Web (WebFlow) Developer /

Full time remote position

We are looking for a Web (webflow) Developer to join our Marketing team. Reporting directly to the CMO, you will have the opportunity to work in early stage blockchain projects with cutting edge technology in a deeply innovative environment.

Responsibilities
- Create site layout/user interface by using standard HTML / CSS / PHP / JAVA practices.
- Use wireframing tools, using functional user-interface techniques in the Web design workflow.
- Write clean, semantic Front-end code.
- Ship websites in 2 week cycles - we ship fast!
- Work closely with the Web Designer aligning the visual designs with website functionalities.
- Perform unit and user-acceptance testing to identify bugs and ensure production operations run successfully
- Maintaining, expanding, and scaling the website once built
- Stay up to date with the latest Web applications and programming practices

Requirements & skills
- Bachelor's in Computer Science, related field, or significant equivalent experience.
- Strong understanding and deployment experience in WebFlow.
- Experience with HTML/XHTML and CSS.
- Strong visual and technical portfolio.
- High level of proficiency using FIGMA, Adobe products (or equivalent tools).
- Knowledge of browser compatibility across multiple platforms and devices.
- Strong ability to design with accessibility in mind.
- Experience working in an agile/scrum development process.
- Familiarity with multiple HTML frameworks, strong JavaScript.
- Web3 experience is desirable.
- Written and spoken English proficiency.

Benefits
- 100% remote & flexible hours
- Growing challenging environment
- Learning possibilities (conferences, meetups, courses, etc.)
- Paid time off
- Equipment annual budget
- Personal development budget
