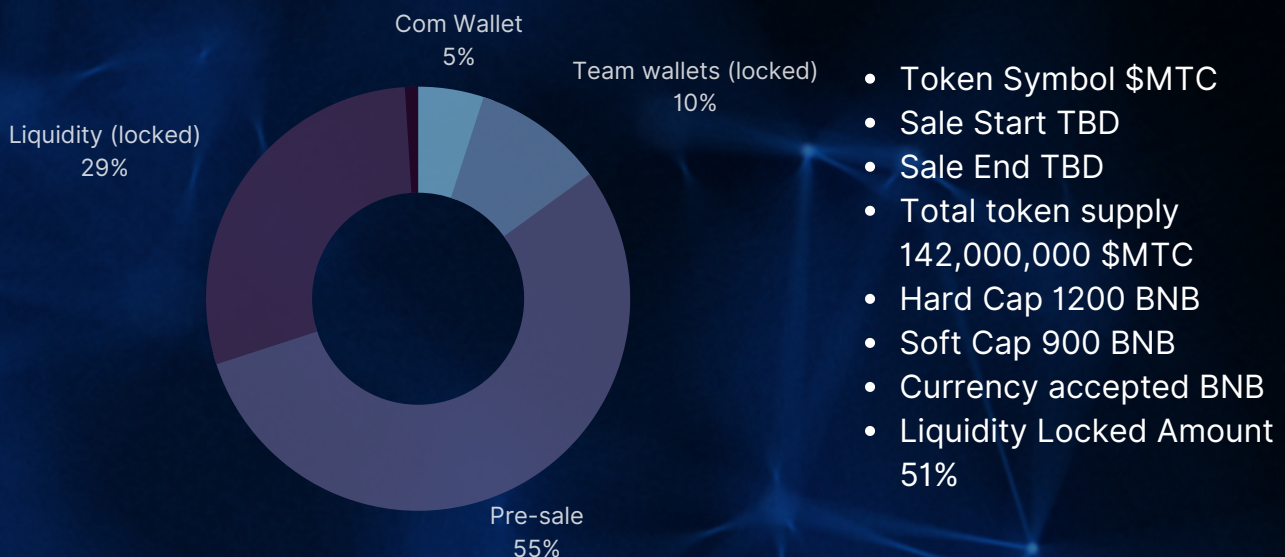

METAVERSUM - THE ECOSYSTEM

\$DNC Token

The blockchain network to be utilized will be the Binance Smart Chain (BSC). The BSC network is widely used and accepted throughout the Cryptocurrency space. It will also cost dollars to send out rewards to all of our holders instead of the thousands it would cost on Ethereum. To gather the funds needed, the \$DNC token will be launched on an ILO platform. After the ILO, investors can buy \$DNC through Pancakeswap V2 where a fixed price per token will be established.

