

Tallinn Digital Summit

EXPO 2022

Thank you for being part of Tallinn Digital Summit & EXPO

Tallinn Digital Summit gathered leaders from like-minded and digitally-advanced countries (30+ countries), international organizations, and the private sector to solve global challenges together.

The main idea was to address the most pressing global issues and find solutions for those challenges based on Trusted Connectivity with Trusted Partnerships principle.

We are on our road towards a connected digital future.

An online EXPO offered a networking platform connecting decision-makers with organizations and businesses worldwide. It was a unique opportunity to present the newest innovations, services, and solutions to solve global challenges together.

Prime Minister Kaja Kallas clarified the essence of trusted connectivity, saying its aim is "to connect like-minded countries through trusted partnerships—based on shared interests and values and the highest standards—thus reinforcing trust in global political and economic relations across the free world."

“If I were to share one takeaway from my today's speech, I would simply say: No nation or even continent can succeed to be resilient on its own. We need to collaborate on all levels to face today's challenges and be prepared for what the future holds for us.”

Cecilia Bonefeld-Dahl, Director General of DIGITALEUROPE

You can find all the videos, also all the keynotes and panels separately, extra messages from on-site with inspiring leaders and the presentations from here:

Conference showcase

"It was great to have met many new friends across governments and enterprises who have common passions to make the world a better place through harnessing technology."

Howie Lau, Managing Partner of NCS Group

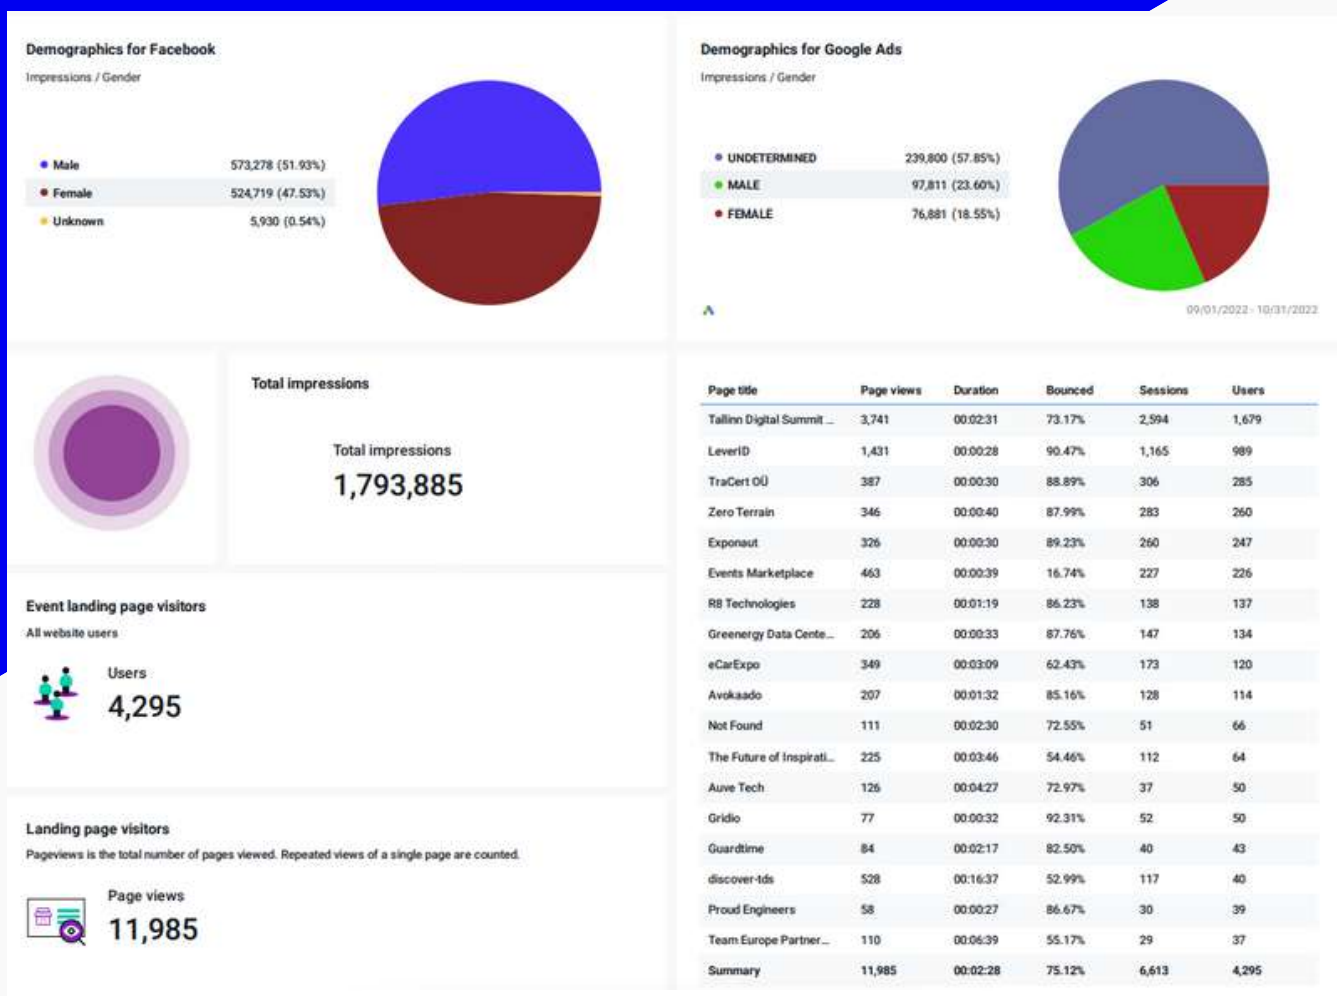

"It's incredible to see that Tallinn Digital Summit & EXPO had such a huge global reach - we had visitors to our Online EXPO from over 83 different countries."

Risto Hansen, Project Manager for Tallinn Digital Summit EXPO
