How to ensure your event
looks, sounds and feels the
best it possibly can be.

AV Requirements

Oh my goodness! It's really happening! We're going to make magic together! ✨
What a thrill it is to be working with you on making your event extraordinary.

In this document you'll find everything you need regarding AV requirements for:

1. Myke presenting solo; and
2. Myke with the band.

If you can't find something, please reach out.

Mykel presenting solo

1 x DPA headset mic (preferred).
If not available or appropriate, a wireless lapel or hand held mic will be fine.

1 x wireless hand-held mic for audience interactions. He'll keep this with him on stage.

Presenting with keyboard

1 x Korg SV1 88 (preferred) or Yamaha Motif XF 88 keyboard (whichever is available).
Plus a keyboard stool and stand.

1 x foldback wedge situated under the keyboard.

1 x wireless hand-held mic on stand situated at keyboard.

1 x extra chair situated just off stage.
Mykel will use this when he invites an audience member to play with him.

It's best to set up the keyboard off-centre of the stage, quite near to the front.

PREFERRED OPTION

Mykel's slide deck presentation uses custom fonts, custom layouts, custom colours, video, animation and sound effects. Therefore, it is imperative that Mykel be able to present from his own laptop (MacBook Pro with HDMI output) whenever possible. He'll have all the adapters (including spares) and be ready to plug in.

IN-HOUSE FIXED AV

In the event having to use house equipment is fixed, Mykel will supply his deck. **Please have someone from your team test Mykel's presentation deck to ensure all fonts, images and videos are embedded and playing correctly.** A reference PDF will be supplied to A/B check before the event.

SET-UP

Projector(s) and/or screen(s) should be beset off to the side(s) of the stage and not centre stage so Myke doesn't walk through the projector light.
