

WE ARE LOOKING FOR

Sports Trader

Ematiq is currently on a mission to become an algorithmic trading leader with expert knowledge of (e)sports data analysis. Our analytical and engineering firepower has already established us as one of the biggest market makers in world's leading betting exchanges and we are not stopping there.

Our team of engineers, quantitative analysts & traders with access to inhouse domain experts is on constant lookout for sizable business opportunities. Our secret sauce is a clever combination of mathematics, ingenious engineering and access to proprietary data sources as well as access to decades of accumulated experience and network in relevant fields.

Required skills & experience

- Ability to learn quickly
- Passionate about sports
- Self-driven approach and responsibility
- Strong mathematical and analytical skills
- Team player who strives to bring value to the whole team
- Able to stay calm and organised in an environment which is driven by the unknown
- Experience with financial markets f.e. stocks/crypto is a plus

Responsibilities

- Monitor market movements both in prematch and live phases
- Close cooperation with analytics and development departments
- Bringing new strategies and ideas that would lead to new/changes in agent/software behavior
- Proactively analyze new opportunities, errors, and/or anomalies in detail and pass them directly to our development team

What is culture like at Ematiq?

- informal and friendly but direct and honest culture with focus on rational decision making
- talent and real impact is more important than previous titles or years of experience
- minimal amount of meetings / bureaucracy, zero to none politics
- in-house domain experts, decades of relevant industry experience
- growth / salary limited only by your talent potential
- very smart colleagues - both geeks and great people to be around
- Working in our modern offices in Prague center
- occasional home office not a problem
- leadership providing you with autonomy and trust, and expects ownership and quality decision making in return
