

Securely Onboard Contract Workers in Seconds

Organizations often need to hire contract or 'gig' workers to support the demands of project deadlines, quickly scale to meet customer demands, or to supplement the skills of their internal team. While the rise of sites like Upwork and Fiverr have made it easier than ever to find external workers, giving them secure, temporary access to internal tools is difficult, expensive and time consuming.

Sonet.io allows organizations to have their contract workers set up in minutes, with secure access to internal apps and servers and fine-grain security policies in place. Contract workers can get started instantly from any device, on any browser, and access can be removed as soon as their contract is complete.

Enable Secure Work From Any Device

Fast Contractor Onboarding

With Sonet.io leaders can allow contractors to use the device of their choice, (desktop or mobile) and any browser to access apps or servers from day one. No waiting for devices to be shipped, no VDIs or proxies to setup, no agents to install. Easily add and remove contractors as needed.

Uncompromised Security

Sonet.io allows IT to set up fine-grained access and security policies to any enterprise app or server, on-prem or in the cloud. Implement zero-trust policies to protect corporate apps and data, and ensure contractor devices don't compromise security.

Timestamp	User ID	Location	Severity	Application
[Redacted]	[Redacted]	[Redacted]	[Info icon]	[Redacted]
[Redacted]	[Redacted]	[Redacted]	[Warning icon]	[Redacted]
[Redacted]	[Redacted]	[Redacted]	[Warning icon]	[Redacted]

Observability across all contractors

Monitor all contractors from a single dashboard, with real-time visibility into compliance with business policies. Receive policy violation alerts and notifications through various channels and playback full length user sessions to see exactly what happened.

Any Device, Anywhere

Contractors can securely access applications and servers from any device (desktop or mobile) on any browser. Sonet.io supports every major browser including Chrome, Safari, and Edge.

No VDIs, No VPNs, No Agents

Access hosted applications and servers behind a firewall without the hassle of VDIs, VPNs or agents.

Elastic business scaling

Automatically scale your application environment up or down depending on your user count and seasonal productivity. Sonet.io is built on cloud-native technology for seamless workloads based on intelligent provisioning.

Zero-Trust Access

Workers can only see the corporate apps and systems that they can legitimately access, and granular security policies can be associated with user groups.

Data Protection

Content policies control authorized access to data. Prevent downloading, uploading, copy/paste of sensitive data and watermark screenshots.

Automated Alerting

Policy violations trigger alerts, and security personnel can review and record sessions for incident investigation or training purposes.

Getting Started with Sonet.io

1

Import users from an IdP or create locally in Sonet.io

2

Add applications and servers with a few clicks and associate with user groups

3

Refine access and security policies, adding fine-grain controls with a no-code policy editor

4

Users access applications and servers instantly through a custom URL

Why Choose Sonet.io?

By enabling enterprise-grade security, without impacting the user experience or requiring hardware shipments, VDIs or software installs, workers can get working from day one. Onboarding frustrations for remote workers go away, and everyone is able to access the tools they need to do their job efficiently, without compromising on security.

Instant Access

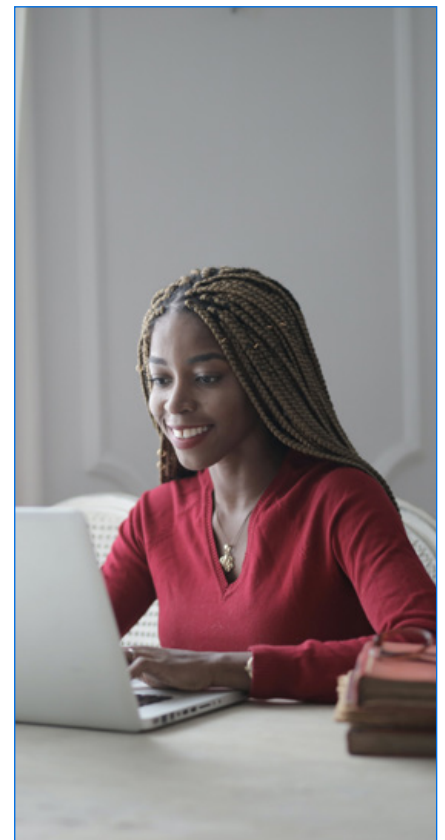

Workers can instantly access all enterprise apps and servers without the hassle of VDIs, proxies, agents or browser installs.

Lower Cost

Eliminate VDI, DaaS and device management costs while implementing zero-trust security policies and realize 10x cost savings.

Faster IT

Free up time spent onboarding workers and managing devices. Easily observe what's happening in any app or server and fix problems fast.
