Your cocoon in
the wilderness

Reinventing
your space

Tiny Tents

Imagine stepping out of your tiny house and being cradled under a slick sail. Protected, rain or shine. The smell of fresh rain while staying dry. The feeling of a warm summer breeze without the burn of the sun on your skin. The awe of the wild from the comfort of your home.

They're flexible, versatile and made of first-rate materials. 'Cause when it comes to living... you understand that there are no better walls than none at all.

Because space is
the experience.

That's the kind of space you get with our Tiny Tents. Let your soul be nurtured with nature and extend yourself... Because space is the experience.

Organic look 'n feel

These tents represent the fusion of innovative materials, creativity, and science. They're heat bonded with a membrane that allows it to return to its former shape through memory.

They're not just cool.
They're hardcore.

Waterproof and wind resistant, they'll withstand the craziest storms.

Pre-treated with an anti-bacterial solution, they'll fend off the parasites to keep things clean.

UV stabilized, they'll shield your skin from the harmful rays of the sun. Made of long-endurance ply fabric, they'll work for you until you won't remember the first day you got them.

And of course, they're easy to mount and you can store them away in the blink of an eye. In brief: state-of-the-art quality fabrication, so you can relax knowing it's the sturdiest choice in town.

Easy, smooth & precise

In choosing a model, keep your purpose in mind. The tents live in the space you want to create, and can erect to the rhythm of your preference.

Where should the light fall? Where do you want the shadows? Is there a constant corner to shield from the wind? Is it for a long-term fixed space? Or will it be a constant shape-shifter?

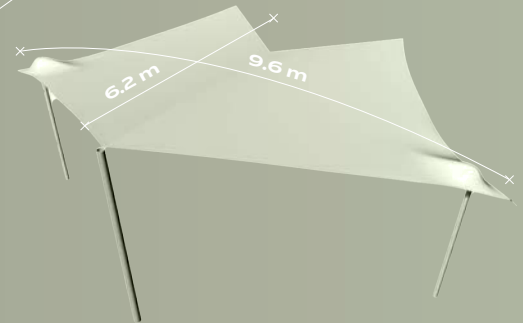

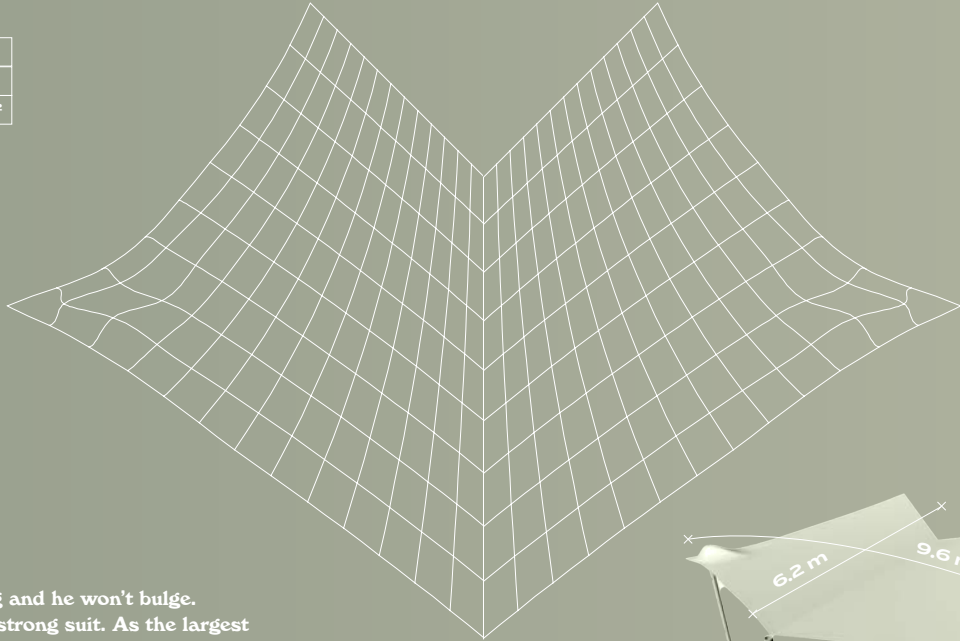

Whichever your need and choice, you're guided in person throughout the first installation. And we're always just a phone call away.

Heptagon

aka Tiny Titan

Length	9.6 m
Width	6.2 m
Area	36 m ²

You can call him big and he won't bulge. That's Tiny Titans strong suit. As the largest installation, he can truly create any extra living space you can envision. A lounge? An atelier? An outdoor kitchen? A sanctuary for yoga or meditation? Sky's the limit. You can play with him, all sides up, left side down, corners down, to provide you with the necessary protection from any direction. The stretch at its best.

