**humanetix**  
technology that enables you to care

## Aged Care Ecosystem

**Time** to care + the **data** to care well

[humanetix.com.au](https://humanetix.com.au)

## ACE Residents

The ACE Residents application focuses on bed management and resident journey which includes:

- Enquiries and bookings
- Onboarding new clients
- Respite or Permanent Discharge

Resident details recorded in ACE Residents flow through ACE Care to ensure that there is only one single source of truth.

## What our customers say about ACE

**“Transformational** - absolutely time saving with more time spent with residents.”

**“Improves information quality** - very quick, very convenient, and detailed.”

**“ACE has impacted her care (client) for good. I've noticed a distinct improvement in the care delivered.”**

## ACE Residential or Home Care Organisation

The ACE Care application is designed to assist with the day-to-day care in a residential aged care home. ACE Care allows you to help each client with the following:

- Document care comprehensively
- Document charts & clinical observations
- Tailor and schedule care for each resident
- Automate care plan based on assessments
- Manage complex healthcare
- Manage behaviour & incidents
- Manage leisure & cultural activities

## ACE Director

The ACE Director application contains business insight tools designed for reporting, compliances and administration purposes.

ACE collects rich, structured and accurate data. Personalising reports/graphs to suit your organisation's needs is easy.

Reports and graphs in ACE Director are populated from data recorded in ACE Care in real time.

Example of available reports:

- Mandatory Government Quality Indicators
- In-house Quality Indicators
- Serious Incident Report Scheme (SIRS)

### Designed for Everyone

All care staff (26 roles) have access to each client's real time care information on mobile device or PC.

### Never Forget a Care Item

Dashboards provide wing summaries, highlight missed care and important care items.
