

## **Rust Developer (Terra)**

### **Full time remote**

*We're looking for a senior software developer with proven Rust and Terra experience, and general familiarity with blockchain technologies.*

### **Responsibilities**

If you join this role you will be able to:

- Work together in a senior team
- Pitch your own ideas regarding (technical) design
- Sync with Ethereum developers building other things in the space

### **Requirements & skills**

We are looking for someone that:

- Is an experienced Rust developer
- Has experience working on Terra
- Understands decentralized, high-performance systems
- Can analyze and optimize the platform's performance
- Has idea of running tests in a distributed environment
- Has experience with security audits of third-party and internal solutions
- Is interested in the Polkadot ecosystem
- Ability to design, research and develop blockchain-based solutions
- Understands how to improve engineering standards, tooling, and processes

### **Nice to have:**

- Substantial experience
- Familiarity with DeFi such as yearn and curve.
- Ability to design algorithms and mathematical models

### **Benefits**

- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Additional equipment
- Paid time off
- Crypto payment (USDC)

You don't have all the skills but you love Rust and have some experience in substrate? SEND US YOUR CV! We are open to discussion and would love to receive your application!