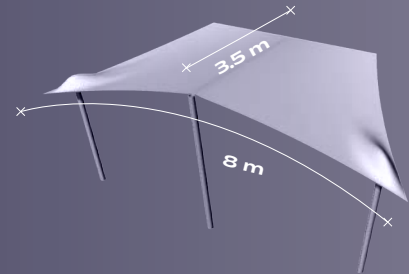

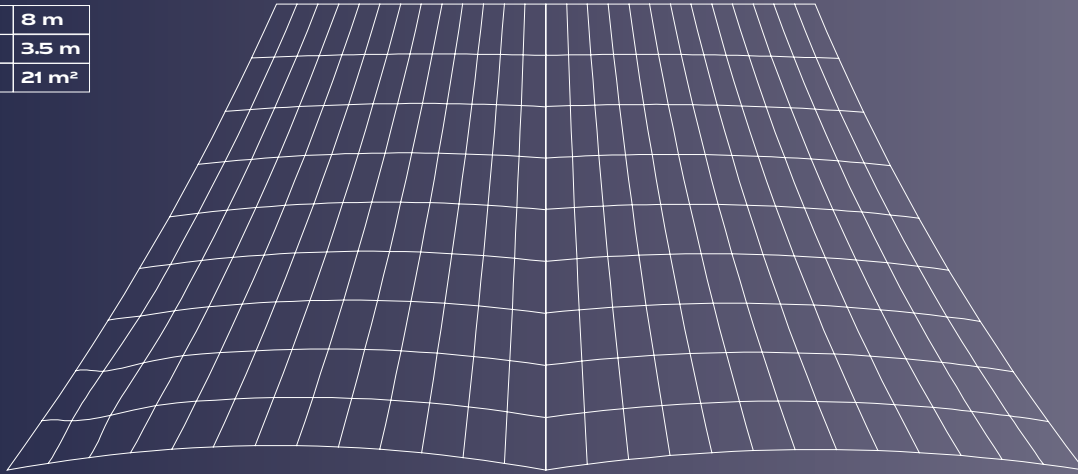

(this model comes in a range of colours and sizes.)

Trapezoid

aka Tiny Trap

Length	8 m
Width	3.5 m
Area	21 m ²

Fun fact - with two or six of these babies, you can form a full hexagon. Fun facts aside, Tiny Trap's a classic one to have. She's flexible, versatile, easy to set up, and has the power to double the size of your home. You can also bend and mold her at will - she'll stay a happy camper and won't stop surprising you!

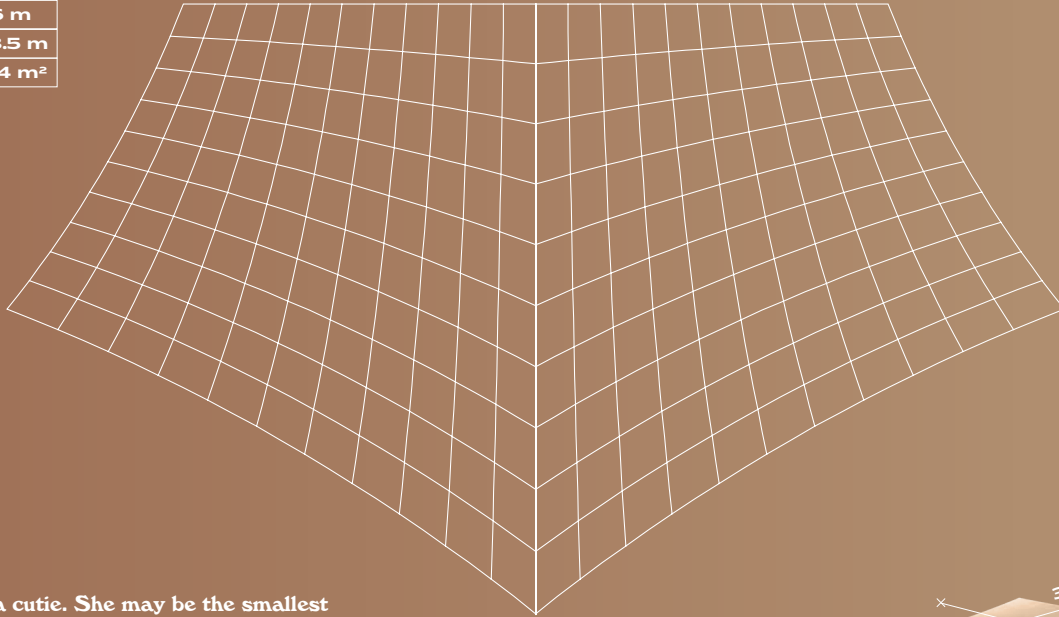

(this model comes in a range of colours and sizes.)

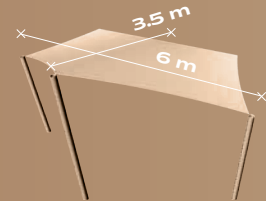

Pentagon

aka Tiny Thrill

Length	6 m
Width	3.5 m
Area	14 m ²

Tiny Thrill's a cutie. She may be the smallest of models, but she's not to be underestimated. She'll provide you with a covered patch ideal to enjoy that magical sunset, have your morning tea or daily yoga stretch, much like chilling under the shadows of a big tree.

(this model comes in a range of colours and sizes.)
