

QA Analyst

Full time - Remote

We are looking for a QA analyst with a deep interest in learning new skills. You will be joining a highly technical team that has deep knowledge of DeFi and all the cool things from the blockchain ecosystem.

Responsibilities

- Assist with the writing and development of testing strategies and manual testing scripts/scenarios under the lead of the QA engineer for a wide range of testing issues and drive to completion.
- Execute QA scripts/scenarios
- Assist the QA engineer with monitoring feedback across a variety of community channels, including telegram, discord and working with community managers to log feedback, initially replicate, then bring to the QA manager to log in the development pipeline as a bug with priority
- Triage and report client issues to QA lead in order to prioritize fixes with the engineering team.
- Help troubleshoot issues found within the products with the community/community members
- Provide support to community leaders by helping to address client reported issues and deliver feedback on product related questions.
- Constantly improve yourself by keeping up to date with the latest technologies trends.

Requirements & skills

- Proven experience in testing and/or software development.
- Experience or desire to learn in DeFi and blockchain
- Knowledge of how to create a mind map for the product you are testing; experience writing clear, concise and comprehensive test cases, knowledge on how to create a testing strategy.
- High-quality awareness and understanding of the business process.
- Ability to work in a fast paced environment.
- Written and spoken communication skills in English for a professional environment.

Benefits

- 100% remote & flexible hours
- Participation in a cutting-edge, exponentially growing industry
- Growing & challenging environment
- Learning possibilities (conferences, meet-ups, courses and more!)
- Paid time off
- Additional equipment budget
- Personal development budget
- Crypto payment (USDC)