METAVERSUM - THE ECOSYSTEM

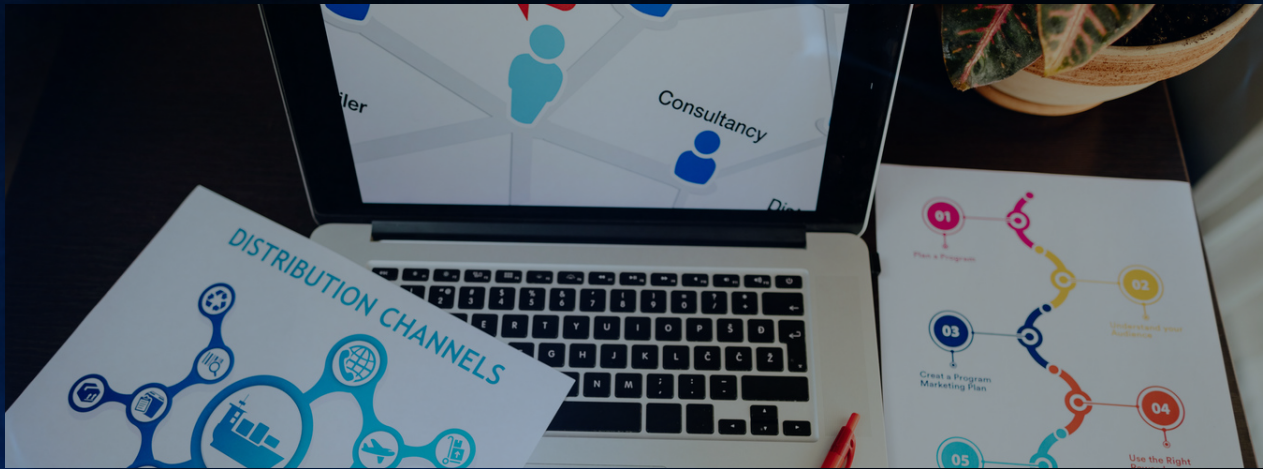

METAVERSUM - THE ECOSYSTEM

If the hard cap is not reached, the unsold tokens would be burned automatically with the ILO provider. It is our belief that the hard cap would be obtained easily due to our social reach, project relevance, and our market research. Thus, the project would have too much demand, which is a good thing for the token post the ILO stage

Distributionplan

To solve those challenges we have built a perfect team of coders, mathematicians, economists, designers, coaches, writers, investors and business people. Everyone is in the venture capital game for quite some time and here to create an engaging ecosystem and community. That will bridge the gap between investors and developers. For future enthusiasts success.

With the leadership of the \$MTC project spearheaded by international military experts, leadership is at the core of our identities. The goal is to build a cryptocurrency community where investors will always have communication with the team members, complete transparency with developers and stay true to the main goal.

Distributing rewards among all \$MTC investors to be able to create a free world for everyone who is willing to follow his or her calling.

There are even cryptocurrencies that are designed to be used exclusively for gambling.

All of these projects are built on blockchain technology. A distributed ledger that allows transactions to occur without a central authority.

Blockchain technology is the foundation upon which cryptocurrency operates.

It's what makes Bitcoin possible. And it's what makes other coins like Litecoin or Dogecoin possible.

But what if you could use this same technology to create your own coin? What if you could take this technology and apply it to any idea that you want?

Well, that's exactly what we're going to do here today. We're going to explore how the blockchain can enable your ideas to become reality.

Pre-Sale & IPO Plan

The first Round will start at the 01.06
with the help of

- Token Symbol \$MTC
- Sale Start TBD
- Sale End TBD
- Total token supply 150.000.000 \$MTC
- Fully diluted market Cap 1.5 million
- Hard Cap 1200 BNB
- Soft Cap 900 BNB
- Currency accepted BNB
- Liquidity Locked Amount 51%
- Goal: Price per Coin 0.01\$

Volume	Discount	Cost per \$MTC
5 Million	25%	0.0075
10 Million	20%	0.008
15 Million	15%	0.0085
20 Million	10%	0.009
25 Million	5%	0.0095
75 Million	0%	0.1

HTEST(HTEST) Presale Pool

IDO Contract : 0x5941Ad34b19b0Fad8D9A27745f70B825403818aB

Project description

Dogecoin is a cryptocurrency based on the popular "Doge" Internet meme and features a Shiba Inu on its logo. Dogecoin is a Litecoin fork. Introduced as a "joke currency" on 6 December 2013, Dogecoin quickly developed its own online community and reached a capitalization of US\$60 million in January 2014. Compared with other cryptocurrencies, Dogecoin had a fast initial coin production schedule: 100 billion coins were in circulation by mid-2015, with an additional 5.250 billion coins every year thereafter. As of 30 June 2015, the 100 billionth Dogecoin had been mined.

Warnings Detected

This sale is listed in the DeFi Zone. Presales in this area use custom contracts that are not vetted. Developers of tokens in this area can block transfers, can stop users from claiming tokens, can stop trading on exchanges and requires extra vetting. Participate at your own risk! (You could lose your funds)

Warnings SoftCap

If the pre sale amount does not reach the soft cap, the pre sale fails and the funds will be returned

WHAT IS THE REWARD SYSTEM?

Investors will get great benefits investing in this coin. This project is going to revolutionize how the possibilities of modern work life can be understood. This is not a short project in which the team wants to do a Rug Pull. We will do everything possible that this project stays liquid all the time, in a way that short term and holders benefit from it and the longtime vision can be realized.

Our roadmap is our mission and this is why we are fighting for all of it because we know by our own blood, sweat and heart how hard it can be to successfully become a part of the metaverse.

Furthermore we will ensure that investors who hold their coin get regular airdrops, stacking rewards and even interesting courses and NFTs, which help to live truly free. Those rewards will also give you more benefits when it comes to meeting in the Metaverse or trading services and goods on the future platform. Stay tuned for all the surprises that are about to come straight into your home, pocket and heart.

The 5% of \$MTC bought will be stored on the community wallet. The community wallet will only be used on its holders. This means we will never sell tokens to fund expansion of the project, use for marketing expenses. The goal Metaversum Coin wants to achieve is every time we interact with the metaversum ecosystem it will always be in a positive way. A project should never have to sell their own tokens to pay for expenses but rather increase the value provided to the investors.

Future & Mission

HOW THE RAISED FUNDS ARE GOING TO BE USED

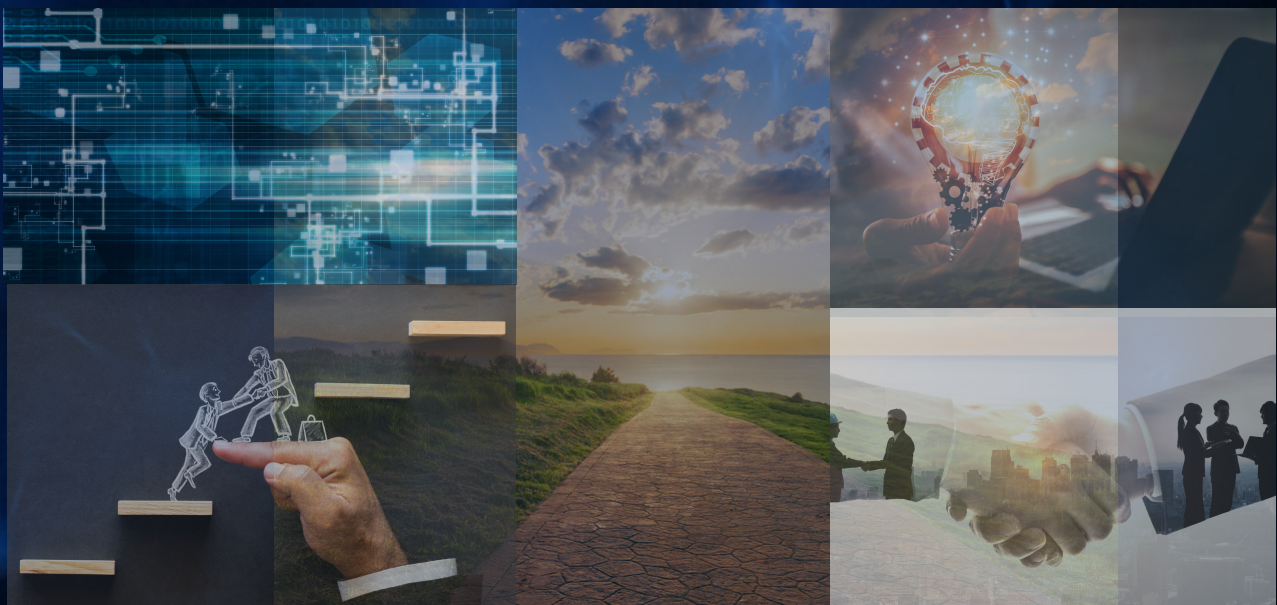

We are going to build the “metaversum” for digital people. We know how hard it can be to travel light and work while doing it. And we know as well how easy it is to be free if everything is matching.

You might not know the local language, where to go, or how to connect with people in the area. You are going to find all of that and more structured in one place with trusted partners.

As you can imagine building the digital infrastructure needed to pull such a concept off needs time, know-how and money. We are going to establish the secure server environment needed, the blockchain technology for maximal transparency and the right marketing strategy to have the best offers ready for metaversiens all around the world.

The major positions within our calculations are:

- marketing budgets
- steady support for customers
- digital infrastructure
- creating partnerships with local and digital suppliers
- securing the currencies promises and extending its possibilities through a digital and analog world

Road Map

VISION/GOALS

Becoming one of the largest platform which organizes to metaverse through good service and leverage the best minds of this planet.

2022 / 2023

Get listed on big Platforms such as Coinmarketcap, Coingecko and launch the liquidity pool.

Q3 2022

Get 100 people to join this DAO since it is a 100% community project.

Cooperations with digital platforms especially important for the metaverse, e.g.

AirBnB, LinkedIn.

Buy land in Decentraland to meet and cooperate digitally.

Q2 2022

Launch worldwide marketing.
Launch fiat onramp to directly invest.

First meetings in person in Montenegro.

Launch NFT Project for early Investors.

Staking Pool with high interest for early investors.

Many Airdrops to make the coin more public.

01 / 2022

Set up the Project.

Build Website and Social Media.

Launch and IPC of \$MTC.

First global investors won.

Create places to meet up.

Setup Project for 2022.

ROAD MAP - METAVERSUMX - PROJECT OVERVIEW

Q1 / 2022

Worldwide marketing campaigns are launched. Through social media, e.g. LinkedIn, Youtube and Meta, we expand our outreach and open up new possibilities to potential and already existing metaverse. We create a movement that is incentivized through monetary reasons as the chance for interest rates as an investor of \$MTC. But also, for ideological reasons as a participant of a movement that revolutionizes the understanding of work in the 21st century. To make participation even easier the fiat invest will be possible by the end of the second quarter 2022. As an investor you can also join the founder's team in person in Montenegro to set the further expansion schedule and strategy plan.

The architecture of metaversum.plus will be defined and the right personnel will be searched for and won as partners.

Q2 / 2022

As our outreach creates attention and interest we approach big players to integrate their services into our platform. As financial partners we will address TransferWise and Revolut. As a partner for insurances to travel internationally Foyer Global Health will be spoken with. As we are a team of successful entrepreneurs we have large networks and for that reason will be able to win partners on all levels as part of our services.

Another major step that we will finance with the investor's money is going to be the property in Decentraland. Their interaction can take place for everyone who owns the \$MTC. This way we make sure that the community can establish itself independently from location and as a secure way of preparing oneself.

The goal is to build a community which builds this project in a way that the metaverse can become a better place.

Because with power comes responsibility.

Q3 / 2022

Metaversum.plus is launched and celebrates Go-live. Through our marketing campaigns, the partnerships with existing players and the virtual community we have prepared the Go to market properly. This way provider and buyer can be brought together right from the start. We calculate revenues of about 100.000\$MTC within the first four weeks. As only Metaversum Coins can be used on our platform the value of today's coins will increase dramatically when an estimation of nearly 1.000.000 metaversiens will use our services by the end of 2023.

2022 /2023

Metaversum.plus s the place to ask for everything related to metaverse working and offer all the services regarding it. 10.000.000 metaversiens use \$MTC to secure their life with the help of metaverse.plus.

Conclusion

Overall we are honored and proud to say that this project is not only going to be huge but also will have an amazing impact on the life of our metaversiens. Thank you for reading and hopefully we see each other soon on the island.

To support the project everyone can help. Immediate help as investing in the coin is the first step. If aside that you have further chances to support us and the idea, please reach out to us.

To be informed about every step and news follow us on:
